Description of the incident, including the suspected cause of death, injury or egregious abuse or neglect:

On April 22, 2014, the agency received a report regarding a one-month-old infant pronounced deceased at the hospital. Law Enforcement was contacted and initiated a criminal investigation into the infant's unexplained death.

The mother and father reported that they laid the infant down to sleep in her bassinette at 11:30 p.m. and then went outside to drink on their porch. The mother and father then came inside to watch a movie before the father went upstairs to sleep. The mother reported the three older children were asleep on the living room floor. The mother stated she awoke two times in the middle of the night to check on the infant. The mother reported the second time she went to check on the infant, she was not in her bassinette, but instead, she was upstairs with the father in bed. It was reported the five-year-old child awoke in the middle of the night and took her infant sister upstairs to sleep in bed with their father. The mother stated when she went into the upstairs bedroom she picked up the infant and the infant was not breathing. The mother stated she was warm to the touch, but was limp. The mother called her mother (maternal grandmother to the infant) and then 911.

The Medical Examiner's Office report noted no signs of maltreatment or trauma to the infant. The Medical Examiner's Office stated it appeared to be a SIDS-related death; however, the official cause of the infant's death was undetermined by the Medical Examiner's Office; toxicology results were still pending. No criminal charges were filed in this case.

Findings by agency, including maltreatment determination and material circumstances leading to incident:

The agency collaborated with law enforcement and medical personnel to complete the assessment. The Initial Assessment completed by the agency found insufficient evidence to substantiate neglect of the infant by the mother or the father. The Medical Examiner's Office completed report noted no signs of maltreatment or trauma to the child. The agency determined the surviving three children safe and they remained with the mother and the father. The family was referred to community mental health services and the agency closed the case.
