

Decision Support Model Based on the Child and Adolescent Needs and Strengths (CANS)

CHILD/YOUTH ASSESSED LEVEL OF NEED

Ages 5 to 21

The algorithm for a child or youth's assessed Level of Need (LON) shall be used to inform decisions, supports, and services for children in out-of-home care. The algorithms for each LON are described here. The LON correlates with placement settings that should be able to provide for the child's assessed LON. The Placement Complexity chart shows how the LON of a child or youth is used to make placements in foster home, group home, and residential care center settings.

A description of the items rated to determine each LON are contained next. For each LON that contains groups of items together to make a LON determination, there are tables describing the necessary groupings of items to establish the LON determination. When a table contains multiple columns, that section of the determination is made when a child meets the criteria for one of the columns. There may be multiple criteria, and this is delineated by the word "AND" between tables. For users with access to the eWiSACWIS database, the system will perform the calculations for you to arrive at the LON of the child or youth.

Level of Need 1

Child-Specific. Foster Care with a child specific relation option.

All children are assumed appropriate for regular foster care with a child specific relation, if they do not meet decision criteria for any other level of care and have an identified caregiver(s) who has a specific prior relationship with the child.

Level of Need 2

All children and youth are assumed appropriate for regular foster care without a child specific relation if they do not meet decision criteria for any other level of care but do not have an identified caregiver(s) who has a specific prior relationship with the child/youth.
