

eWiSACWIS 4.0 Highlights

Release Date: October 18th, 2010

<u>Topic</u>	<u>Incident Number and Description</u>
Access	<ul style="list-style-type: none">(27751) These changes accommodate data collection for Act 78 and affects Access and Initial Assessment workers. On the Access Report page, the Date and Time Report was Received will be removed from the Decision tab. This information will be moved to the Access Information group box at the top of the page. Additionally, this information will no longer pre-fill with the current date and time. On the Allegation tab, the user will receive a pop-up page upon clicking Insert. The new Allegation (Access Report) page will be used to document the allegation row. The abuse and neglect codes have been reduced to five codes: Physical Abuse, Sexual Abuse, Emotional Damage/Abuse, Neglect, and Unborn Child Abuse. The Date or Approximate Date of Alleged Maltreatment has been added for each allegation row to determine the date per allegation. A question, "Alleged Maltreatment occurred while the child's residence was in OHC placement" will be added. Upon save of the page, the allegation row will be added to the Access Report page. The Edit and Delete hyperlinks will allow users to make changes if necessary. Also, users will be able to place their mouse over the word Describe and the descriptions they chose on the Allegation (Access Report) page will display. <p>On the Allegations tab of the Initial Assessment page, a similar pop-up page will be added to capture information per allegation row. The Medical checkbox will be changed to a question (Alleged Victim received medical treatment as a result of this alleged maltreatment) and added to the new page. Additionally, the Determination and Fatality checkbox will be moved to this new page. By clicking either the Edit hyperlink or the Insert button, users will be brought to the new Allegation (Initial Assessment) page. Finally, if the Abuse/Neglect Code is sexual abuse and the Determination is substantiated, an Abuse Resulted In group box will be displayed to capture if the abuse resulted in injury, pregnancy, disease, or none of these.</p>
Assessment	<ul style="list-style-type: none">(27802) This enhancement will affect any user working with the Assessment. First, the current Notice of Child Maltreatment Determination and Right to Appeal template has been modified. Second, the "Sent" checkbox must be selected on the Notices History pop-up page [for Substantiated allegation(s)] so that the date the notice was sent to the maltreater is more accurate. Users will be able to retroactively check the Sent checkbox on closed cases in instances where it is known that the document was sent, but the worker did not select the Sent checkbox prior to case closure.(27833) This enhancement will affect any Initial Assessment supervisor to help track the staffing and assignment of CPS reports to Initial Assessment staff. A new page will be created to provide a "real time" tracking history of Initial Assessment related assignments made within a user-selectable time period (e.g. same day, past 3 days). This page will show the CPS report date/time, response time, and the assigned worker with date/time information. Supervisory and 'transfer' assignments will be excluded, to avoid duplication of cases and counts.
Financials	<ul style="list-style-type: none">(25685) This enhancement will affect any user working with the Checks and Payments Maintenance page. The change provides users with a new sort display, allowing them to sort their retrieved results by Amount Ascending, Amount Descending, and Date.(26746) This enhancement will affect any users working with the Service Type, Unlicensed Service, or Payment Download pages. The main purpose of the enhancement is to remove the display of "inactive" values from the application. While the majority of this change should be transparent to users, the pages and the use of the pages identified above should be beneficial with the removal of inactive values from the display.

eWiSACWIS 4.0 Highlights

Release Date: October 18th, 2010

<u>Topic</u>	<u>Incident Number and Description</u>
Imaging	<ul style="list-style-type: none">(27286) These changes will affect anyone who uploads images into eWiSACWIS as well as anyone who views images in eWiSACWIS. Large changes to the File Cabinet will be made to accommodate the policy changes surrounding imaging in eWiSACWIS and will also make the uploading of documents into eWiSACWIS an easier and more streamlined process. <p>The changes will allow for workers to multi-select participants when uploading an image, to view the image before saving the record, and to delete or edit the image after the record has been saved. Additionally, a Create button will be added to allow the creation of another image for the selected case or provider. There will also be new categories and types of images added. Workers will also be able to view the image without actually opening the record by placing their mouse over the View hyperlink.</p> <p>The display of imaging records on the Outliner will be modified so that the images are located under the categories of work associated with the image, rather than under the File Cabinet icon.</p> <p>Finally, an image search will be added to allow workers to search images based on participant, category, and type of image. The search can be done by case, person, or provider.</p>
Independent Living	<ul style="list-style-type: none">(25144) These changes affect Independent Living county workers, contracted workers, and ongoing workers who aid in Independent Living planning for youth. Several changes are being made to the Independent Living page, as well as the Person Management page, to accommodate the National Youth in Transition Database (NYTD) requirements and Independent Living policy directive regarding Transition to Independent Living Plans. <p>On the Person Management page, a secondary e-mail will be added to allow workers to add an additional e-mail address for a youth to aid workers in contacting the youth after he or she has aged out of care.</p> <p>A Contacts tab will be added to the Independent Living page that will also aid in contacting youth after they age out. The Contacts tab will include basic person information, as well as a place to identify key collateral contacts as well as additional contacts for youth.</p> <p>Two ticklers will also be added to aid workers in meeting the requirements. The first tickler is to complete a Transition to Independent Living Plan on youth who are 17 ³/₄. The date of the Independent Living Transition to Discharge Plan is documented on the Assessment/Plan tab of the Independent Living page. The second tickler is to have youth to complete the NYTD survey. This tickler will display on the youth's 17th birthday (when the youth is in an AFCARS qualifying placement) and the worker will have 45 days to have the youth complete the survey.</p>
Out of Home Placements/Services	<ul style="list-style-type: none">(27574) This enhancement deals specifically with the documentation of a child "Missing from Care." Currently, the options of "Missing From OHC - Closing Case" and "Missing From Care - Not Closing Case" exist as Service Ending reasons. Since these options do not apply to a Service (they only apply to court ordered placements and speak only to a child missing from out-of-home care), these two values will no longer appear when ending a Service.
