14. In our example, let's assume both Maltreater Substantiations were overturned. The following questions would have appeared when saving the very last Overturned Maltreater Substantiation (Step 12 above). Selecting No to these questions indicates that A/N occurred and that it is unknown who did it. Selecting Yes to these questions indicates that A/N never occurred. For our example we will select No to both questions indicating that A/N did in fact occur to both Sally and Billy - but that we don't know who did it.

15. Because the Abuse or Neglect occurred, the outlier will continue to display the Assessment as Substantiated. The Appeal indicator also remains. Click on the Assessment hyperlink.
