BMCW GENERAL GROUP HOMES/SETTINGS (DCF 57)

PREGNANT AND/OR PARENTING TEENS

BASIC PROGRAM INFORMATION REQUIREMENTS

Please submit and address the following as applicable to Group Setting Basic Program Design and Work plan.

The BMCW requires program and workplan information for all general and/or specialized group settings. Please address the following in describing your program and workplan:

- **Provide all necessary transportation to medical and behavioral health appointments;**
- **Provide or arrange all necessary transportation to school;**
- **Provide an educational coordinator or liaison;**
- **Participate in crisis stabilization/planning;**
- **Engage the adolescent in programming and services at least two hours per week;**
- **Connect the adolescent to community resources;**
- **Prohibit the use of physical restraint/intervention to deescalate negative behavior; How are you going to prohibit the use of physical restraint/intervention?**
- **Employ a workforce that is culturally competent and able to engage youth from diverse cultural backgrounds and choices of lifestyle;**
- **Staffing patterns; Ensuring 24/7 supervision and ability for emergency placements;**
- **Provide training to all new staff; provide on-going staff training inclusive of general and relevant specialized programmatic areas; staff should be trained in the dynamics of high risk behavior and its prevention and management;**
- **Provide emergency operations procedures plan to include how the safety of the child will be maintained.**

Independent Living Skills: Independent living preparation is a complex process of acquiring both “hard” and “soft” skills. In addition to learning to shop for groceries, plan meals, maintain a household, budget money, interview for and maintain employment, access dental and medical care and pursue their education, it is important that youth learn critical decision-making skills, self responsibility and sound judgment. For all youth ages 15 and over, the group setting staff are required to collaborate with the case manager and the youth in the development of the Ansell-Casey Life Skills Assessment to determine the skill building needs of the youth and the Independent Living Case Plan to be used as a guide to track the life skills development of the youth.

Reproductive health: Reproduction health, including both physical and relationship health, must be included in all group home/setting programming. Providers will be required to collaborate with the BMCW and the Wisconsin Abstinence Program consultant to develop an incentive-based demonstration project as one aspect of this programming component. More information will be provided at a later date.

Domestic violence: Providers will deliver programming to include domestic violence awareness that will include family, social, and peer-to-peer relationship development and communication skill building.

Sexual Assault: Providers will deliver programming to include sexual assault awareness, provide awareness or resources in the community, and assist female and male youth in obtaining services as needed.

Alcohol and other drug abuse issues (AODA): Identification of alcohol and other drug use/abuse, including inhalants, along with education on the immediate and long-term affects of substance abuse must be provided through specialized programming.

Assistance with continued contact with the birth family: Group Home and Group Settings must assist the youth in maintaining positive contact with parents and siblings according to the case plan by:

- Ensuring the same **protection** for youth as for younger children in care. Proposals should state how youth will be supervised and how safety will be ensured while the youth participates in off-site activities;
- Meeting **diverse and specific developmental needs** of youth by providing specialized programming to address the behavioral, emotional, history/background and developmental needs of the individual. Registrants may choose to serve a specific age group only, for example, boys ages 12 to 14;
- **Providing supervision and nurturing** by a caring adult who can engage the youth in programming. The background and experience of staff is important;
- **Working with other BMCW** professionals on coordinating services to the child, including but not limited to recreational activities, health care, counseling, and educational services;
- **Finding mentors who** agree to work with individual youth one-on-one.

SPECIALIZED PROGRAM REGISTRATION REQUIREMENTS

Pregnant and Parenting Teens Enhanced Requirements

Agency must address its knowledge of, and experience in, serving a specific population. Program design and workplan should also describe how the specialized programming will be delivered and the agency's expertise in engaging youth in programs.

Settings that provide care for these groups of youth need to provide these services in addition to the basic required services:

- Assessment of underlying causes of child's disruption and/or runaway behaviors;
- Identification of other issues, such as drug/alcohol dependency, failure in school, risky sexual conduct, etc.;
- Ability to keep the youth safe;
- Ability to engage the youth in programming;
- Other programming the agency determines of benefit to the youth.

Pregnant and/or parenting teens: Settings that provide care for pregnant and/or parenting teens need to provide these services in addition to the general required services:

- Medical care (pre-natal care, post-natal care, baby care);
- Baby supplies, furniture, clothes, formula, etc.;
- Reproductive health for post-partum;
- Parenting/bonding;
- Connection with community and systemic resources including WIC and W2;
- Mental health and behavioral health care;
- Substance abuse identification and prevention;
- Healthy relationship counseling/education;
- Other programming the agency determines of benefit to the youth.
