To: County Child Support Agency Directors

From: Connie M. Chesnik
Division Administrator

RE: CY2027 Medical Support General Purpose Revenue Funding

Purpose

This memo provides information to child support agencies (CSAs) regarding the Medical Support General Purpose Revenue (GPR) funding for the Calendar Year 2027 (CY2027) Child Support contract.

Background

The federal Department of Health and Human Services released a new Medical Support regulation in 2008. The regulation expanded child support program responsibilities to seek and enforce orders that require either parent to enroll the children under private health insurance plans that are available to the parent at a reasonable cost.

Medical Support GPR Contract Funding

In the 2025-2027 Wisconsin Biennial Budget, \$300,000 in GPR was appropriated for each state fiscal year to reward county child support agencies that find private health insurance for Medicaid children. The \$300,000 is eligible for additional federal matching funds of 66%, which generates \$582,353, for total funding of \$882,353 for county child support programs. *The medical support GPR funding is used for all eligible, necessary, and allowable child support expenditures.*

The medical support GPR is allocated to each county CSA based on an annual ad hoc report from KIDS for the period of October 1, 2025 – September 30, 2026, which tracks the added “worker-entered” private health insurance coverage for children receiving Badger Care (Medicaid). The attachment shows the amount of medical support earned by each county.

This funding is part of the CY2027 State-County Child Support Contract allocations, SPARC contract line 7606, and counties will receive this funding by June 30, 2027.
