Access Referral Screening

Timely Referral Screening

Select a county: **1** (All)

Select a date range: **2** July 2018 November 2018

Performance Metric: Timely screening of child welfare reports (Access).

Objective: Increase the percentage of Access referrals that are screened within 24 hours.

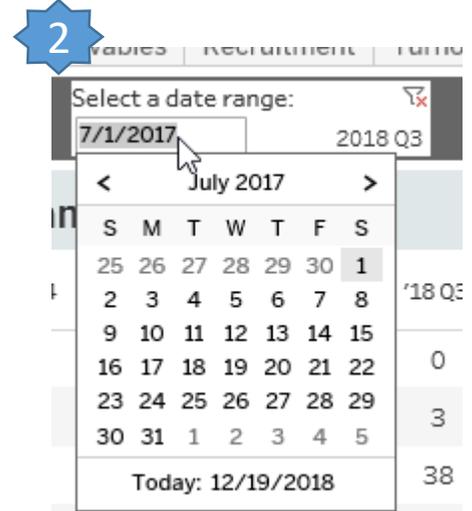

Target: 100% of Access referrals are screened within 24 hours.

What does this measure? The number of referrals received each month that are screened within 24 hours compared to the total number of Access referrals screened in that month.

Why is this important? DCF and our county partners are committed to responding to reports of alleged abuse or maltreatment in a timely manner.

Data source: dWISACWIS (child welfare data warehouse)

Data from 1/1/2011 to present are included in this dashboard. The data are refreshed each business day but only data from completed months are displayed.

1 For some metrics, you can select one or more counties using the County drop down menu

2 Change the date range of the data shown in the dashboard by clicking on either date label (e.g. " July 2018") to bring up a calendar. You can either select a date from the calendar or type in the date box. To include all data from a quarter, set the start date as the first day of the quarter: Jan, Apr, Jul, or Oct 1.
