

# Present Danger & Likely Impending Danger

## Summary of Access Case Review Results (2015-2021)

**Summary for Present Danger:** The review concluded that agencies' practices were generally consistent with Standards in identifying and documenting Present Danger at Access. Statewide, the percentage of Access reports that had identified Present Danger Threats consistent with Standards was 88% in 2015, 93% in 2017, 86% in 2018, and 84% in 2019, 89% in 2020 and 91% in 2021.

**Summary for Likely Impending Danger:** The review concluded that agencies' practices were generally consistent with Standards in identifying and documenting likely Impending Danger at Access. Statewide, the percentage of Access reports that had identified likely Impending Danger consistent with Standards was 81% in 2015, 85% in 2017, 86% in 2018, 87% in 2019, 92% in 2020 and 91% in 2021.

**Present Danger:**  
An immediate, significant and clearly observable family condition that is actively occurring or 'in process' of occurring at the time of the receipt of the report and will likely result in severe harm to a child.

**Likely Impending Danger:**  
A foreseeable state of danger in which family behaviors, attitudes, motives, emotions, and/or situations pose a threat, which may not be currently active, but can be anticipated to have severe effects on a child at any time in the near future.
