Videos for Wisconsin Child Care Providers to Borrow:

INFANTS, TODDLERS, AND TWOS

This list is divided into the following sections: general topics; Program for Infant/Toddler Care; Magda Gerber and Emmi Pikler; Sudden Infant Death Syndrome Risk Reduction; Abuse Prevention.

Go to www.ccic.wi.gov and click on the tab Child Care Library for borrowing procedures and a searchable online catalog of all CCIC's audiovisual resources and books.

ATTACHMENT RELATIONSHIPS: NURTURING HEALTHY BONDS. Chicago, IL: Learning Seed, 2010. DVD, 29 min.

Attentive, responsive, and loving care given by a baby’s primary caregiver sets the foundation for a child’s capacity to form and maintain healthy relationships throughout life. This video focuses on a baby’s phases of attachment from birth to age two, the attachment theories of John Bowlby and Mary Ainsworth, and how parents and caregivers can foster healthy attachment relationships.

Originally released as a motion picture in 2010, this video follows four babies from different parts of the globe as they navigate their first year of life. It features Ponijao from Namibia, Bayarjargal from Mongolia, Hattie who lives in San Francisco, and Mari from Tokyo. Includes a bonus feature about the babies three years later.

This curriculum’s goal is to enhance the relationship between caregivers and children by strengthening attachment, attunement, and social play. Toddlers re-experience with their baby dolls at circle time the same rituals and connections they have experienced one-on-one with their caregiver. This helps children develop healthy templates for relationships, sense of self and self-regulation for the rest of their lives.

BEGINNINGS OF LIFE: HEREDITY & ENVIRONMENT. Chicago, IL: Learning Seed, 2011. DVD, 38 min.

Explains how genes determine the traits of an individual. Discusses how environmental factors can affect a child’s health later in life.
BEGINNINGS OF LIFE: NEWBORN DEVELOPMENT. Chicago, IL: Learning Seed, 2011. DVD, 42 min.

Shows the physical, cognitive, and social changes that newborns experience in early infancy. Explains the crucial role of sleep and nutrition in fostering development and offers guidelines for parents to care for their baby.

Explains bloodborne pathogens and safety procedures to use with infants and toddlers. Covers: Hepatitis B, Hepatitis C and HIV, transmission, housekeeping, exposure control, personal protective equipment.

Offers practical ideas and insights from early care and education professionals who have spent years working with directors, teachers, young children, and their families. Interlaced with real-life classroom video, they provide a platform for staff development and training sessions. Contents: What do babies need from caregivers? -- Creating safe environments that meet evolving needs -- Learning to communicate with infants -- The importance of relationships -- What are the qualities that make an exceptional infant teacher? -- How do you know when an infant/toddler classroom is working? -- How do ratios and group sizes affect the quality of infant care? -- What does curriculum mean for infant care?

How does an infant change and grow in the first 365 days of life? An all-infant cast demonstrates the developmental milestones of the first year and helps us understand how infants develop cognitively, physically, and socially. Suitable for self-study, orientation, and staff development.

Explores the fascinating process of brain development during the first 15 months of life and shows how to stimulate this process in order to help "build a better brain."

Eating, napping, playing, exploring objects and people, all infants and toddlers do these things but have varying personal routines from day to day. When caregivers provide consistent but flexible daily schedules and caregiving support, they let children know their needs are met, freeing the children to investigate their world. Contents: Organizing the day around daily events and caregiving routines -- Planning the daily schedule -- Scenes for discussion and reflection, infant and older-infant day, toddler day.

Dr. T. Berry Brazelton, America's foremost pediatrician, shows parents that setting limits is not punishment, but a loving way to teach a child how to control his or her own behavior. He includes many ideas for gently and firmly setting limits for children from birth through three years old.

New parents learn how to help their infants reach their full potential. The video includes information on bonding and attachment, communication, health and nutrition, discipline, self-esteem, child care, and self-awareness, all considered in the light of new research in brain development.

Presents the essential components of high-quality infant care in a child care program. Experienced teachers in a NAEYC-accredited center intentionally and in many ways build trust with babies and parents, support independence, and individualize care while also meeting the diverse needs of the group.

Noted pediatrician and child development expert Dr. Harvey Karp demonstrates what he calls the five S’s, techniques for calming crying newborn babies: swaddling, side or stomach position, shushing, swinging, and sucking. The techniques used independently or together help simulate the conditions in the womb. DVD bonus features include calming sounds that can be played all night long.

Dr. Harvey Karp teaches parents how to cope with their toddlers. Includes tips on how to calm outbursts, stop most tantrums before they start, and build a loving and respectful relationship with children.

This video focuses on stages of development from birth through 15 months, individual temperament and style, shaping the environment and using routines to support the exploration essential for learning in infancy.

**INFANT MILESTONES.** Chicago, IL: Learning Seed, 2011. DVD, 30 min.

Follows an infant’s rapid physical development in the first year of life. Shows how a baby’s brain develops and how infants fit into the sensorimotor stage of cognitive development. Gives parents and caregivers ways to foster the social and emotional growth and development of young children.

**INFANTS.** Chicago, IL: Learning Seed, 2010. 3 DVDs + teaching guides.

**Disc 1. INFANTS: PHYSICAL DEVELOPMENT** (30 min.)

The importance of proper nutrition and sleep in the first year. How infants rely on their innate reflexes. How gross and fine motor skills emerge in typically developing children as well as those with challenging conditions.

**Disc 2. INFANTS: COGNITIVE DEVELOPMENT** (28 min.)
Infant intelligence, information processing, and memory. The progression of infant communication from crying to giggling to babbling and their first words. How language is learned and how caregivers can use infant-directed speech to foster cognitive development.

Disc 3. INFANTS: SOCIAL & EMOTIONAL DEVELOPMENT (23 min.)

The different stages of emotional development. How infants form attachments with people. How personality and temperament affect an infant’s social and emotional growth. How caregivers handle various situations.

A developmental pediatrician assesses the development of a two-week-old baby and explains what he looks for. The video also covers developmental milestones in physical growth, personal and social skills, large and small motor skills, and language acquisition in the first two years of life.

Provides strategies caregivers can use to respond sensitively and positively to children’s social conflicts. Includes strategies for problem prevention, positive limit setting, and resolving conflicts to help children begin to develop important social, language, and reasoning abilities.

Throughout the toddler period, the brain continues to develop at an astonishing rate, and this video shows much that we can do to promote optimal development.

30 video vignettes show parents and children -- aged birth to 3 years -- interacting during playtime and everyday routines. We see how learning unfolds through loving interactions with parents and caregivers, and the critical role that adults play in supporting children’s healthy development.

25 video vignettes show teachers, caregivers, and children -- from birth to 5 years old -- involved in daily interactions in child care settings in which the children participate in activities to develop school readiness skills such as language and other skills.

Follows a group of one-year-olds as they reach new developmental milestones. The children’s daily routines bring many new experiences, including separation anxiety and social situations. Previously released in 2006 as part of the study Life at 1, 3 and 5: A Longitudinal Study in Child Development.

A poignant exploration of the causes and effects of chronic stress in a group of one-year-olds. Shows how the children’s cortisol levels vary with the stress they experience at specific times in their daily
routines. Previously released in 2006 as part of the study *Life at 1, 3 and 5: A Longitudinal Study in Child Development*.

**NEW PERSPECTIVES ON INFANT/TODDLER LEARNING, DEVELOPMENT, AND CARE.** Sacramento, CA: California Dept. of Education, 2006. 3 DVDs, 2 hrs each + 164-page guide with facilitator and participant handouts.

In this innovative training series, broadcast in 2005, nationally known experts discuss infants and toddlers using video clips that clearly demonstrate the concepts being presented.

**Session 1: It's People Who Create High-Quality Infant Toddler Care**

All of the people involved—family members, children, teachers, and program leaders—have essential gifts to contribute to a high quality program.

**Session 2: The Emotional Foundations of Learning; the Curriculum Planning Process**

Looks into the underlying relationship between emotions and intellect, and how relationships create an essential foundation for learning. Walks through the process of planning curriculum for infants and toddlers in groups, giving special emphasis to documentation.

**Session 3: The Active Role of the Teacher and the Environment in the Daily Curriculum**

The teacher and the environment play active roles in the daily curriculum in group care for infants and toddlers. Covers how both the teacher and the environment support infant/toddler learning and development.

The many ways being outdoors fascinates young children and helps their physical, cognitive and emotional development.

**Disc 1. BABIES OUTDOORS: PLAY, LEARNING & DEVELOPMENT.** (53 min. + 58 pages.)

The outdoors is as valuable for babies as it is for older children. The close adult can bring the outside world alive for them and help them enjoy the many brain- and sense-building opportunities the outdoors provides.

**Disc 2. TODDLERS OUTDOORS: PLAY, LEARNING & DEVELOPMENT.** (65 min. + 47 pages.)

Toddlers thrive outdoors as they move, explore, and develop brain and body inseparably with the vital help of adults.

**Disc 3. TWO YEAR OLDS OUTDOORS: PLAY, LEARNING & DEVELOPMENT.** (63 min. + 60 pages.)

Two-year-olds’ outdoor interactions -- with the environment, natural materials, other children, and adults -- promote deep learning and shape their language, imagination, social skills, and holistic development.

Designed to give caregivers and teachers the knowledge and skills necessary to provide critical first aid to children.

READING WITH BABIES = LEYENDO CON BÉBÉS. New York: Read To Me Program, 2005. DVD, 18 min. + program note sheet. Narration in English and Spanish.

Reading with babies is very important in developing their language skills and imagination. Viewers can see the shared fun, communication, and connection in these fifty examples of babies under two years of age being read to by a parent.

Tips for new parents in helping their infants, toddlers and preschoolers reach their full learning potential.

Self-paced learning packages reflect the current practice at Lady Gowrie Child Centre in Adelaide, Australia.

Disc 1. PRIMARY CAREGIVING: WORKING TOWARD SECURE ATTACHMENTS IN CHILDCARE (19 min.)

Shows the benefits of primary caregiving for the children, families and child care professionals.

Disc 2. SECURE ATTACHMENTS: THE FOUNDATION OF RELATIONSHIPS IN CHILDCARE PROGRAMS (20 min.)

Provides an understanding of attachment and how child care professionals support the development of secure attachment relationships for children birth to three years in child care centers.

Disc 3. PARENT PARTNERSHIPS: PARENTS AND CAREGIVERS TOGETHER (26 min.)

Discusses the importance of a quality caregiver and parent relationship. Describes and demonstrates the components of a relationship and the challenges and methods of communications for a caregiver.

Disc 4. PLAY THAT'S REAL: FOSTERING A SENSE OF IDENTITY IN TODDLER PROGRAMS (35 min.)

Discusses how caregivers can promote play that is authentic for toddlers, through building on everyday experiences and routines.

Provides helpful information about: car seats and car safety, feeding and food safety, crib safety, diaper changing and bath time, choking prevention and first aid for choking, childproofing your home, toy safety, kitchen safety, safety outside the home, kids and gun safety.

Babies have control over their hands long before they can speak, so when they are about eight months old you can start teaching them a few simple signs which will make a big difference in their ability to communicate with you. This complete learning kit provides practical advice, illustrations and demonstrations by both babies and adults of the most effective signs to use with your baby.

SOCIAL AND EMOTIONAL DEVELOPMENT OF INFANTS AND TODDLERS. Anderson, IN: Covenant Productions, 2001. Distributed by NAEYC. 3 DVDs, approx. 21 min.

Series based on the research of From Neurons to Neighborhoods: The Science of Early Childhood Development.

Disc 1. ACQUERING SELF-REGULATION
Challenges children face as they make the transition from external regulation to self-regulation.

Disc 2. COMMUNICATING & LEARNING
Ways in which children begin to acquire the capabilities that support communication and future learning.

Disc 3. MAKING FRIENDS AND GETTING ALONG WITH PEERS
Ways in which learning to form relationships has a significant impact on young children, their sense of self-worth, and their ability to learn.

The most dramatic changes in any person's life occur within the first year. This program describes developmental milestones in a child's first 15 months of life. It looks at the importance of communication, as well as how to recognize cognitive and motor development.

TEN THINGS EVERY CHILD NEEDS. Chicago: WTTW Chicago, 1997. DVD, 60 min.

Shows how brain development in children up to age three is influenced by such things as interaction, touch, stable relationships, safe environments, self-esteem, quality child care, play, communication, music, and reading.

This video attempts to remove the bad rap toddlers often get and replace it with delight, respect and appreciation. It offers a realistic look at typical toddler behavior in group settings, explained from a toddler's point of view. Excellent way to remind yourself why toddlers do what they do and see some recommended caregiving interactions.

TODDLER BEHAVIOR & DEVELOPMENT. Beaverton, OR: Educational Productions, 2004. 2 DVDs, 30-min. + discussion guides.
A collection of 3 to 5 minute, unnarrated video clips featuring toddlers ages 18 to 36 months. Clips were carefully edited for clarity and interest, making them useful in workshops, classes, home visits.

Disc 1. AT HOME WITH PARENTS

Eight video clips featuring typical toddler behavior and responses during daily routines and activities at home, interacting with parents, siblings, and friends.

Disc 2. IN CENTER AND FAMILY CARE SETTINGS

Eight video clips featuring professionals supporting toddlers at all stages of development in family child care, Early Head Start, and child care center settings.

Examines how children ages 12 to 36 months develop and learn. Shows how developmentally appropriate curriculum in the toddler classroom helps children develop newfound skills and become less dependent on adults.

TODDLERS. Chicago, IL: Learning Seed, 2011. DVD, 36 min. + teaching guide.

Toddlers are constantly busy learning new skills as their bodies grow and become more coordinated. They begin to communicate and connect with others as well as manage their feelings. This program looks at each aspect of a toddler’s development including physical, cognitive, social and emotional milestones. Includes concepts from developmental theorists, pertinent statistics, and practical suggestions for caregivers.

TODDLERS. Chicago, IL: Learning Seed, 2009. 3 DVDs + teaching guides.

Disc 1. TODDLERS: PHYSICAL DEVELOPMENT (29 min.)

One- and two-year-olds begin to develop fine and gross motor skills and grow rapidly when provided good nutrition and the proper amount of sleep.

Disc 2. TODDLERS: COGNITIVE DEVELOPMENT (26 min.)

One- and two-year-olds develop symbolic thinking and pretend play. They develop memory and information processing through the use of repetition. Toddlers also begin to speak words and even create short sentences.

Disc 3. TODDLERS: SOCIAL & EMOTIONAL DEVELOPMENT (24 min.)

Toddlers are skilled at expressing their emotions. They come to understand how their actions can affect others. They develop attachments and social bonds through their interactions. Gender and temperament play an important role.

ITERS-R is designed to assess programs for children from birth to 30 months of age. The scale consists of 39 items organized into seven subscales: space and furnishings, personal care routines, listening and
talking, activities, interaction, program structure, and parents and staff. The video contains short scenes for scoring practice and the Video Guide provides the print materials necessary for the training. They may be used either for self-instruction or with an instructor.

Wonderful PowerPoint slides on CD-ROM show program environments that help infants and toddlers feel cozy and at home, connected with others and the outside world, invited to explore and act, and surrounded by meaningful literacy.

Follows one baby’s actions and family interactions from birth to 12 months, concentrating on physical, social, emotional, and cognitive development. Commentary explains what’s behind seemingly simple, everyday events as the baby’s brain develops.

Phylicia Rashad shares expert advice on how parents can help their children establish healthy habits. She gives information on how to maintain good health during pregnancy, bottle-feeding versus breast-feeding, when a child should visit the doctor, what foods to feed a child and when, and the importance of exercise.

PROGRAM FOR INFANT/TODDLER CARE

THE PROGRAM FOR INFANT/TODDLER CARE. Produced by the California State Dept. of Education and the Center for Child & Family Studies, Far West Laboratory for Educational Research & Development. Sacramento, CA: CA State Dept. of Education. CCIC has the following videos from this highly recommended series:

AGES OF INFANCY: CARING FOR YOUNG, MOBILE & OLDER INFANTS. 1990. DVD, 26 min. + booklet.

Shows how the developmental issues of security, exploration, and identity are present throughout infancy but change in prominence as the child grows from young to mobile to older infant. Demonstrates specific things caregivers can do to adapt care to the child’s stage of development and support infants as they grow from birth to 36 months.

Infants and toddlers learn by making six big discoveries: learning schemes, cause and effect, use of tools, object permanence, understanding space, and imitation. This video helps us appreciate the complexity of cognitive development and suggests specific ways caregivers can help infants and toddlers learn.

EARLY MESSAGES: FACILITATING LANGUAGE DEVELOPMENT AND COMMUNICATION. 1998. DVD, 28 min. + booklet.
Covers the development of communication and language during the young, mobile, and older periods of infancy. Shows the role caregivers play in fostering early communication including turn-taking, self-talk and parallel talk, simplified speech and gestures, and imitation of infants' signals.

**ESSENTIAL CONNECTIONS: TEN KEYS TO CULTURALLY SENSITIVE CHILD CARE.** 1992. DVD, 36 min. + booklet.

Because children from birth to three are in the initial stages of forming a sense of self, they are particularly hurt by negative messages about their cultural identity. These ten recommendations about program structure and interpersonal give-and-take will help you strengthen children's connections with their families and their home culture.

**ESSENTIAL CONNECTIONS TALKING POINTS.** 1998. DVD, 74 min. + booklet.

Supplementary video clips to help trainers structure group discussion of key topics in the video Essential Connections: Ten Keys to Culturally Sensitive Child Care. In the clips, Carol Brunson Phillips, Lily Wong Fillmore, and Louise Derman-Sparks broaden our point of view on many provocative and controversial topics, and caregivers do four role plays in which parents and providers from different cultures discuss specific disagreements about children's care.

**FIRST MOVES: WELCOMING A CHILD TO A NEW CAREGIVING SETTING.** 1986. DVD, 27 min. + booklet.

Illustrates some practical steps you, as a professional caregiver, can take in introducing a child to a new setting and making those sometimes wrenching separations go a lot easier for everyone.

**FLEXIBLE, FEARFUL, OR FEISTY: THE DIFFERENT TEMPERAMENTS OF INFANTS AND TODDLERS.** 1990. DVD, 29 min. + booklet.

Explains nine temperamental traits: activity level, biological rhythms, approach/withdrawal, mood, intensity of reaction, sensitivity, adaptability, distractibility, and persistence. Children from birth tend to have one of three combinations of these traits and thus be either flexible, fearful, or feisty. Video explains these three temperamental types and suggests caregiving techniques that are especially helpful to each type of child.

**GETTING IN TUNE: CREATING NURTURING RELATIONSHIPS WITH INFANTS & TODDLERS.** 1988. DVD, 24 min. + booklet.

As a caregiver and an infant get in tune with each other, they develop a deep understanding and become close—and this closeness is the foundation of healthy emotional growth in infants and toddlers. The video shows how in-tune caregivers respect the child, let the child set the pace, recognize the child's feelings, receive from the child rather than taking, and offer choices rather than imposing them on the child. Video presents four specific ways to get in tune.

**IN OUR HANDS.** 1997. DVD, 14 min. + booklet.

This video urges us to provide better care for infants by meeting their four fundamental needs: close, caring relationships; health and safety; connection to family; and knowledgeable, responsive caregivers. States that, at present, these needs are being met in fewer than ten percent of infant/toddler programs in the United States.

Three sections cover the basics of feeding, diapering, and napping in detail. Each section shows the two sides of routines: 1) following the proper steps and 2) giving caring attention to the child’s experience so as to take advantage of opportunities for positive learning and interaction. Includes an explanation of universal precautions and when and how to use gloves in diapering. The producers recommend that after each section is viewed, caregivers discuss what they have seen and add to the ideas and recommendations offered in the video.

Engaging scenes illustrate infants’ and toddlers’ inborn drive to acquire social, cognitive, physical, and language mastery. Shows how caregivers can support infant learning by providing close, responsive care, opportunities to learn, environments and interactions adapted to children’s needs, and uninterrupted time to explore.

This video shows how caregivers can come to better understand the normal behaviors of parents of infants in care, including highly emotional behavior and conflicting feelings about caregiver/child relationships. The video first focuses on how caregivers can help parents with their fears and concerns and then suggests how caregivers can deal with their own feelings.

PROTECTIVE URGES TALKING POINTS. 1998. DVD, 33 min. + booklet.

Supplementary video clips to help trainers structure group discussion with caregivers about the video Protective Urges: Working with the Feelings of Parents and Caregivers. Dr. Alicia Lieberman points out that parents who were not taken care of as children violate the expectations of those of us who were taken care of and call up feelings of visceral rage. Three caregivers discuss various situations and feelings with Dr. Lieberman in order to further understand and resolve difficult parent/caregiver relationships.

RESPECTFULLY YOURS: MAGDA GERBER’S APPROACH TO PROFESSIONAL INFANT/TODDLER CARE. 1987. DVD, 58 min. + booklet.

Magda Gerber, nationally recognized leader in infant care, explains her philosophy of care based on respecting infants, her approach to observing infants and toddlers, and her concerns about infant equipment. The video is divided into three 16- to 19-minute segments, so trainers can select any of the three parts to show and discuss during a training session.

Shows that the child care environment has a powerful influence on infants and toddlers and tells about eight qualities to consider when setting up care for infants and toddlers. The four more permanent qualities are safety, health, comfort, and convenience. Caregiving environments should also accommodate child size, maximize flexibility, encourage movement, and allow for choice.

TOGETHER IN CARE: MEETING THE INTIMACY NEEDS OF INFANTS AND TODDLERS IN GROUPS. 1991. DVD, 30 min. + booklet.

This video recommends three crucial policies that help infant/toddler programs meet the intimacy needs of children: the assignment of a primary caregiver to each child, the use of small groups, and keeping caregivers and children together over time.
MAGDA GERBER AND EMMI PIKLER

This film documents a long-term study by Dr Mária Vincze, in which she observes a group of children living together from age three months to age two-and-a-half years in the secure and trusting environment of the Emmi Pikler Institute in Budapest. The children play in their familiar surroundings without any interference or alteration in the course of their daily activities. The viewer is drawn into a dynamic search for understanding that results in constructive insights for being with children.

This video is about the rich variations of movement and position of infants who are allowed to move freely on their own and about the role these movements and positions play in their everyday life.

As several infants freely explore a playroom, Magda Gerber demonstrates when NOT to interfere with their choices and solutions. She also uses a case of biting to teach gentleness to an infant by being gentle herself.

Magda Gerber, nationally recognized leader in infant care, explains her philosophy of care based on respecting infants, her approach to observing infants and toddlers, and her concerns about infant equipment. The video is divided into three 16- to 19-minute segments, so trainers can select any of the three parts to show and discuss during a training session.

Shows how infants and toddlers from 5 weeks to 20 months naturally develop gross motor skills. Urges adults to step back and observe, respect and enjoy the natural development of every baby.

Educator Magda Gerber presents her philosophy on infant care. She points out that it is in the first two years of life that we develop our patterns of learning, living and loving ... and that therefore it is very important that those who deal with infants respect them.
SUDDEN INFANT DEATH SYNDROME RISK REDUCTION

SAFE SLEEP FOR YOUR BABY: REDUCE THE RISK OF SUDDEN INFANT DEATH SYNDROME (SIDS) AND OTHER SLEEP-RELATED CAUSES OF INFANT DEATH. Bethesda, MD: Eunice Kennedy Shriver National Institute of Child Health and Human Development, 2012. DVD, 10 min. May be viewed on the Safe to Sleep website: https://safetosleep.nichd.nih.gov/resources/caregivers/videos

Parents in a park talk about ways to reduce the risks of SIDS.

Note: CCIC recommends these free online trainings:

Sleep Baby Safe. Children’s Health Alliance of Wisconsin. 3 10-minute training modules and a 90-minute PowerPoint about child care professionals guiding conversations with families to ensure their babies thrive. https://www.chawisconsin.org/initiatives/injury-prevention-death-review/sleep-baby-safe/

ABUSE PREVENTION

This online training meets Wisconsin’s requirement that child care providers and preschool teachers, before they work with children under age 5, receive training on Abusive Head Trauma prevention, including Shaken Baby Syndrome prevention, and how to manage crying, fussing, or distraught children.

Text read by a child of an adult’s best guess at what the prenate, baby, or toddler sees, feels, and concludes about domestic violence.

A sentinel injury is a fairly minor abusive injury that occurs before a baby is mobile and prior to a more serious physical injury. Detection of sentinel injuries with appropriate interventions can prevent many cases of abuse. This module helps child care workers, child welfare workers, family support staff, and home visitors identify these warning signs and respond effectively if they suspect abuse.

A nationally recognized child abuse specialist addresses the injuries that can occur if a baby or young child is violently shaken by a parent or caregiver who reacts in anger and frustration to the infant's inconsolable crying. She also gives insight into the prevention of this serious form of child abuse.

04/2021

The Wisconsin Child Care Information Center is part of the Division of Early Care and Education, Wisconsin Department of Children and Families.
