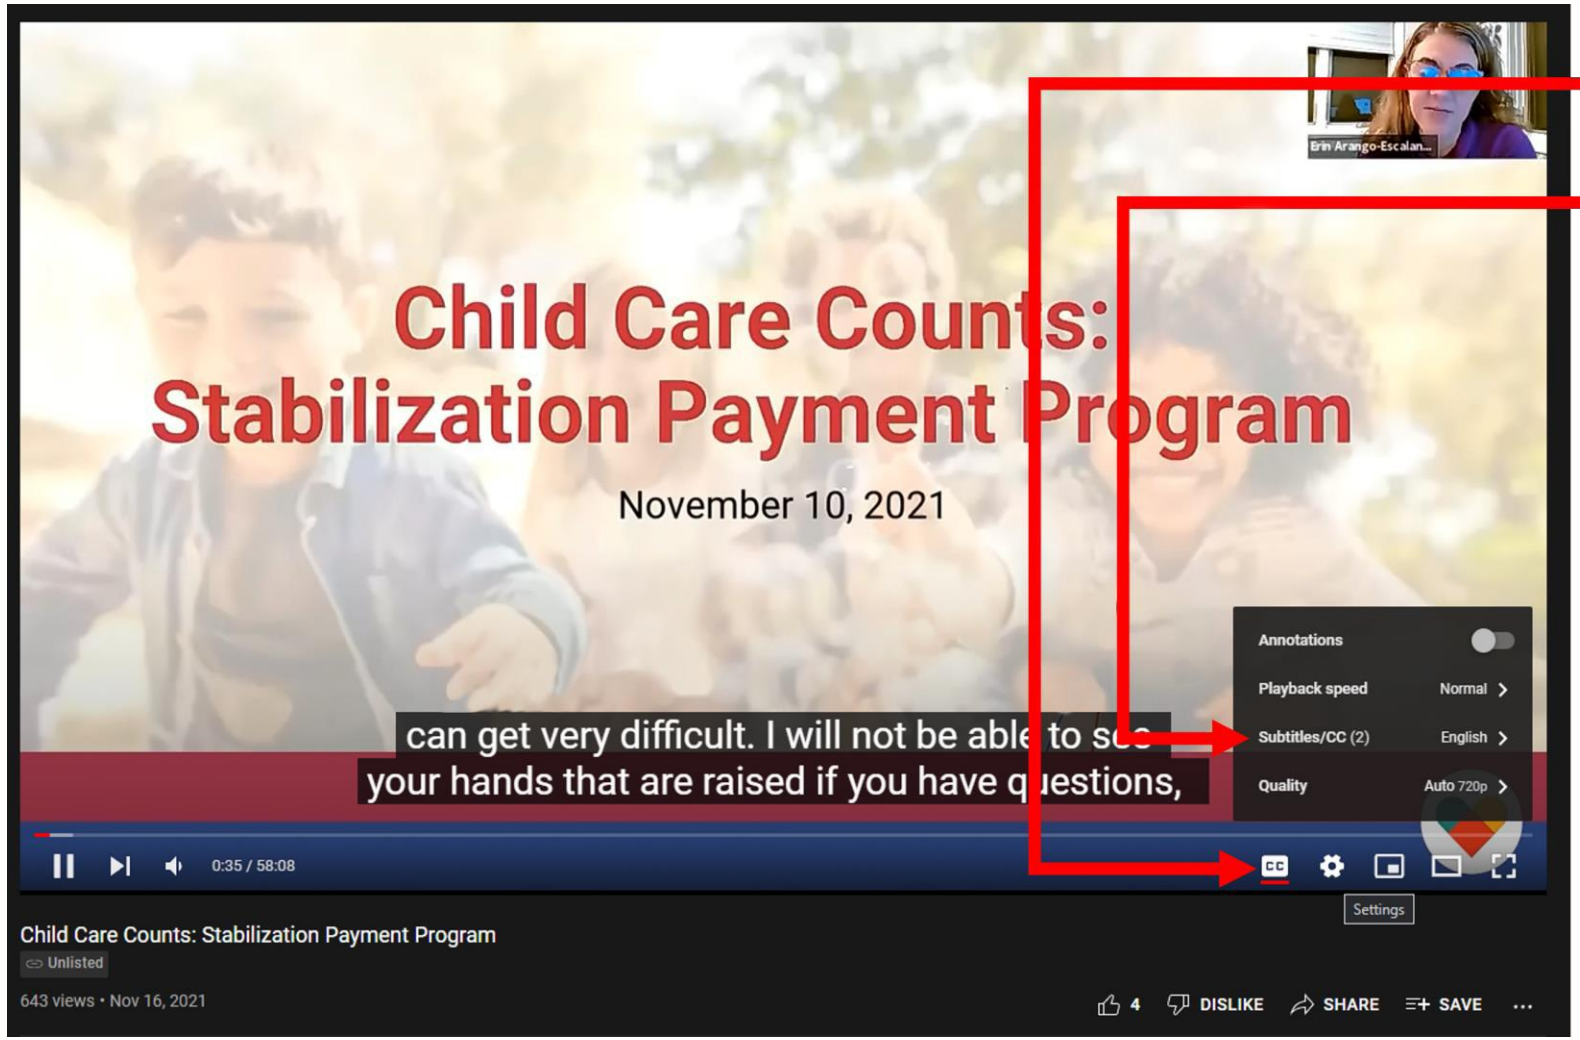
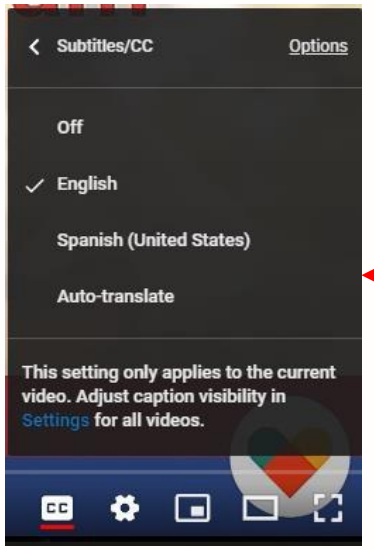
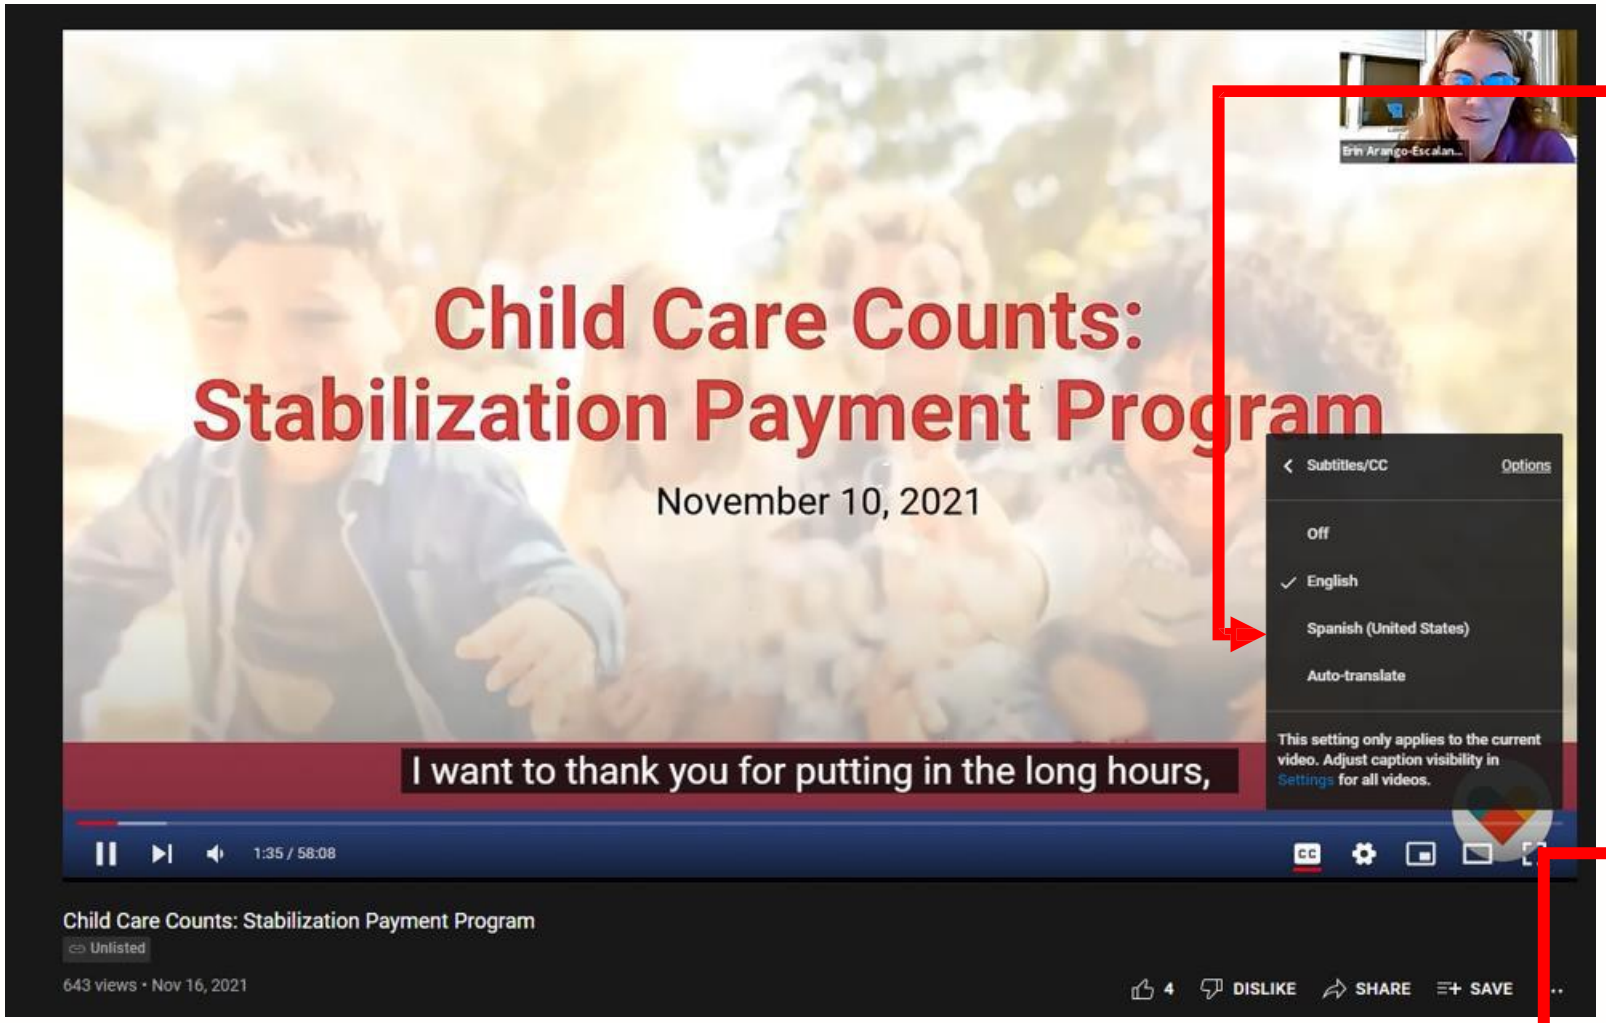
Learn how to change video Closed Captions from English to Spanish

Wisconsin Department of Children and Families

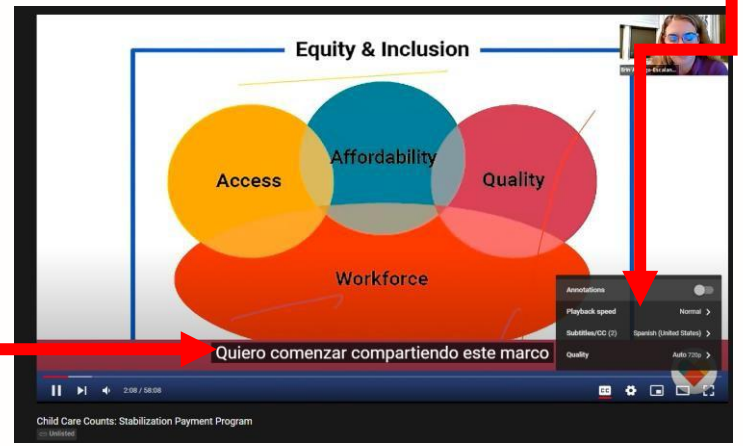


1. Enable closed captions by clicking the closed captions icon.
2. Note that the list that pops up says **Subtitles/CC (2),** meaning that there are Closed Captions for two languages.
3. The current language is English, but you can change it to Spanish in the fly-up menu.





- Choose Spanish (United States) from the list.
- You will now see that the **Subtitle/CC (2)** says **Spanish (United States).**



- The closed captions have changed from English to Spanish, though the voice track is still in English.
