

## 90-Day Summary Report for Child Death, Serious Injury or Egregious Incident

Case Tracking Number: 100520DSP-PN-22 Agency: Marathon Co. Dept. of Social Services

Child Information: Age: 2 weeks Gender:  Female  Male  
Race or Ethnicity: Asian  
Special needs: None

Child's Residence:  In-home  Out-of-home care placement

Date of Incident: 5/20/10

### Description of the incident, including the suspected cause of death, injury or egregious abuse or neglect:

The baby was taken to the hospital emergency room with a head injury. He was airlifted to Children's Hospital due to the severity of his injuries; i.e., closed head injury with skull fracture and an acute intracranial hemorrhage. The parent gave several different explanations as to how the child sustained the injury, including that the child was propped on a pillow and somehow fell out of the crib onto the floor. Medical opinion is that the explanation provided by the parents is medically inconsistent and highly suspicious of child abuse. Law enforcement investigated the incident, but no criminal charges were filed.

### Findings by agency, including material circumstances leading to incident:

The agency substantiated physical abuse to the child, identifying the maltreater as unknown, but identifying the relationship of the maltreater to the victim as "biological parent(s)." Medical opinion is that the two-week-old baby could not have rolled out of his crib as described.

**Description of all other persons residing in the OHC placement home:**

**Licensing history:** Including type of license, duration of license, summary of any violations by licensee or an employee of licensee that constitutes a substantial failure to protect and promote the welfare of the child.

**\* Summary of actions taken by agency in response to the incident:**

The agency screened in and investigated a report of alleged maltreatment, substantiating physical abuse to the baby by an unknown maltreater. A child in need of protection and services (CHIPS) court order was obtained and the child was placed with relatives. The agency collaborated with law enforcement during the agency's assessment and the criminal investigation. The agency implemented a safety plan where parents' visitation with the child at the hospital and upon returning to relatives is supervised. The family was referred to the Birth-to-Three program and other treatment services. Ongoing Services are being provided.

**\*Summary of policy or practice changes to address identified issues:**

eWiSACWIS needs an enhancement to correct a practice/data issue in cases where maltreatment is substantiated, and the maltreater is unknown. In this case, the system identified a maltreater relationship to the child victim for an "unknown maltreater," which should not be possible.

The Marathon Co. Dept. of Social Services must clearly demonstrate and document safety practice, including assessment of and goals to address parental protective capacities, into the case record. The agency is addressing this finding and is developing a process to enhance safety practice and documentation.

**\*Recommendations for further changes in policies, practices, rules or statutes needed to address identified issues:**

None
