Case Tracking Number: 120308DSP-Sauk-187 **Agency:** Sauk County Department of Human Services

Child Information (at time of incident)

Age: 12 days Gender: Female Male

Race or Ethnicity: African American/Caucasian

Special Needs: None

Date of Incident: March 8, 2012

Description of the incident, including the suspected cause of death, injury or egregious abuse or neglect:

The child was taken by ambulance to the hospital where she was pronounced deceased. Reportedly, the mother had placed the baby into bed with her and awoke to find her purple and unresponsive. The cause of death was initially ruled "accidental asphyxia associated with unsafe sleep environment (co-sleeping)". However, toxicology results concluded that the mother was legally intoxicated still at time of blood draw, in excess of 10 hours after the reported time she last drank, and was under the influence of a controlled substance (cocaine) on 03/08/2012. The initial 911 call on 03/08/2012 was made at 10:39 a.m., and the mother stated her last drink was 2:00 a.m., blood recovered at 12:40 p.m. toxicology report showed an ethanol result of 0.089g/100ml and also indicated a presence of cocaine.

Findings by agency, including maltreatment determination and material circumstances leading to incident:

The agency collaborated with law enforcement and medical personnel to complete the assessment. A first Initial Assessment completed by the agency cited a lack of available critical information at the conclusion of the assessment, and therefore the allegation of neglect was unsubstantiated. At that time, the agency was unable to determine if the death was accidental or if it was due to negligent actions by the mother. Toxicology reports on the mother came back shortly after the first Initial Assessment was completed, and a subsequent CPS report was screened-in and assessed. The second Initial Assessment completed by the agency found a preponderance of evidence to substantiate neglect to the child and her three siblings by the mother. The three siblings of the child were found to be safe in the care of the mother, however an Informal Disposition Agreement was signed by the mother and the case was open for on-going services.

The subsequent Initial Assessment completed by the agency found a preponderance of evidence to substantiate neglect to the child and her siblings by the mother.
