### Description of the incident, including the suspected cause of death, injury or egregious abuse or neglect:

On April 22, 2012, the agency received a report alleging physical abuse to the children by the biological parents. One of the 3-month-old infants was taken for medical treatment where it was discovered she had three fractures to her left femur which were indicative of abuse. The father reported he had fallen down the stairs while holding the infant the previous afternoon, but she had not appeared to be injured at the time of the fall. The mother reported that she had noticed the infant seemed to be in pain that evening, but attributed it to her recent immunizations and did not seek medical treatment for her until the next day. Due to the nature of her injuries, the other children were also examined. One of the infants was found to have a fractured left ankle. The other infant was found to have a right knee fracture, as well as left knee and left ankle fractures. The parents did not have explanations for the injuries to these children. The 1-year-old was found to be free from injuries. A 10-year-old half-brother also lived in the home and was not injured. Due to the injuries to the girls, both parents were arrested by law enforcement. The father later admitted to causing the injuries and the mother was released from custody. The father has been criminally charged with Child Abuse – Intentionally Cause Great Bodily Harm (3 counts) and Neglecting a Child -Consequence is Bodily Harm (3 counts). A criminal charge is merely an allegation and a defendant is presumed innocent until and unless proven guilty.

### Findings by agency, including maltreatment determination and material circumstances leading to incident:

The agency screened in and assessed the allegations of physical abuse by the biological parents to their 3-month-old triplet girls. The agency substantiated allegations of physical abuse and neglect by the father to each of the three girls. The medical examination showed that each girl had knee and/or ankle fractures which were indicative of abuse. The father admitted to intentionally causing these injuries by twisting the girls' legs when changing their diapers and then failed to seek medical attention for the girls. The agency unsubstantiated the allegation of physical abuse by the father to the 14-month-old boy, as the medical exam found the child to be free from injuries. The agency substantiated neglect by the mother to the 3-month-old girl, due to her failure to immediately seek medical assistance for her injured child. All five children were determined to be unsafe in the care of their parents and were placed in foster care.
