Date of Incident: 7/11/12

Description of the incident, including the suspected cause of death, injury or egregious abuse or neglect:

On 7/11/12, the agency received a report stating a 2-month-old infant had been declared dead by emergency medical staff after being discovered by her mother in the family home. The mother and infant were residing in the basement of the mother's maternal grandmother's home. The mother reported that during the night, she brought the infant into bed with her and fell asleep with the infant next to her. The mother woke up the next morning with her back to the infant and found the infant unresponsive. Law enforcement and emergency medical technicians were contacted and responded to the home. Law enforcement observed that the infant had blood on her mouth and the mother had a bloodstain on her shirt. The mother did admit to using a controlled substance without a prescription during the night and provided law enforcement with a sample of her blood. The results of the blood test are pending and the cause of death of the infant has not been determined. No criminal charges will be filed in this case.

Findings by agency, including maltreatment determination and material circumstances leading to incident:

The agency screened in and assessed an allegation of neglect to the infant by her mother. The agency collaborated with law enforcement to complete the assessment and substantiated neglect to the infant by her mother. The mother admitted to using a controlled substance without a prescription the night before while acting as the sole caregiver to the infant. Based on the description of events, it is believed that the mother rolled over in her sleep, laying on top of the infant, which resulted in the infant's death.

The mother has three other children who were previously placed under guardianship orders with relatives. There are no children in the mother's care and the agency has closed the case.
