Description of the incident, including the suspected cause of death, injury or egregious abuse or neglect:

On 10/17/12, the agency received a report regarding an eight week old infant who was brought into the emergency room with a head injury and bleeding to the brain. The infant was transported to the American Family Children's Hospital and was found to have a subdural hematoma, hemorrhaging in both eyes, one fracture to his right humerus, and two fractures to his left leg (femur and tibia). The fractures were described as buckle fractures, occurring from pressure, and appeared to be between ten to fourteen days old with the head trauma being more recent. Medical personnel believe the infant was injured on two to three occasions based on the injuries. The mother and her significant other were interviewed about the injuries to the infant. They both explained the child's injuries could have happened from an altercation they had a few days prior. They admitted to having an argument when the mother was wearing the infant in a front carrier for a portion of the altercation. They were attempting to hit each other during this time. The significant other admits throwing a cell phone at the mother and striking the infant in the back of the head. They could not explain how the fractures may have occurred. Medical personnel stated the subdural hematoma and the hemorrhaging of the eyes are not consistent with that explanation. No further explanations have been given by either caregiver. Medical personnel suspect the infant was shaken, as the injuries are consistent with that type of trauma. Both the mother and significant other have been criminally charged with Disorderly Conduct and Child Abuse-Recklessly Cause Great Harm and both were found guilty on 9/25/13.

Findings by agency, including maltreatment determination and material circumstances leading to incident:

The agency collaborated with law enforcement and medical personnel to complete the assessment. Physical abuse to the infant by the mother and her significant other was substantiated by the agency. Medical personnel believe the infant was injured on two to three occasions based on the injuries. Medical personnel also believe the injuries are consistent with being shaken. The mother and her significant other were the primary caregivers of the infant. The infant and three children of the significant other were determined to be unsafe. All four children were removed from the home and placed in foster care.
