Date of Incident: July 4, 2013

Description of the incident, including the suspected cause of death, injury or egregious abuse or neglect:

On July 4, 2013 the agency received a report regarding a one-month-old infant admitted to the hospital with suspicious injuries. The teenage mother of the infant stated the infant woke up crying in the early morning and again two hours later. At that time, she said the infant's eyes rolled back in his head and he was arching his back. The teenage mother informed her foster mother of her concerns for the infant, at which time they took him to the hospital. The infant was found to have serious injury to the head and soft tissue inflammation these injuries are highly concerning for non-accidental trauma. Medical professionals stated the infant's symptoms likely started the previous day could not determine when the infant sustained the injuries. Both the mother and the foster mother cared for the infant during that timeframe but were unable to explain how he was injured. Law enforcement continues to investigate and no criminal charges have been filed.

Findings by agency, including maltreatment determination and material circumstances leading to incident:

The agency collaborated with law enforcement and medical personnel to complete the assessment. The allegation of physical abuse to the infant by an unknown maltreater was substantiated. The infant's injuries were highly concerning for inflicted trauma; however, the agency was unable to establish a specific maltreater. The agency determined the infant unsafe and placed the infant in out-of-home care separately from the mother. The agency filed a Child in Need of Protection or Services petition on the infant in juvenile court. The case remains open and the agency continues to provide ongoing case management services to the family.
