Description of the incident, including the suspected cause of death, injury or egregious abuse or neglect:

On March 14, 2018, the agency received a report regarding a 6-week-old infant found unresponsive at home and brought to the hospital. Law enforcement was contacted and initiated a criminal investigation. Medical personnel were unable to conclusively determine if the infant's injuries were due to physical abuse. Medical personnel were able to determine that the infant's unresponsiveness was due to a bacterial infection. No criminal charges were filed and the case was closed.

Findings by agency, including maltreatment determination and material circumstances leading to incident:

The agency collaborated with law enforcement and medical personnel to complete the assessment. The Initial Assessment completed by the agency found insufficient evidence to substantiate neglect of the infant by the mother. Medical personnel were unable to conclusively determine if the infant's injuries were due to physical abuse. Medical personnel were able to determine that the infant's unresponsiveness was due to a bacterial infection. The agency initially determined the infant and the infant's siblings to be unsafe and initiated a Protective Plan. The agency subsequently determined the infant, his 6-week-old twin, and his 6-year-old brother were safe with their mother. The agency then discontinued the Protective Plan and closed the case upon completion of the Initial Assessment.
