Logging In

Access to the Geographic Placement Resource System (GPRS) is controlled through WAMS. You will need to use your eWiSACWIS userid and password to access GPRS.

You can access GPRS from within eWiSACWIS or directly from the internet.

To access GPRS from within eWiSACWIS

The GPRS application is listed in the “eWiSACWIS Messages and Links” section of the eWiSACWIS landing page. Click the link to go to the GPRS application.

To access GPRS from the Internet

You have the option of accessing GPRS directly from the internet by using the following url address:

https://apps.dcf.wisconsin.gov/gprs/DCF/eWiSACWIS_GPRS/

You will need to use your eWiSACWIS user id and password to gain access to GPRS.

Please Log In

NOTE: It is recommended that you access GPRS using the eWiSACWIS landing page. However, if you access GPRS external to eWiSACWIS, it is imperative that you follow these directions if you decide to save the url as a favorite. Once you have accessed the WAMS Login page, **DO NOT SAVE THIS URL ADDRESS AS A FAVORITE**. The wrong url address will be saved and you will get a weird message when you attempt to login again. You can save the url to your favorites once you have accessed GPRS itself. Another option is to cut and paste the link above to create your favorite for GPRS.

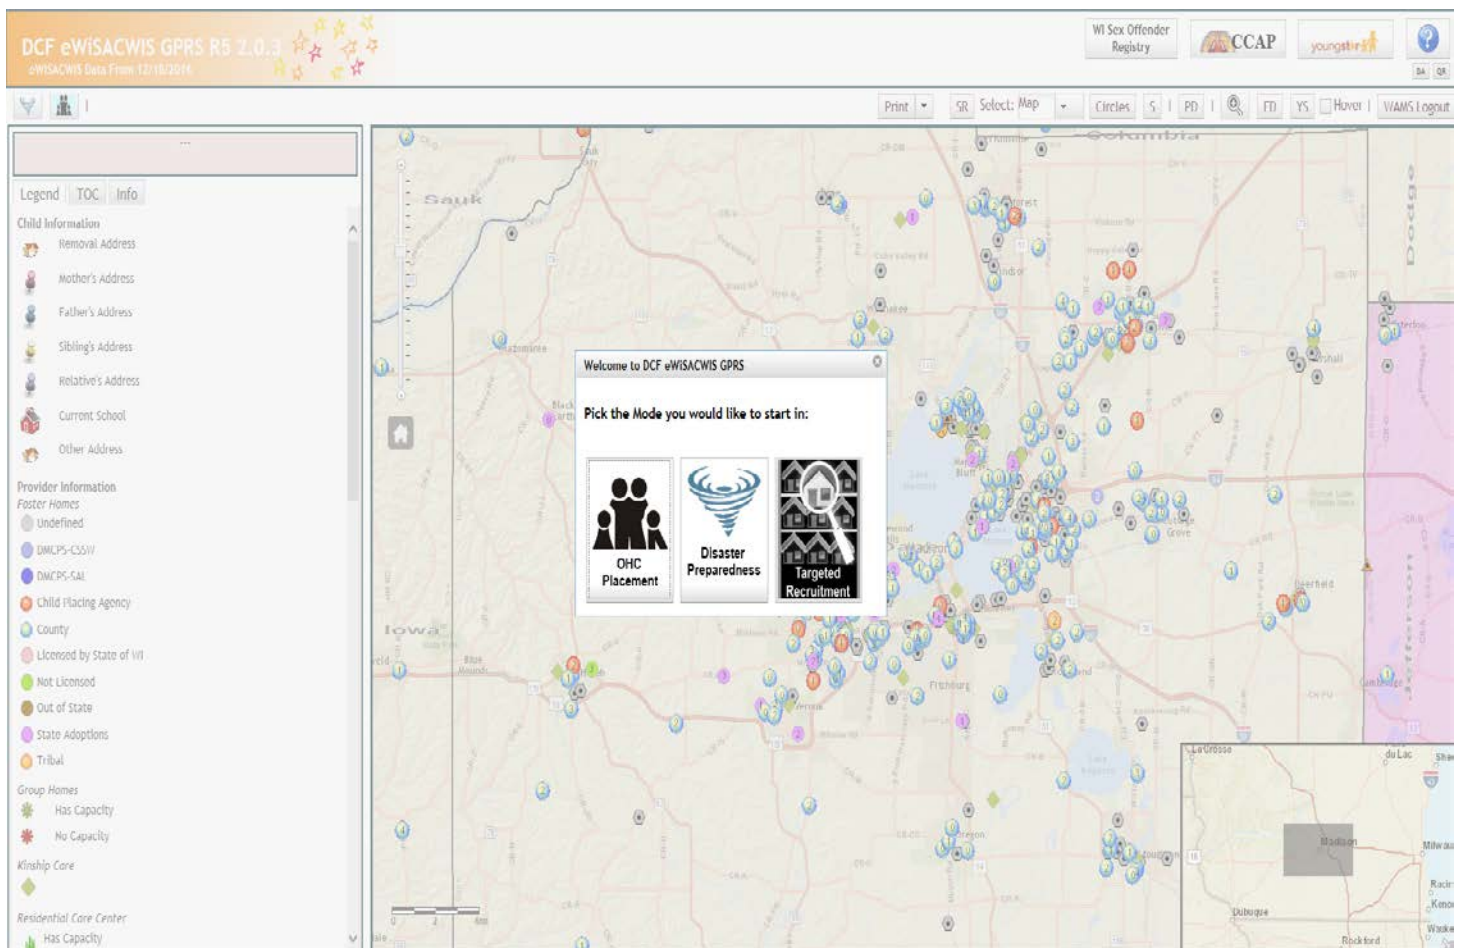

Selection of GPRS Mode

Once you have gained access to GPRS, you will need to select the mode you would like to launch. There are 3 possible choices:

Use **OHC Placement** when you are searching for the best possible placement options for a child. You will have the opportunity to visualize on a map the child's removal home, the child's parent's homes, the child's relatives and siblings homes, the child's school and all possible OHC provider locations.

Use **Disaster Preparedness** when a disaster strikes and you need to quickly locate OHC children and their providers to ensure their safety and to address their urgent needs such as emergency housing and medical needs. You will have the opportunity to visualize on a map the disaster zone and all providers located within the disaster zone.

Targeted Recruitment is currently not enabled. It will be implemented in the future.

Initial Map Extent

When you select the **OHC Placement** option, you will navigate to the GPRS **OHC Placement** Filter/Display Dialog page. You will be prompted for information that will be used to present the initial map. If you need to change any of the information you provide now, you will have the ability to do so later in the session.

You will need to select the **Initial Map Extent**.

County - GPRS will default the selection to "County". If you want to focus on a specific county, you will need to select that county from the dropdown list. All Wisconsin counties are listed.

Region - If you want to view the initial map from a DCF Region perspective, select "Region" and select the specific DCF region you want to focus on.

Municipality – If you want to focus on a specific city or village (Municipality), you will need to select that municipality from the "Municipality" dropdown list. All Wisconsin cities and villages are listed. Once that Municipality is submitted, GPRS will focus that specific Municipality.

State - If you select “State”, the initial map will focus on the entire state of Wisconsin. This is a useful option when you are attempting to identify foster children placed outside of Wisconsin.

NOTE: Please refer to the top of the GPRS page. Each page in GPRS contains information pertaining to the release of the system as well as the date that eWiSACWIS information was provided. GPRS will be updated with information from eWiSACWIS on a nightly basis, 5 times a week, Monday through Friday. Any changes made to eWiSACWIS will not be reflected in GPRS until the following morning.

Child

Once you have selected your **Initial Map Extent**, you have the option of indicating what child filtering and/or display criteria to use to present the initial map. As with the **Initial Map Extent** option, if you need to change any of the information you provide now, you will have the ability to do so later in the session.

When you click **Child**, GPRS will display child information, child filtering, and child display criteria for your selection.

Child Information

When selecting "Child", the filtering and display criteria will expand and you will have options for Child Filtering Criteria and Display Criteria. You will also have the option to search for one specific child. You will be able to search for a specific child using the following **Child Information**:

- Child's Last Name
- Child's eWISACWIS ID

If you search for a child using both their last name and eWISACWIS ID, GPRS will automatically default to searching for that child by last name only and will ignore the eWISACWIS ID.

If you search by the Child's Last Name, GPRS will search for all children in the system that have that last name and will expand the dropdown list to include all children with that last name. Within the dropdown list GPRS will display the child's first and last name, eWiSACWIS ID, and their date of birth. You will need to select the child you are searching for from that list.

If you have provided the Child's Last Name, GPRS will give you the option of providing the Child's First Name as well. If you provide the Child's First Name, GPRS will search the system for a child with the provided first and last name.

If you search by the Child's eWiSACWIS ID, GPRS will display that child's first name, last name, eWiSACWIS ID, and date of birth in the search fields.

If GPRS is unable to locate a child based on any of the three search criteria (first name, last name, or eWiSACWIS ID), you will receive the error message, "No children found."

Once a child is searched and GPRS finds the match, GPRS will prefill the following child filtering criteria: Child's age, gender, race, ethnicity, grade level and CANS. In addition, GPRS will prefill the following child display criteria: Child's removal address, mother / legal guardian address, father / legal guardian address, relative, and current school. If the address that GPRS is displaying is incorrect, you will be able to key-over that address and enter the correct address. If this change is a permanent change, you will need to update eWiSACWIS with this information as well. GPRS will never update eWiSACWIS directly with any updates.

You will then have the option to select which child filtering and child display criteria you would like to exhibit on the map.

Child Filtering Criteria

When you click **Child**, GPRS will display child filtering and display criteria for your selection.

You have the following options for **Child Filtering Criteria**:

- Child's Age
- Child's Gender
- Child's Level of Need
- Child's Race
- Child's Ethnicity
- Child's Grade Level
- CANS

If a specific child has been indicated, GPRS will pre-fill the Child Filtering Criteria and will highlight that information to indicate it has been pre-filled. You will be able to select the pre-filled criteria or select different criteria if needed.

Child's Age

If you click "Child's Age" you can select an age from 0 to 18 years old. GPRS will only display providers that will accept children of your selected age.

Child's Gender

If you click "Child's Gender" and select a gender, GPRS will only display providers that have capacity for the child's gender.

If you click “Child’s Level of Need”, you will need to select a specific level (1 through 6) and indicate how you want GPRS to match the Child’s Level of Need to the Provider’s Level of Care. Possible selections are:

- GPRS will only display providers that match your selection criteria.

Resulting Provider Characteristics (One or more of the following):

If you select "Child's CANS," the child's CANS items will be included as filtering criteria. For all children in eWiSACWIS, their CANS items will be included based on the following:

- Include CANS items that have scored one or greater. These will be highlighted.
- Include only the most recent approved CANS. If the child has a CANS entered in eWiSACWIS, but it is not yet approved, it will not be returned in GPRS as a filtering criteria.
- Include only CANS conducted within 1 year of the system date.

GPRS will only display providers that will accept children with the selected CANS items based on their provider characteristics. Please note:

- Not all CANS items are matched to a Provider Characteristic. For example, under the Trauma domain, Medical Trauma and Natural Disaster are not mapped to a Provider Characteristic.
- A Provider Characteristic can match to 1 or more CANS items.
- If you select CANS as a filtering criteria, you will be unable to select "Provider Characteristic" as a display criteria.
- If you select the "Child's CANS" as a filtering criteria but do not select any specific domains, GPRS will assume that ALL highlighted domains should be used as a filtering criteria.

- If you select a specific domain as a filtering criteria but do not select any specific CANS items, GPRS will assume that ALL highlighted CANS items should be used as a filtering criteria.

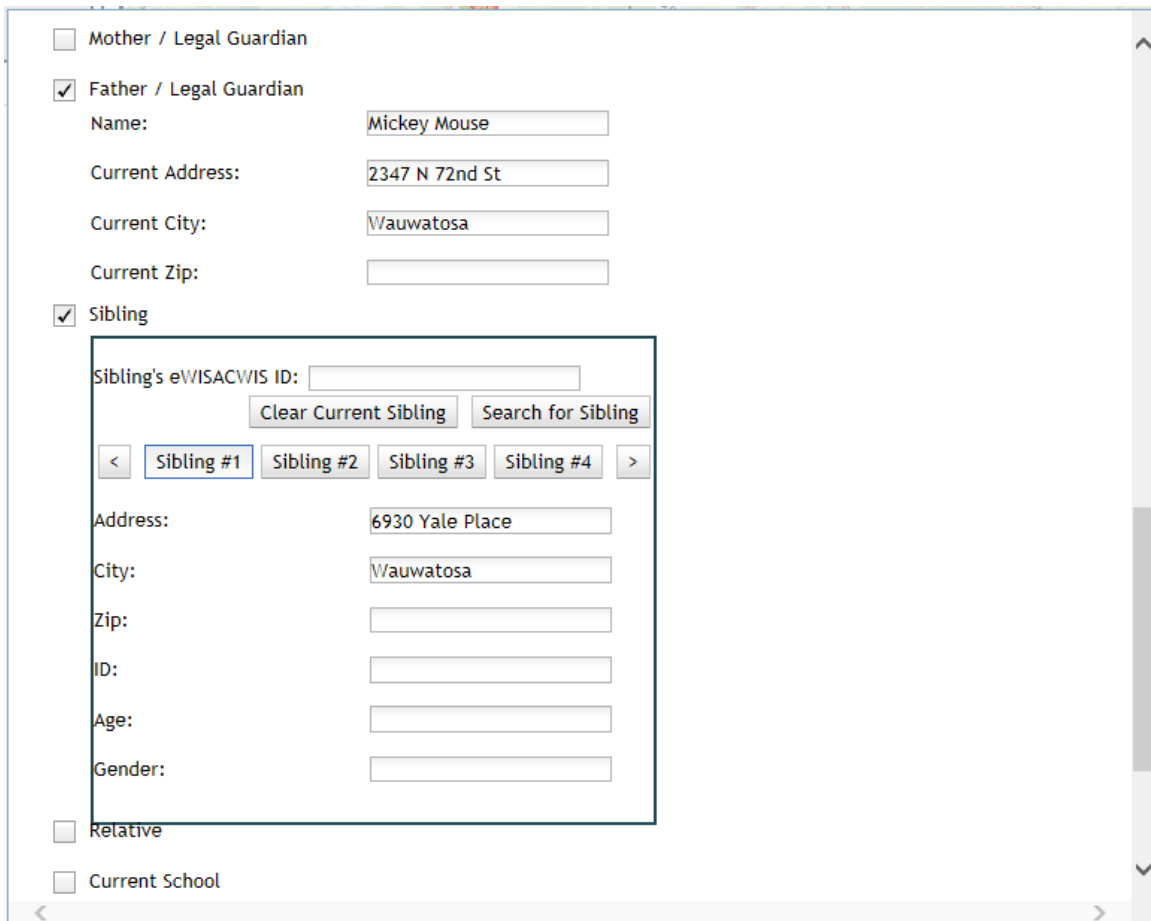

CANS functionality is only available in the OHC Placement mode. It is not available in the Disaster Preparedness mode.

Child Display Criteria

You have the following options for **Child Display Criteria**:

- Child's Removal Address
- Mother / Legal Guardian
- Father / Legal Guardian
- Sibling
- Relative
- Current School
- Other Address

If you indicated that you want to view information about a specific child and GPRS was able to locate the child's information (it existed in eWISACWIS the last time the information was loaded into GPRS), GPRS will automatically display the found addresses. If GPRS was unable to locate information about the specific child, you will need to manually enter the addresses you want to view on the map. As mentioned earlier, if the address that GPRS is displaying is incorrect, you will be able to key-over that address and enter the correct address.

The screenshot shows a web form titled "Child Display Criteria". It contains several sections for selecting and entering information:

- Mother / Legal Guardian:** An unchecked checkbox.
- Father / Legal Guardian:** A checked checkbox. Below it are text input fields for:
 - Name: Mickey Mouse
 - Current Address: 2347 N 72nd St
 - Current City: Wauwatosa
 - Current Zip: (empty)
- Sibling:** A checked checkbox. Below it is a section for sibling information:
 - Sibling's eWISACWIS ID: (empty)
 - Buttons: "Clear Current Sibling" and "Search for Sibling"
 - Navigation: A set of buttons labeled "Sibling #1", "Sibling #2", "Sibling #3", and "Sibling #4", with "Sibling #1" selected.
 - Address: 6930 Yale Place
 - City: Wauwatosa
 - Zip: (empty)
 - ID: (empty)
 - Age: (empty)
 - Gender: (empty)
- Relative:** An unchecked checkbox.
- Current School:** An unchecked checkbox.

In the example above, the child's father's address and one sibling's address have been provided.

☒ Current School

School County:

In the example above, one relative's address and the child's current school address have been provided.

The child's removal address is critical. If this information is missing from eWiSACWIS and GPRS is unable to provide the address, you should provide this address because it will give you the focal point from which to view the child's environment.

NOTE: Zip code is optional. The tool does not need it to determine where to place the objects on the map. However, City is mandatory.

If you have indicated a specific child and the Mother or Father do not live in the child's removal address, GPRS will automatically display the Mother's and Father's addresses if they exist in eWiSACWIS.

You can enter up to four siblings. GPRS will not automatically display siblings. They need to be manually entered.

You can enter up to four relatives. If you have indicated a specific child and that child has relatives, they will be automatically displayed for your selection.

If you have indicated a specific child and school information is available, GPRS will automatically display the child's current school information. You can enter the child's current school address as well. If this information is provided, the school will appear on the map as well.

There is a final option for your use: Other Address. If you want to place an additional address on the map, use this option. It can be used as you wish.

NOTE: Do not select any Child Display criteria that do not contain a valid address. You will receive an error message that indicates an address must be entered.

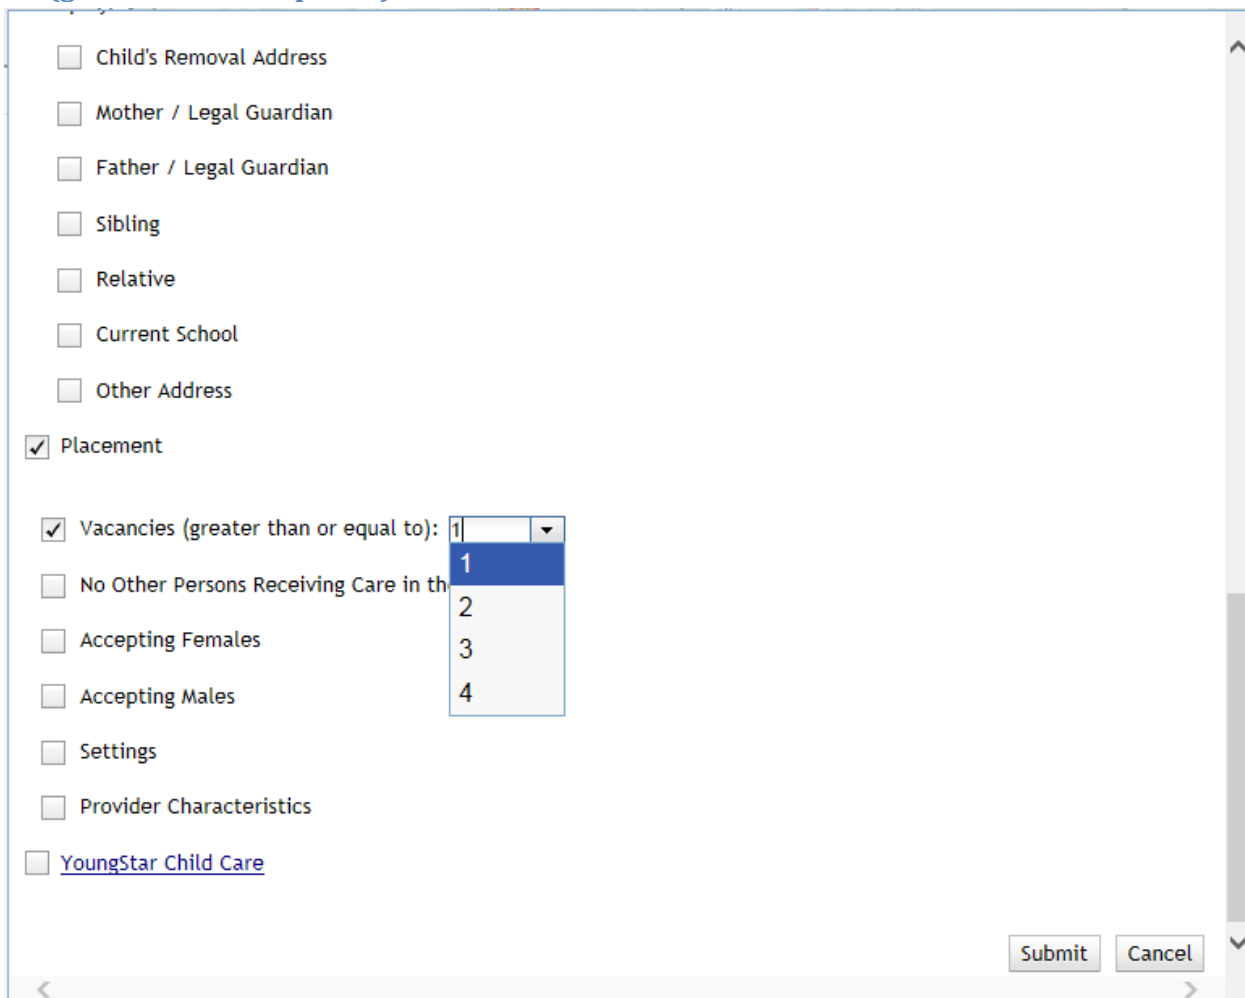

NOTE: If you only want to view "Placement" information, you can choose NOT to provide any child display criteria.

Placement

You have the following options for Placement Display Criteria:

- Vacancies (greater than or equal to)
- No Other Persons Receiving Care in the Home
- Accepting Females
- Accepting Males
- Settings
- Provider Characteristics

Vacancies (greater than or equal to)

The screenshot shows a web form titled "Placement" with a list of criteria. The "Vacancies (greater than or equal to)" criterion is selected and its dropdown menu is open, showing options 1, 2, 3, and 4. The other criteria are not selected.

Submit Cancel

If you click **Vacancies (greater than or equal to)** you will have the option of selecting from 1 through 4 vacancies. GPRS will only display providers that can accommodate the number of vacancies selected. Vacancies is defaulted to always be checked when first logging into GPRS.

No Other Persons Receiving Care in the Home

If you click “**No Other Persons Receiving Care in the Home**”, GPRS will only display providers that have no other persons in the home receiving care.

Accepting Females

If you click “**Accepting Females**”, GPRS will only display providers that have indicated they prefer females and they currently have vacancies.

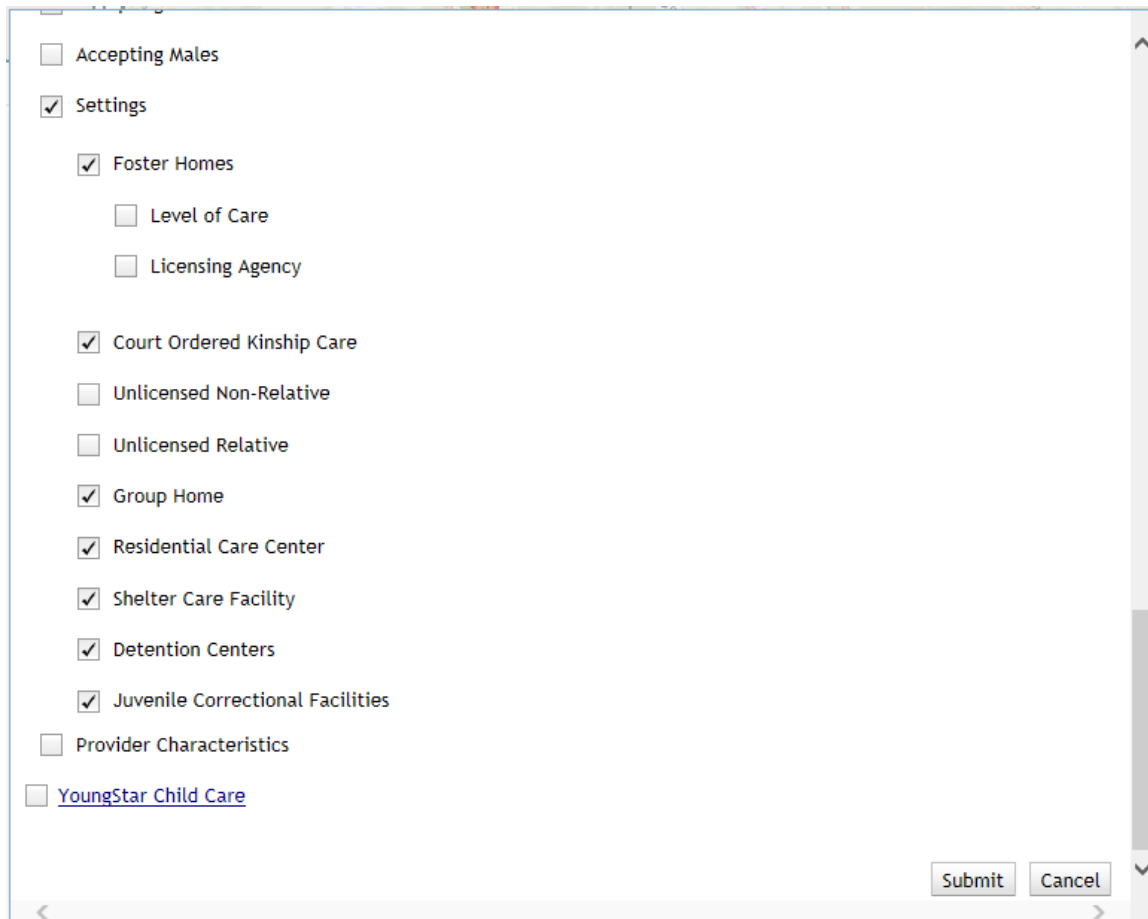

Accepting Males

If you click “**Accepting Males**”, GPRS will only display providers that have indicated they prefer males and they currently have vacancies.

Settings

If you click **“Settings”**, GPRS will present the following options:

- Foster Homes
 - Level of Care
 - Licensing Agency
- Court Ordered Kinship Care
- Unlicensed Non-Relative
- Unlicensed Relative
- Group Home
- Residential Care Center
- Shelter Care Facility
- Detention Centers
- Juvenile Correctional Facilities

Foster Homes / Level of Care

If you select Foster Homes as a display criterion, you have the option of selecting a provider's "**Level of Care**" and/or "**Licensing Agency**".

The screenshot shows a settings window with a list of checkboxes. The following checkboxes are checked:

- ☒ Settings
 - ☒ Foster Homes
 - ☒ Level of Care
 - ☐ Level 1 - Child Specific
 - ☐ Level 2 - Basic
 - ☐ Level 3 - Moderate Treatment

- Level 1 – Child Specific
- Level 2 – Basic
- Level 3 – Moderate Treatment
- Level 4 – Specialized Treatment
- Level 5 – Exceptional Treatment

You can select up to 5 Levels of Care.

GPRS will apply the following business rules to determine which providers to display based on your Level of Care selections.

		Placement Options		
Child's Level of Need	Provider's Level of Care	Foster Home	Group Home	Residential Care Center
1 / 2	1	Child - Specific		
	2	Basic		
3	3	Moderate Treatment	Group Home	
4	4	Specialized Treatment		
5	5	Exceptional Treatment		Residential Care Center

	Placement of children at this level is not appropriate

NOTE: A child in foster care can be served by a foster home with a certification level lower than the child's level of need if an exception has been granted and documented in the child's electronic case record by the placing agency and agency shows what services and supports will be provided to meet the child's needs.

Foster Homes /Licensing Agency

If you click “**Foster Homes**” as display criteria, you have the option of selecting “**Licensing Agency**” as criteria for display purposes. If you do, the system will provide you with the ability to select one or more of the following licensing types:

- Licensed by BMCW
- Licensed by a Child Placing Agency
- Licensed by a County
- Not Licensed
- Licensed by Out of State
- Licensed by State Adoptions
- Licensed by Tribe
- No License Type Information

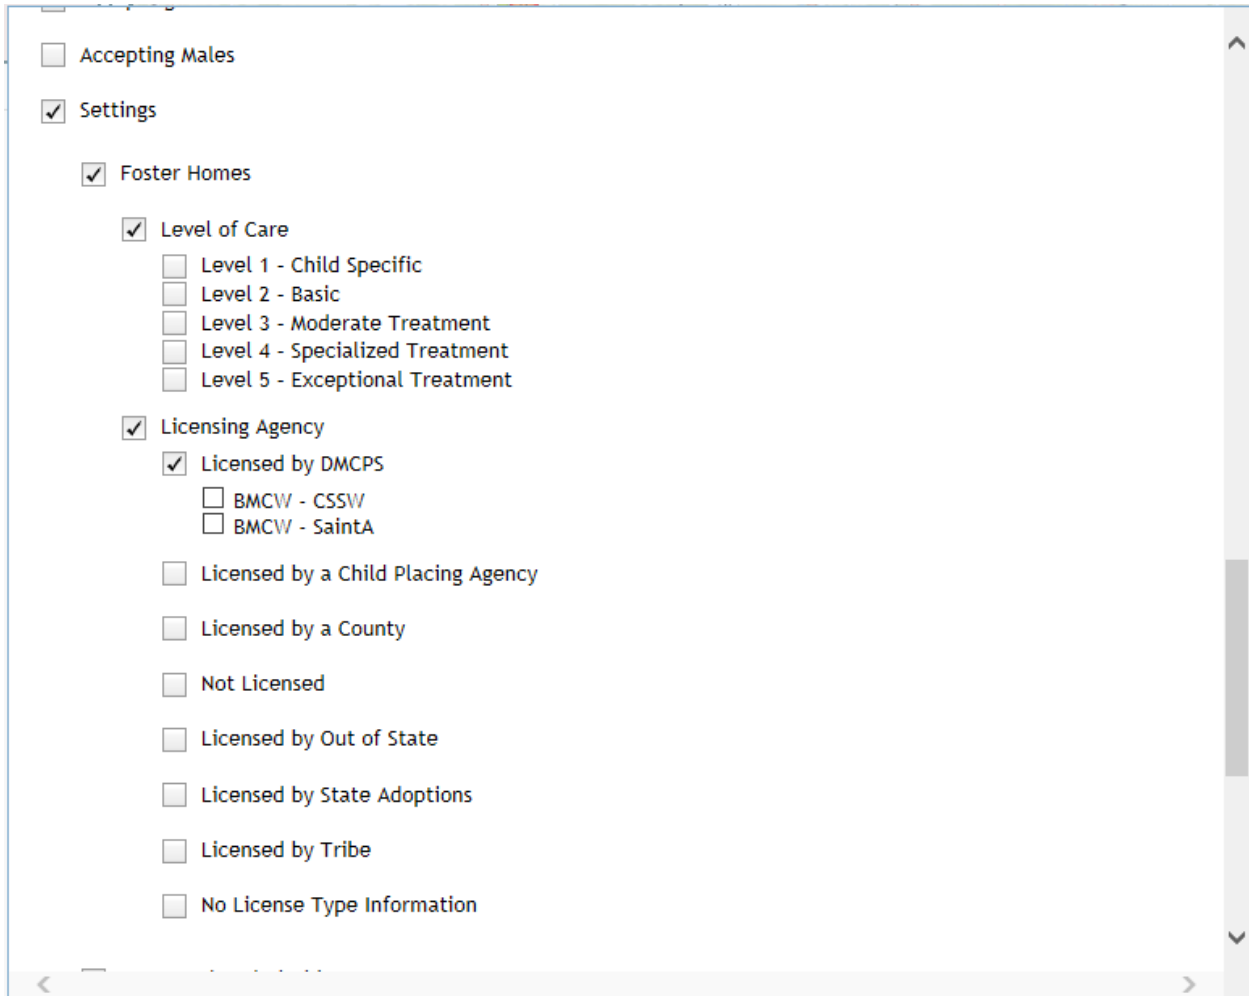

The screenshot shows a web-based selection interface with a scrollable list of options. The options are organized into a tree structure:

If you click **“Licensed by a Child Placing Agency”**, GPRS will display ALL Child Placing Agencies that existed in eWiSACWIS the last time information was provided to GPRS from eWiSACWIS.

If you select specific CPAs, GPRS will display only the providers that were licensed by the selected CPAs.

If you choose **“Licensed by a Child Placement Agency”** but do not select any specific CPAs, all providers licensed by a CPA will be displayed.

Licensed by a County

If you click “**Licensed by a County**”, the system will display ALL Wisconsin counties.

The screenshot shows a 'Settings' window with a list of options. The 'Licensed by a County' option is selected, and a list of Wisconsin counties is displayed below it. The counties listed are: Adams, Ashland, Barron, Bayfield, Brown, Buffalo, Burnett, Calumet, Chippewa, Clark, Columbia, Crawford, Dane, Dodge, Door, Douglas, Dunn, Eau Claire, Florence, Fond Du Lac, and Forest.

You can choose to only see providers that were licensed by specific counties by selecting those counties from the list.

If you choose “**Licensed by a County**” but do not select any specific counties, all providers licensed by a county will be displayed.

Not Licensed

If you click “**Not Licensed**”, GPRS will display counties that have at least 1 provider that contains the License Type of “Not Licensed”.

The screenshot shows a settings window with a list of checkboxes. The 'Settings' checkbox is checked. Under 'Foster Homes', 'Level of Care' is unchecked. Under 'Licensing Agency', 'Licensing Agency' is checked, and its sub-items 'Licensed by DMCPs', 'Licensed by a Child Placing Agency', and 'Licensed by a County' are unchecked. Under 'Not Licensed', the 'Not Licensed' checkbox is checked, and a list of Wisconsin counties is shown, all of which are unchecked: Dane, Douglas, Forest, Kenosha, Lafayette, Manitowoc, Milwaukee, Outagamie, Pierce, Polk, Richland, Rock, Sawyer, and State. At the bottom, 'Licensed by Out of State', 'Licensed by State Adoptions', and 'Licensed by Tribe' are all unchecked.

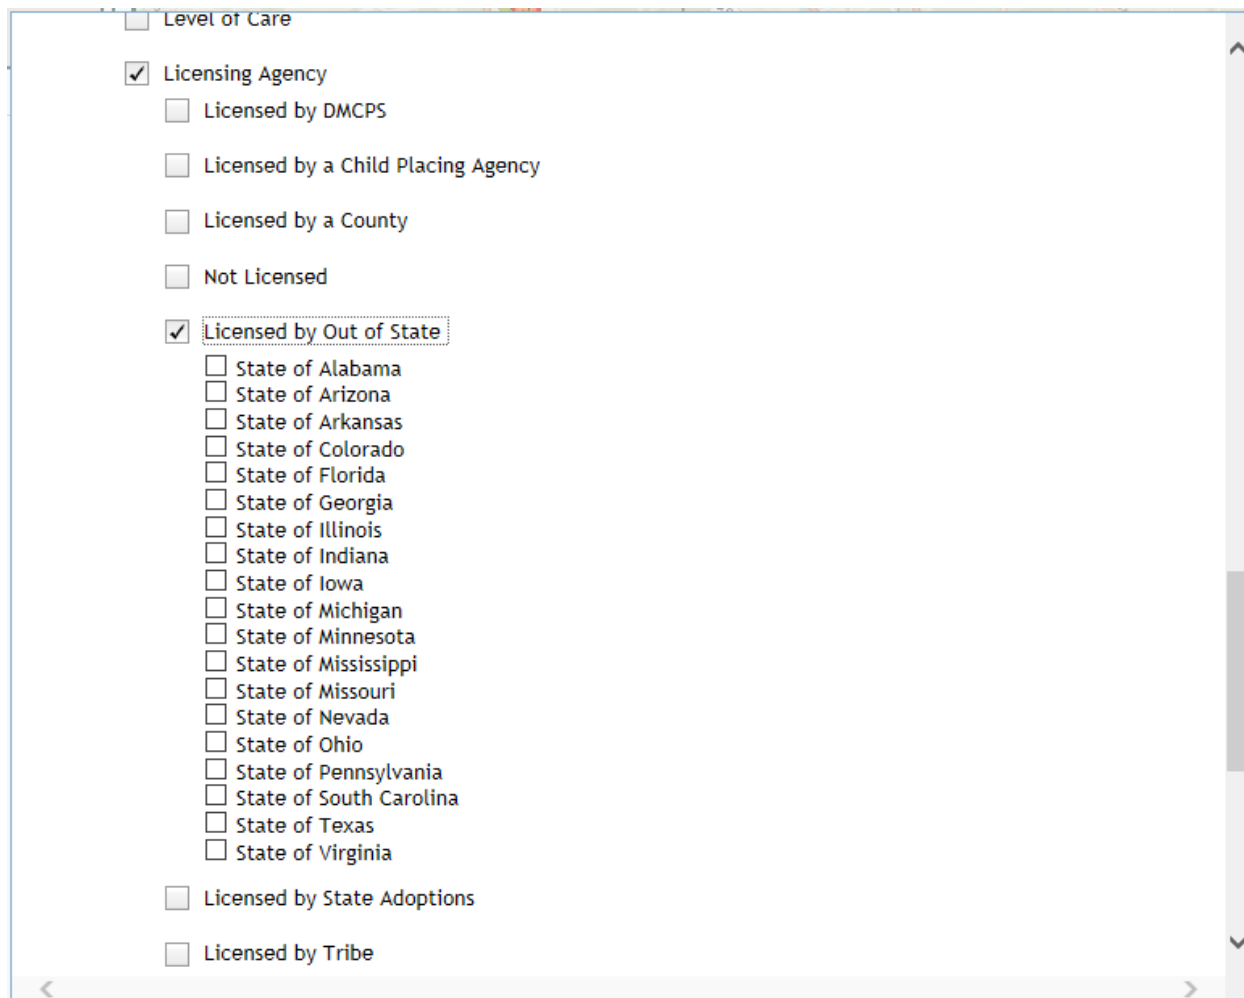

You can choose to only see providers that contain a License Type of “Not Licensed” for a specific county by selecting those counties from this list.

If you choose “Not Licensed” but do not select any specific county, all providers with a License Type of “Not Licensed” will be displayed.

NOTE: If your county is listed under the “Not Licensed” category, you should review the provider’s information in eWiSACWIS for possible corrections.

Licensed by Out of State

If you click “**Licensed by Out of State**”, GPRS will display all States (other than Wisconsin), that have at least 1 provider caring for our foster children.

The screenshot shows a web form with a scrollable list of licensing options. The options are as follows:

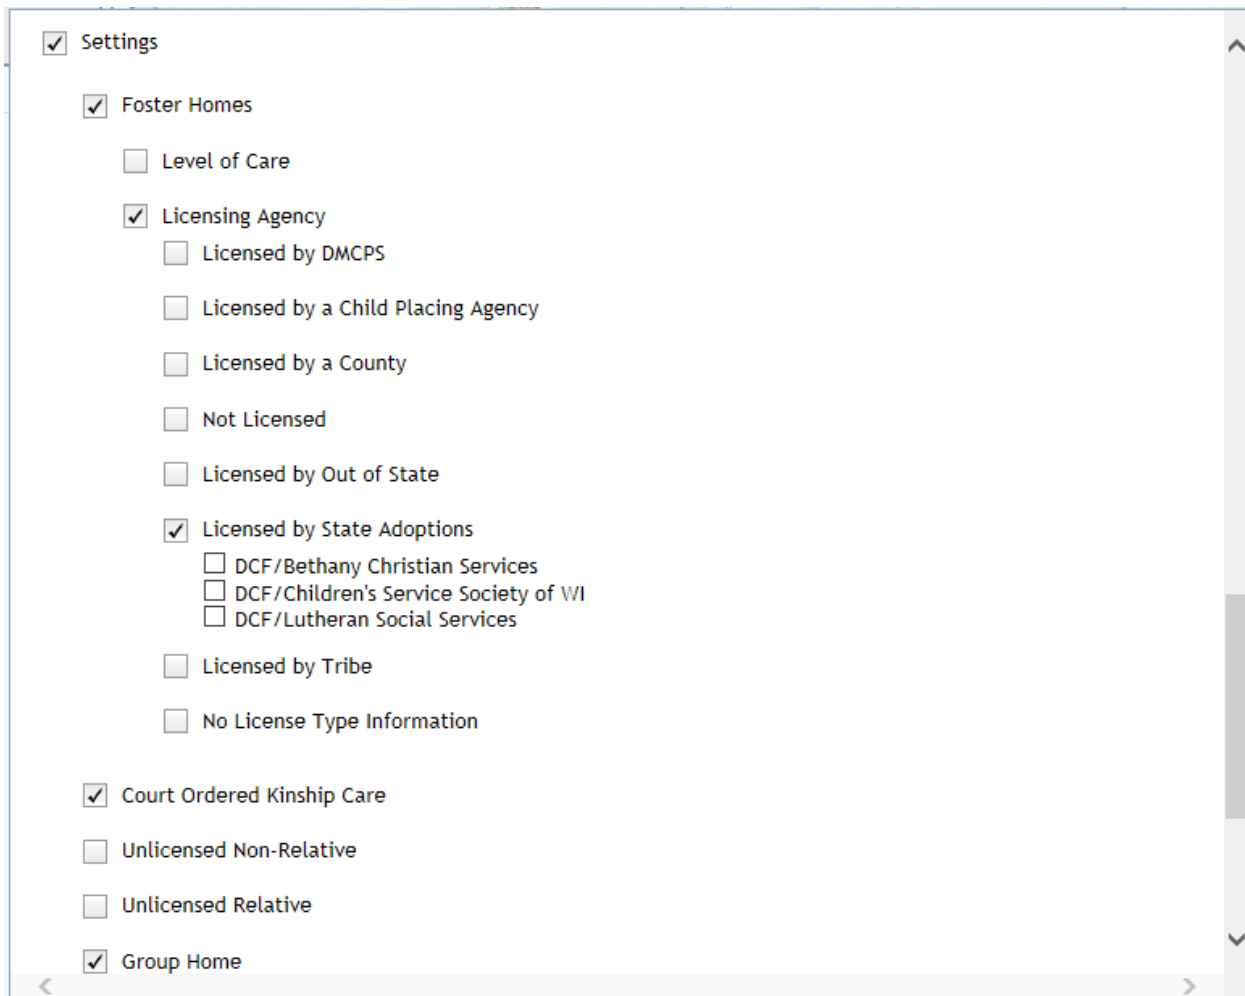

- ☐ Level of Care
- ☒ Licensing Agency
 - ☐ Licensed by DMCPs
 - ☐ Licensed by a Child Placing Agency
 - ☐ Licensed by a County

You will have the option of selecting Provider Characteristics as part of placement display criteria. Provider Characteristics are divided into 2 types in eWiSACWIS: “Provider Accepts” and “Other Provider Characteristics”. Only “Provider Accepts” characteristics are included in GPRS.

If you select Provider Characteristics as part of the display criteria, GPRS will only display providers whose provider characteristics match the selected provider characteristics. Providers are matched to provider characteristics based on the provider characteristics that are entered on the provider’s home provider record in eWiSACWIS.

If you select “Provider Characteristics” as a filtering criteria but do not select any specific characteristic, GPRS will assume that ALL characteristics should be used as display criteria.

Please note: if you have indicated that you want to filter based on the “Child’s CANS”, you will NOT have the option of selecting “Provider Characteristic” as a display criteria.

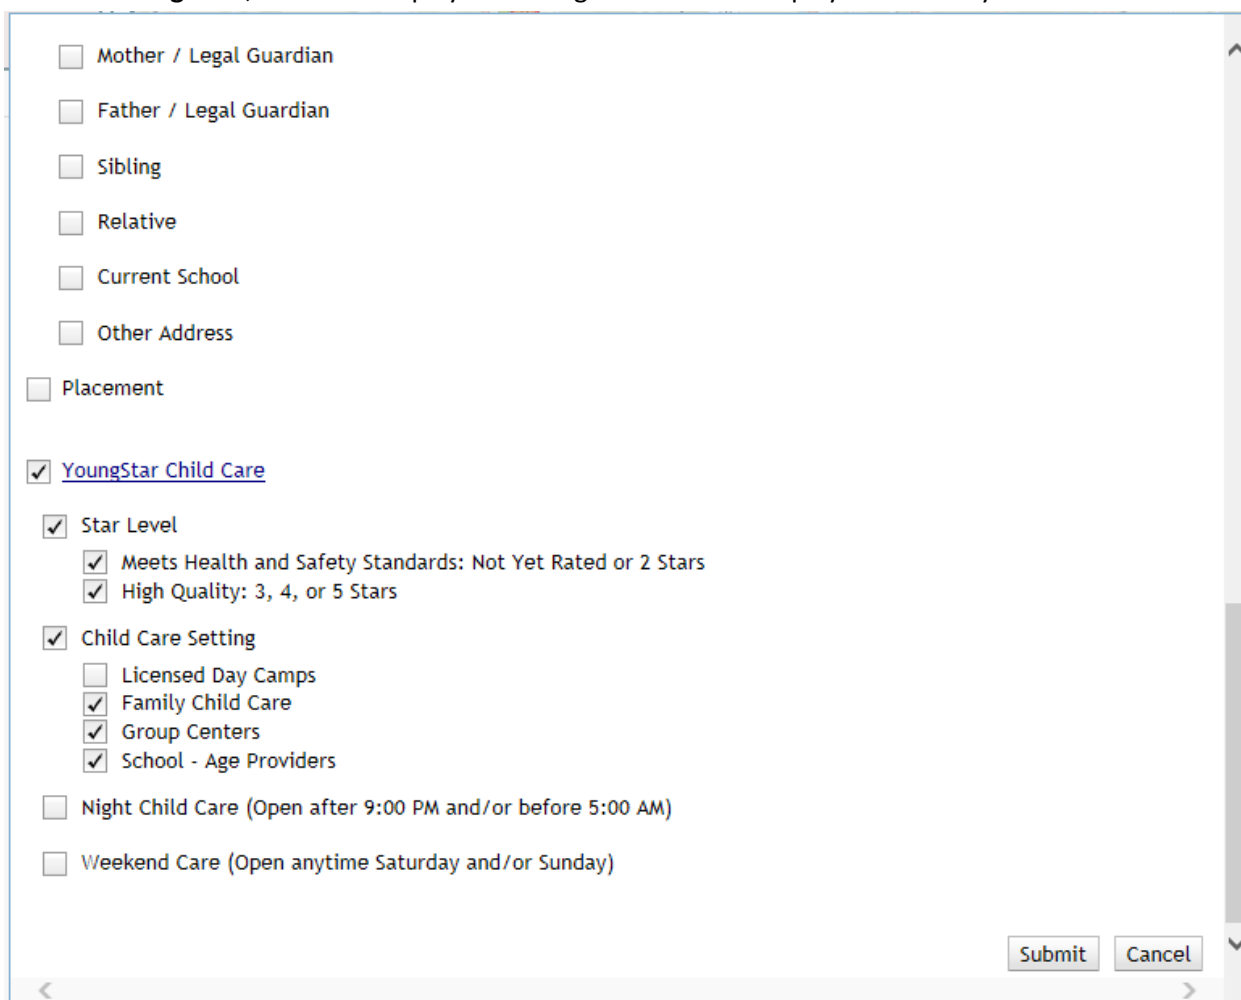

Provider Characteristics functionality is only available in the OHC Placement mode. It is not available in the Disaster Preparedness mode.

YoungStar Child Care

NOTE: If you only want to view “YoungStar” information, you can choose NOT to provide any child display criteria or provider filter criteria.

YoungStar is Wisconsin's child care quality rating and improvement system. YoungStar gives parents tools and information to raise happy, healthy kids. In addition, YoungStar helps preschools and child care providers give children safe, nurturing places to grow.

When you click “**YoungStar**”, GPRS will display the YoungStar filter and display criteria for your selection.

The screenshot shows a web-based form for selecting YoungStar filter and display criteria. The form is titled "YoungStar Child Care" and contains several sections of checkboxes. The "YoungStar Child Care" section is selected. The "Star Level" section is also selected, with "Meets Health and Safety Standards: Not Yet Rated or 2 Stars" and "High Quality: 3, 4, or 5 Stars" both checked. The "Child Care Setting" section is selected, with "Family Child Care", "Group Centers", and "School - Age Providers" all checked. The "Night Child Care" and "Weekend Care" sections are not selected. The form has a "Submit" button and a "Cancel" button at the bottom right.

YoungStar Filter and Display Criteria

When selecting “YoungStar”, the filtering and display criteria will expand and you will have option for YoungStar filtering criteria and display criteria. You will have the following options:

- Star Level
- Child Care Setting
- Night Child Care (Open after 9:00 PM and/or before 5:00 AM)
- Weekend Care (Open anytime Saturday and/or Sunday)

Star Level

You have the option to choose to filter based on a YoungStar child care provider’s **Star Level**. If you click “Star Level”, you can select the following star levels to filter by:

- Meets Health and Safety Standards: Not Yet Rated or 2 Stars
- High Quality: 3, 4, or 5 Stars

You have the option to select both star levels or only one to filter by. As a point of reference, the star ratings are defined as follows:

- Not yet rated: These child care providers are participating in YoungStar, but have not yet received their rating. These providers should be rated within 60 days and are expected to be rated as a 2 Star Program.
- 2 Star Program: These child care providers meet health and safety standards.
- 3 Star Program: These child care providers meet proficient levels of quality standards.
- 4 Star Program: These child care providers meet elevated levels of quality standards.
- 5 Star Program: These child care providers meet the highest levels of quality standards.

Please note: providers who are rated as a 1 Star Program are not included in the GPRS filter criteria, as they do not meet health and safety standards, and therefore cannot participate in YoungStar.

Child Care Setting

When you select **Child Care Setting**, GPRS will display the child care settings that can be filtered. You can filter by the following child care settings:

- Licensed Day Camps
- Family Child Care
- Group Centers
- School-Age Providers

As a note, all of these child care settings are defaulted to checked with the exception of “Licensed Day Camps.”

Each of these child care settings refer to a different setting that child care providers deliver child care. Licensed Day Camps refers to a seasonal program, typically outdoors, that operate for periods less than 24 hours a day. Family Child

Care means a facility where a person provides care and supervision for less than 24 hours a day for at least 4, and not more than 8 children, who are not related to the provider. Group Centers means a facility where a person provides care and supervision for 9 or more children who are not related to the provider for less than 24 hours a day. School-Age Providers is defined as a program that cares for school-age children before or after school, or during the summer or school breaks.

Night Child Care

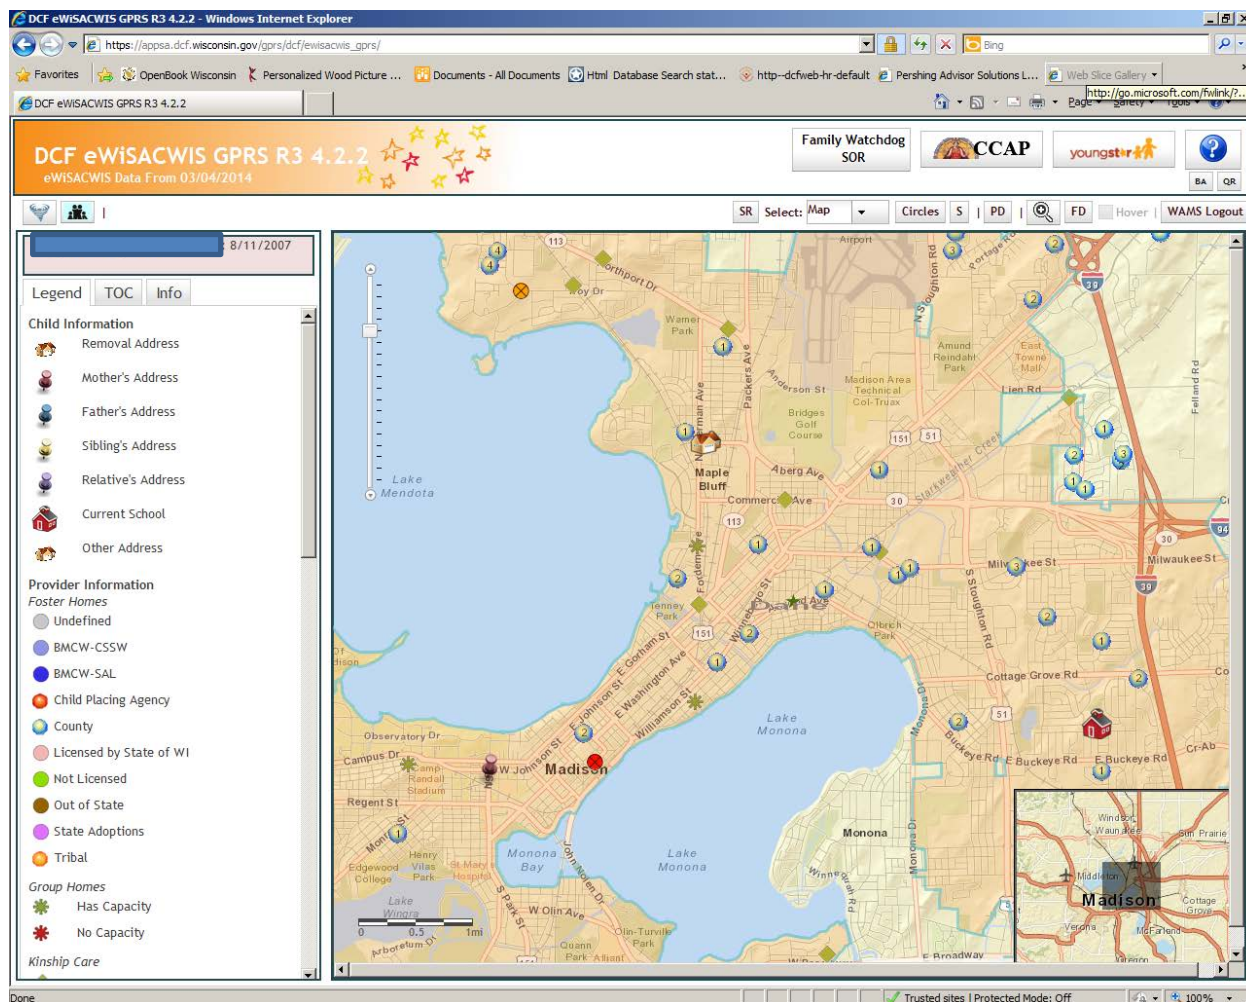

If you select **Night Child Care** (Open after 9:00 PM and/or before 5:00 AM), GPRS will only display child care providers who provide care *any time* after 9:00 pm and/or before 5:00 am. Please note, these providers may not be open the entire time between 9:00 pm and 5:00 am, but are providing care at some point between that time period.

Weekend Care

If you select **Weekend Care** (Open anytime Saturday and/or Sunday), GPRS will only display child care providers who provide care *any time* on Saturday and/or Sunday.

Submitting your filtering/display criteria

Placement

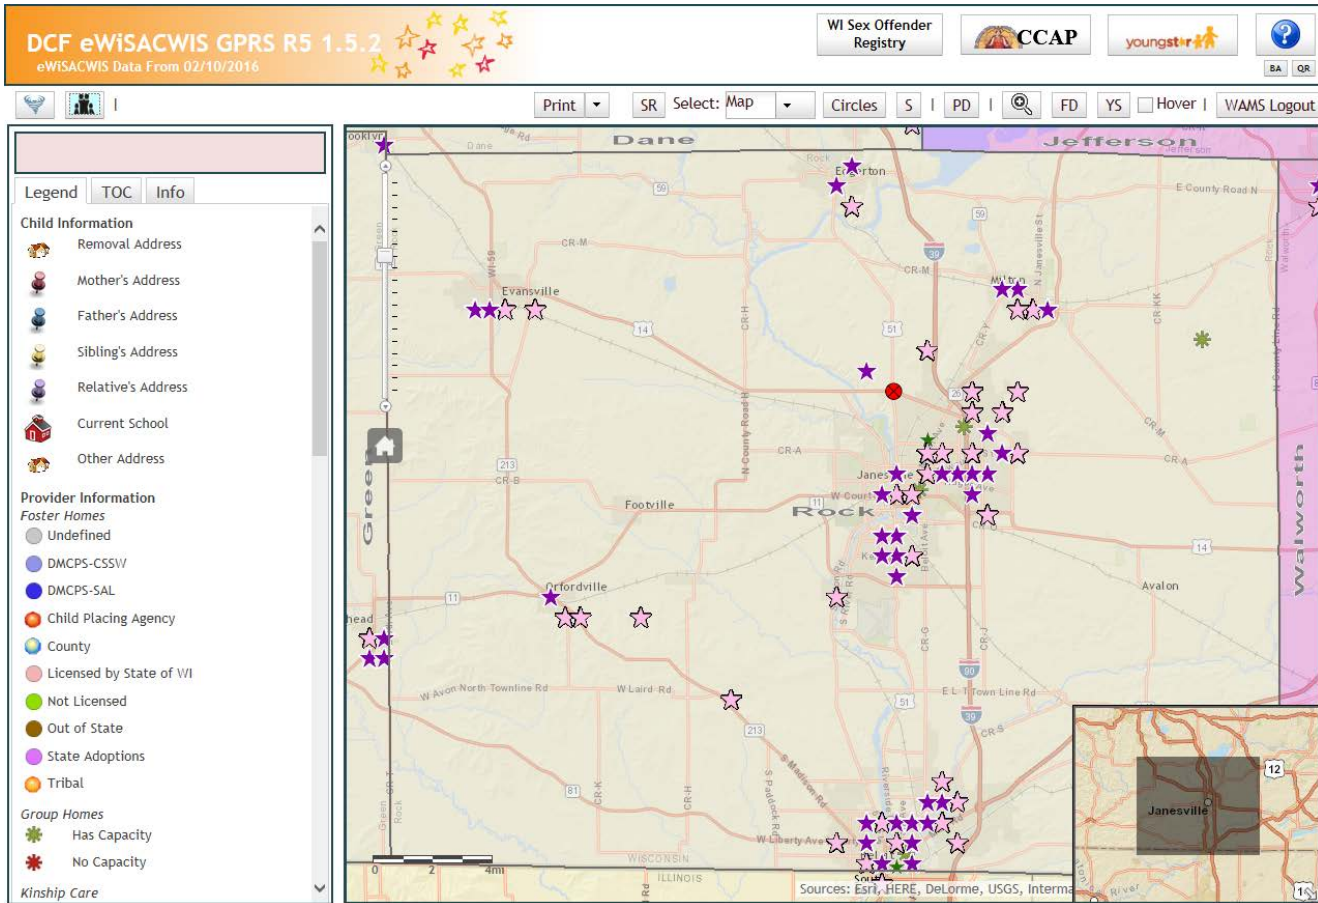

When you click the **“Submit”** button on the bottom right hand corner of the Filter/Display Dialog page, GPRS will apply all of the filtering/display criteria you have provided. The image above is what the initial map looks like after having applied your filter/display criteria.

Only active providers with active licenses will be displayed. Providers with licenses that have been placed on hold will not be displayed.

In the example above, you can see the child’s current school (little red school house) and the child’s removal address (little brown building). You can also see the mother’s address (pink pushpin).

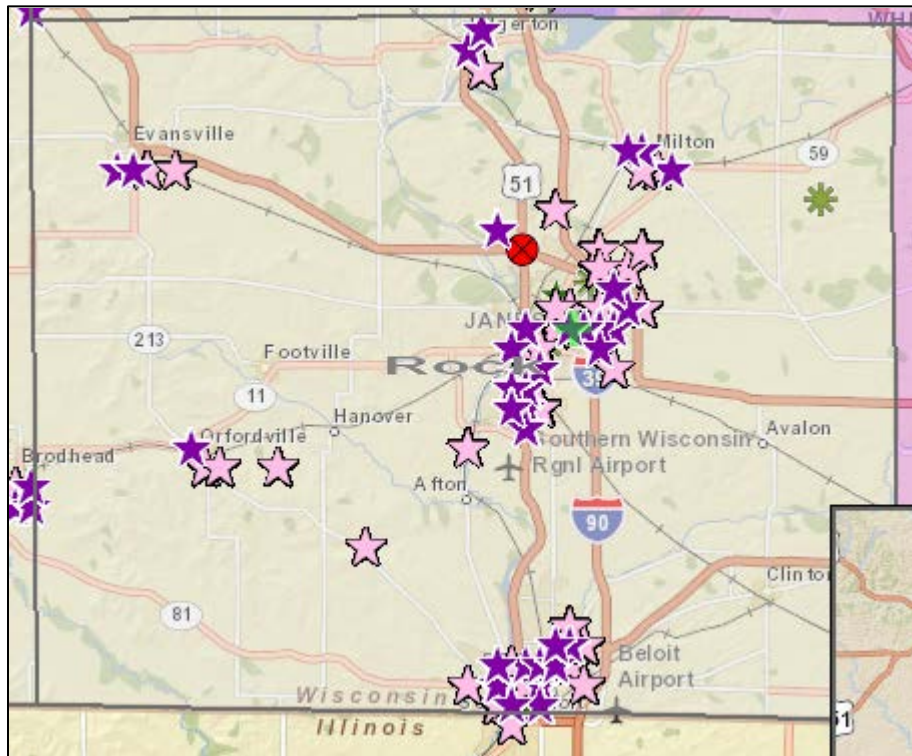

You can also see many spheres with a number inside them. Each sphere represents a foster home. The color of the sphere indicates who the foster home is licensed by. The number in the middle of the sphere indicates the number of vacancies each foster home currently has.

When you click the “**Submit**” button on the bottom right hand corner of the Filter/Display Dialog page, GPRS will apply all of the filtering/display criteria you have provided for YoungStar providers. The image above is what the initial map looks like after having applied your filter/display criteria.

Only YoungStar providers who are participating in YoungStar will be displayed. These providers have a YoungStar rating of 2, 3, 4, or 5, or are not yet rated.

YoungStar providers who are Not Yet Rated or are rated 2 Stars (i.e. meets health and safety standards) are displayed in a lighter purple. YoungStar providers who are rated 3, 4, or 5 Stars (i.e. high quality) are displayed in a darker purple. GPRS will overlay the YoungStar providers on top of the out-of-home care providers on the map. Additionally, GPRS will overlay YoungStar providers rated 3, 4, or 5 Stars on top of providers who are Not Yet Rated or are rated 2 Stars. The image below provides an example of how these overlays will look on the map.

Bad Addresses

If a provider contains an address that GPRS could not map, it will be necessary for you to correct the address in eWiSACWIS.

When reviewing these addresses you should look for the following:

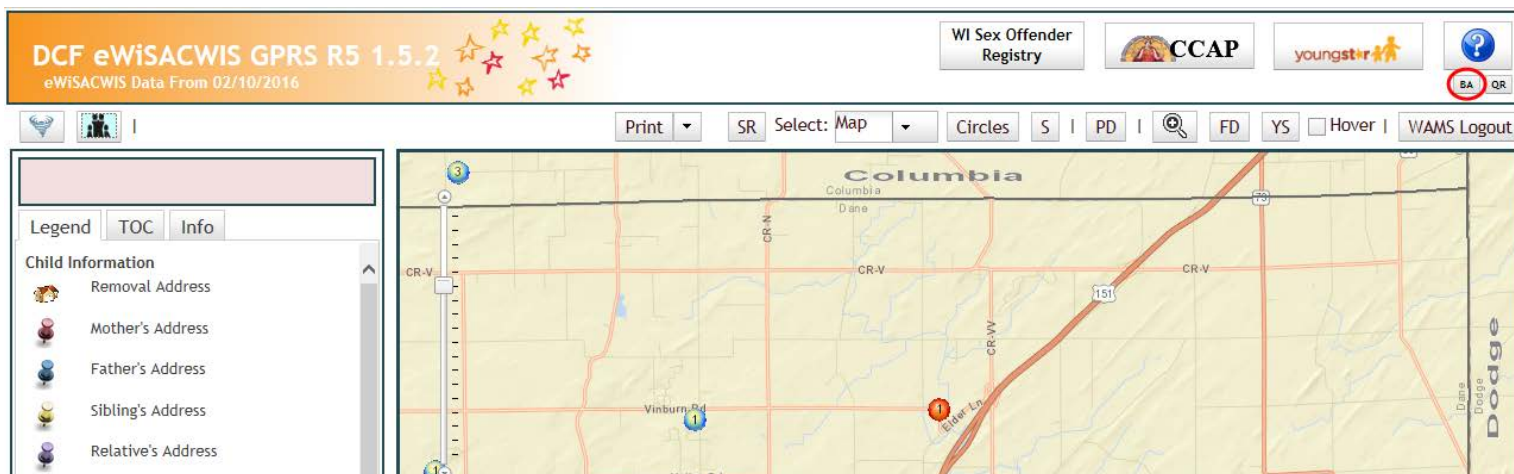

- Look for missing data: city, state, street type (e.g. lane, avenue, road), street number
- Look for misspellings
- Look for address and city mismatches
- Replace PO box addresses with a building address
- Try the address in Google and see what it does with it

For example:

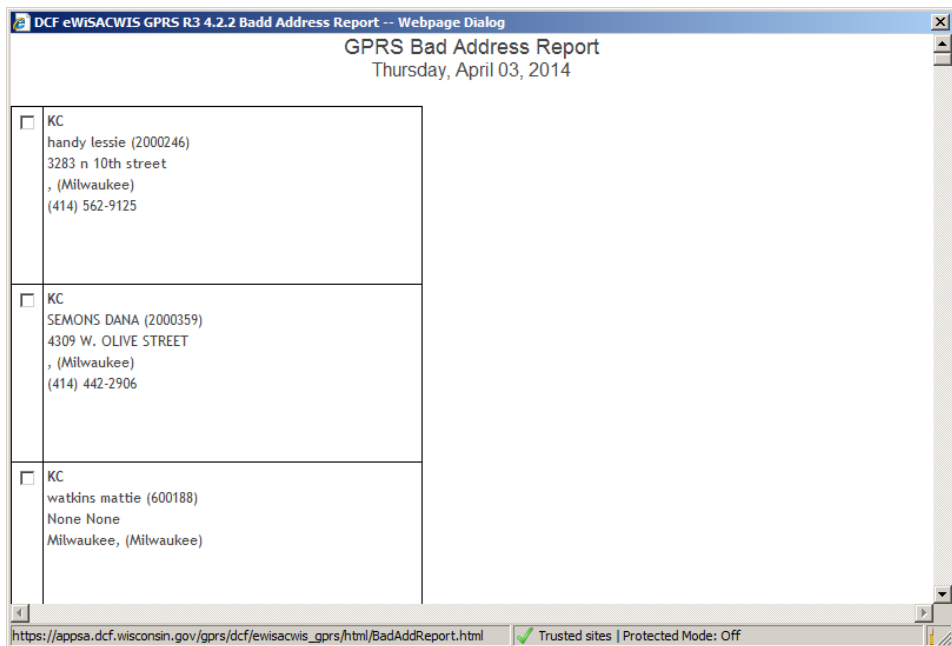

When “2844 N 2ND ST UPPER, Milwaukee , WI” is googled, it sends back an address of “2844 N 2ND ST, Milwaukee , WI”. This second address works better for the tool.

You can review the list of bad addresses in GPRS by generating the Bad Address report.

GPRS provides you with the ability to produce the Bad Address report for viewing and printing purposes. This can be done by clicking the “BA” icon on the top right hand corner of the screen.

When you click the “BA” icon, GPRS will produce the Bad Address report. This report will contain ALL providers that could not be mapped in GPRS.

Zooming in and out

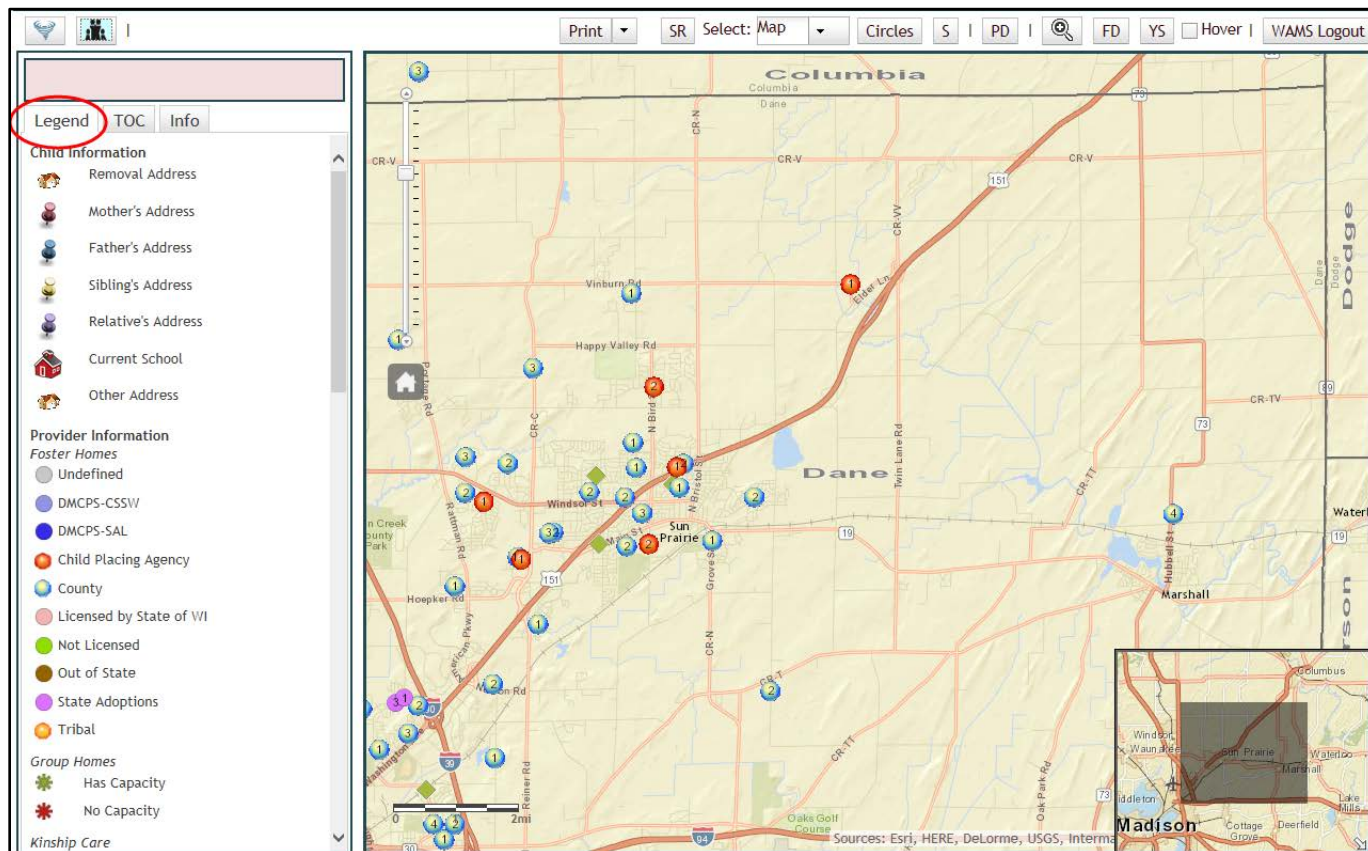

If you need to zoom in or out, GPRS presents you with various options.

- Drag the mouse to pan
- Mouse Scroll Forward to zoom in
- Mouse Scroll Backward to zoom out
- SHIFT + drag mouse to zoom in
- SHIFT + CTRL + drag the mouse to zoom out
- SHIFT + Click to re-center
- Double click to center and zoom in
- SHIFT + Double click to center and zoom in
- Use arrow keys to pan
- Use + key to zoom in a level
- Use – key to zoom out a level

One common way to zoom in is to double-click on a symbol until you are able to view the environment more closely.

Another common way is to use the scale on the left hand side toward the top of the screen. If you bring the scale up, it zooms in. If you bring the scale down, it zooms out.

Legend tab

There are 3 tabs to the left of the map: **Legend**, **TOC** and **Info**.

The "Legend" tab provides you with a list of all the symbols used on the map.

TOC tab

The “TOC” (Table of Contents) tab provides you with a quick way to manipulate the filtering/display criteria you provided on the **Filter/Display Dialog** page. You can turn the criteria on and off based on what you want to view. You can also choose to display other items such as:

- School Buildings
- School Districts
- Unclassified and Restricted Providers
- Municipality Boundaries
- County Boundaries
- DCF Regions
- Tribal Lands
- Milwaukee Public School Bus Regions

The school information presented in GPRS comes directly from DPI.

Note: You can turn these options on and off at will. As a rule of thumb, you should only turn these on when the information becomes relevant to what you're doing because they can clutter up the map.

School Districts

When you select the **School Districts** option, GPRS will display the school district boundaries. If you click anywhere within the school district boundary, GPRS will display information about the school district, including a link to their website.

Unclassified and Restricted Providers

In the TOC tab, you can select to view “Other” providers and “Restricted Providers”.

“Other” refers to providers that are considered “Adoptive Homes” or “Foster Homes Out-of-State”. In eWiSACWIS, there are currently 13 providers that are “Adoptive Homes” and 2 providers that are “Foster Homes Out-of-State”. These providers will be displayed with a “?”.

All restricted providers that match the filtering/display criteria will appear in Lake Superior. They will be included in the Provider-Details report.

Milwaukee Public School Bus Regions

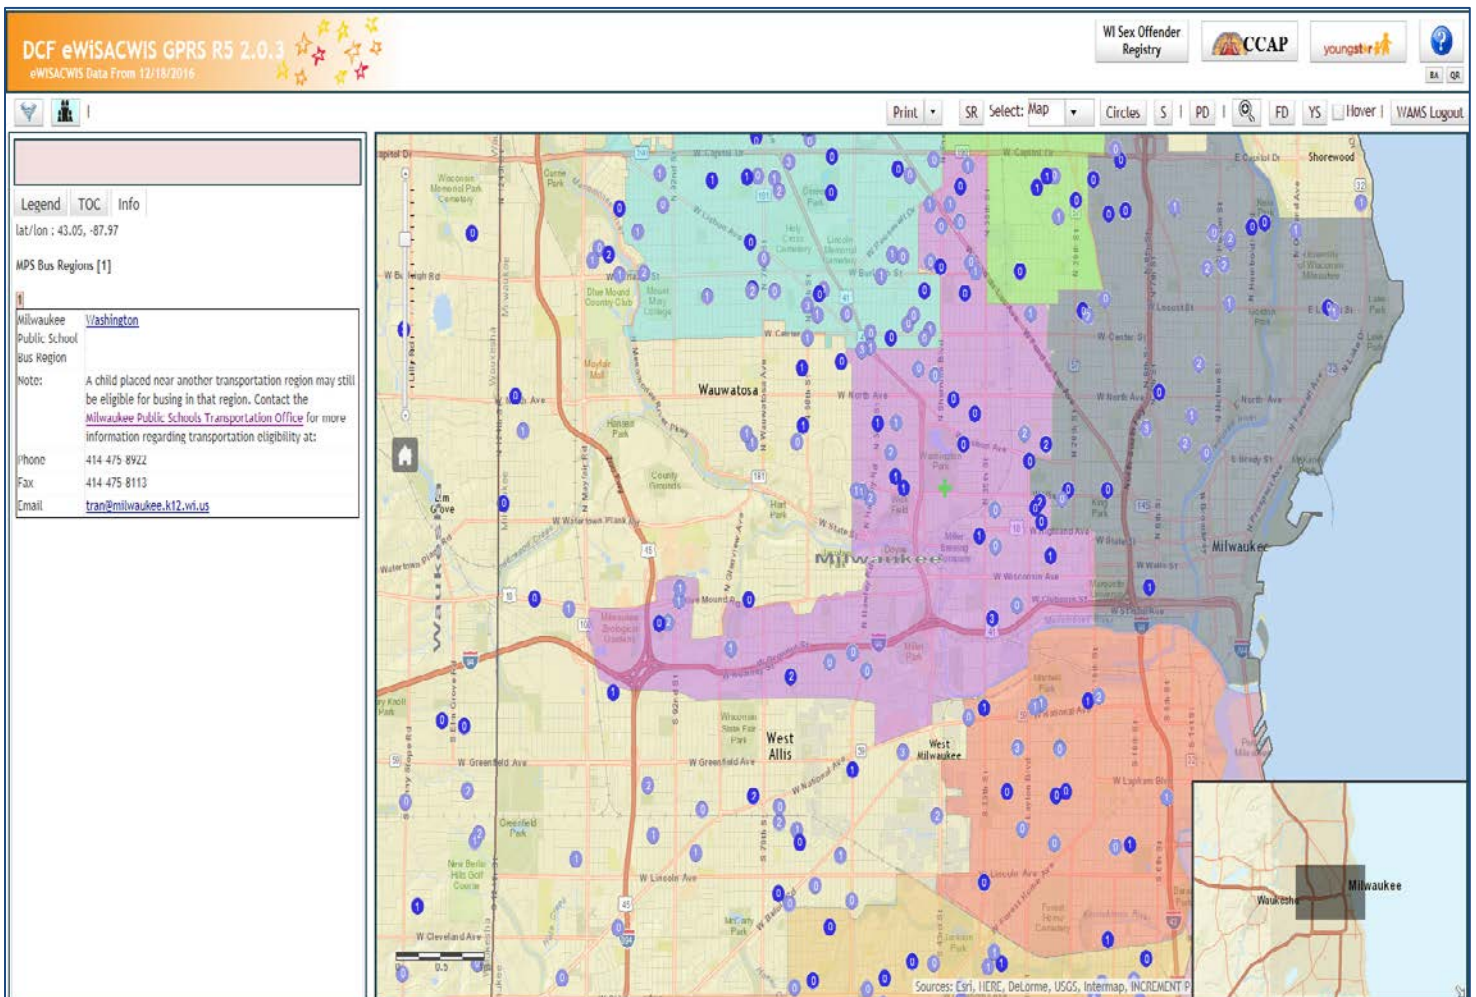

In the TOC tab, you can select to view “Milwaukee Public School Bus Regions”, which will display the school bus regions in the Milwaukee Public School District. If you click anywhere within the school bus region, GPRS will display information the name of the school bus region.

It is important to note that a child placed near another transportation region may still be eligible for busing in that region. User should contact the [Milwaukee Public Schools Transportation Office](#) for more information regarding transportation eligibility at:

When you click an out-of-home care symbol on the map, the “Info” tab displays information about what that symbol represents. A green cross will appear on the symbol you clicked.

There are times when information on multiple out-of-home care providers is displayed on the “Info” tab. This situation occurs when multiple out-of-home care providers are very close to each other on the map and the tool cannot distinguish between them. In this case, the “Info” tab will display and number each symbol.

If you want to isolate the symbol you are interested in, simply zoom in closer to that symbol until you can distinguish it from the cluster. You can then click the symbol and see information just on that symbol.

GPRS will display in the Info tab all the provider characteristics that match the filtering display criteria. This will include the actual number of characteristics that match. Please refer to the example below.

Similar to out-of-home care providers, when you click a YoungStar symbol on the map, the “Info” tab displays information about what that symbol represents. A green cross will appear on the symbol you clicked.

There are times when information on multiple YoungStar providers is displayed on the “Info” tab. This situation occurs when multiple YoungStar providers are very close to each other on the map and the tool cannot distinguish between them. In this case, the “Info” tab will display and number each symbol. The “Info” tab will sort each provider by their YoungStar rating, highest to lowest.

If you want to isolate the symbol you are interested in, simply zoom in closer to that symbol until you can distinguish it from the cluster. You can then click the symbol and see information just on that symbol.

The “Info” tab will display the following information for each YoungStar provider:

- Provider name
- Provider address
- Provider phone number
- YoungStar rating
- Child Care Setting
- Whether or not the provider provides night child care
- Whether or not the provider provides weekend child care
- Link to the provider’s information on the YoungStar webpage

If there are both out-of-home care providers and YoungStar providers visible on the map, the “Info” tab will display both the out-of-home care providers and the YoungStar providers. The “Info” tab will display all of the YoungStar providers first, and then will display all of the out-of-home care providers second. The providers will also be listed in alphabetical order.

GPRS Toolbar

The GPRS toolbar allows you to invoke specific functionality.

At the very top on the right hand side of the toolbar are 3 links to websites that are very useful.

- The WI Sex Offender Registry website provides you with the ability to locate sex offenders based on the location or name provided.
- The Consolidated Court Automation Program (CCAP) website provides you with the ability to conduct background checks.
- The YoungStar website provides you with the ability to display the locations of regulated child care facilities.

- The help button provides links to the User's Guide, information related to the GPRS project, and GPRS contact information.

To the left of the toolbar, you have the option of navigating to the Disaster Preparedness mode and back to the OHC Placement Mode.

To the right of the mode selection, you have the option of selecting one of the following:

- **SR** (School Report) - Use this option to list all providers within a specific school district.
- **Select** - Use this option to select providers you want to view in the Provider Details (PD) report. Possible options are Map, Polygon or All.
- **Circles** - Use this option to draw circles around the child's removal home, the father's address, the mother's address, or any other point of interest.
- **S** (Search) - Use this option to search for a specific Provider or Child.
- **PD** (Provider Details Report) - Use this option to produce a report of selected providers.

- - Use this symbol to zoom to a specific county, region, municipality or the entire state.
- **FD** (Filter/Display) - Use this option to alter the filter/display criteria previously provided.
- **YS** (YoungStar Report) - Use this option to produce a report of all YoungStar providers visible on the map.
- **Hover** - Use this feature to hover over an out-of-home care provider, YoungStar Provider, or school building to display basic information.
- **WAMS Logout** - Use this option to logout of the GPRS application.

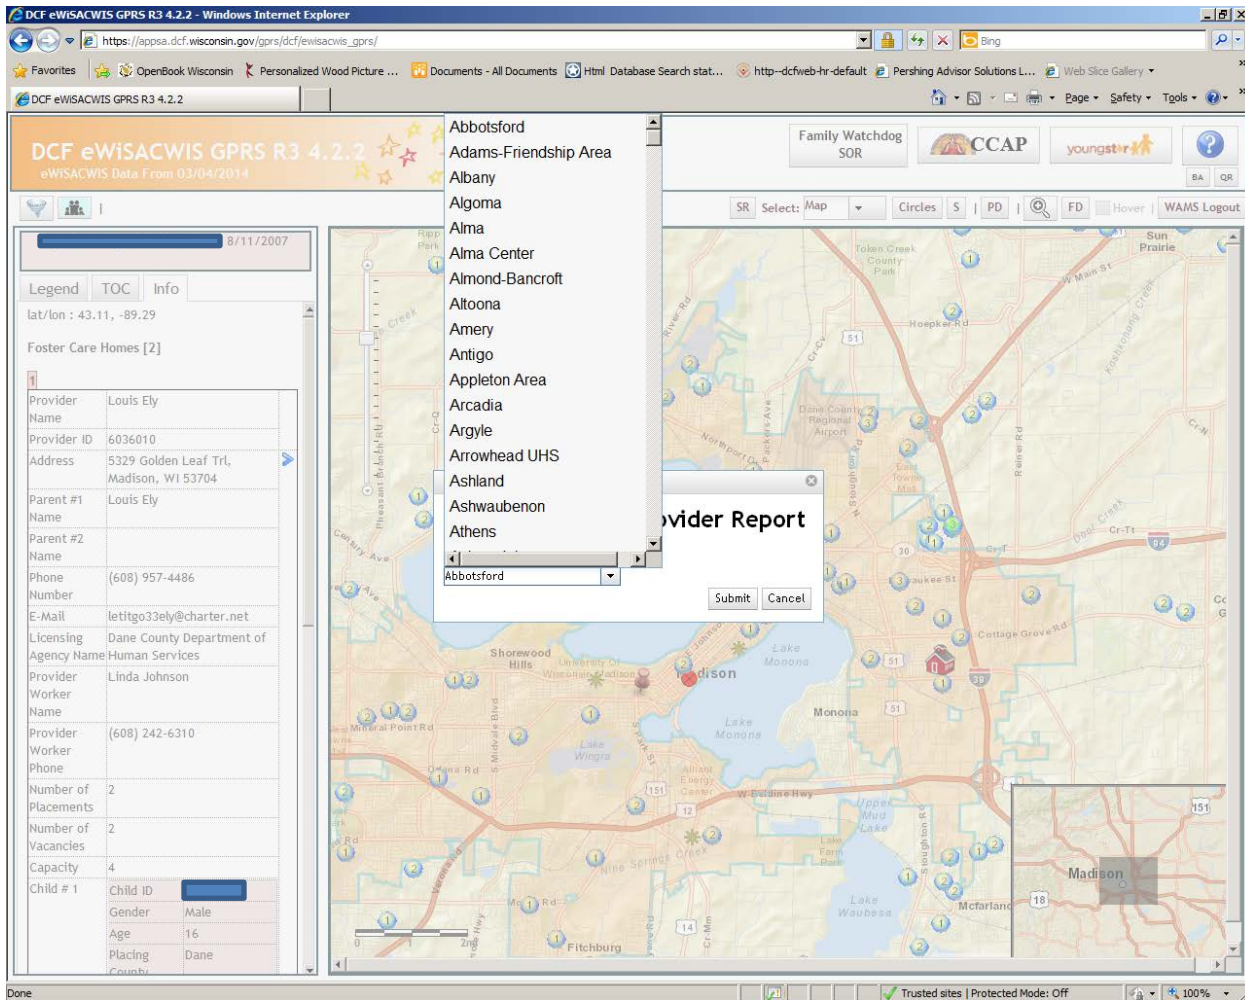

Directly above the WAMS Logout button, you will find the BA and QR options.

- **BA** (Bad Address) – Use this option to request the Bad Address report.
- **QR** – Ignore this option, This option is used by IT to debug any system issues.

School Report (SR)

When you click **SR** on the toolbar, GPRS will prompt you for a School District.

In addition to Provider information, the School Report contains the name, gender, age, eWiSACWIS ID and school name for all children currently placed with the provider.

Select: Map, Polygon or All

If you click the dropdown arrow of the **Select** option, you can select whether you want to use **Map**, **Polygon** or **All**. GPRS will use your selection when you select the **PD** (Provider – Details) option to view the **Selected Providers** report.

If you select “Map”, GPRS will only include providers that are visible on the current map.

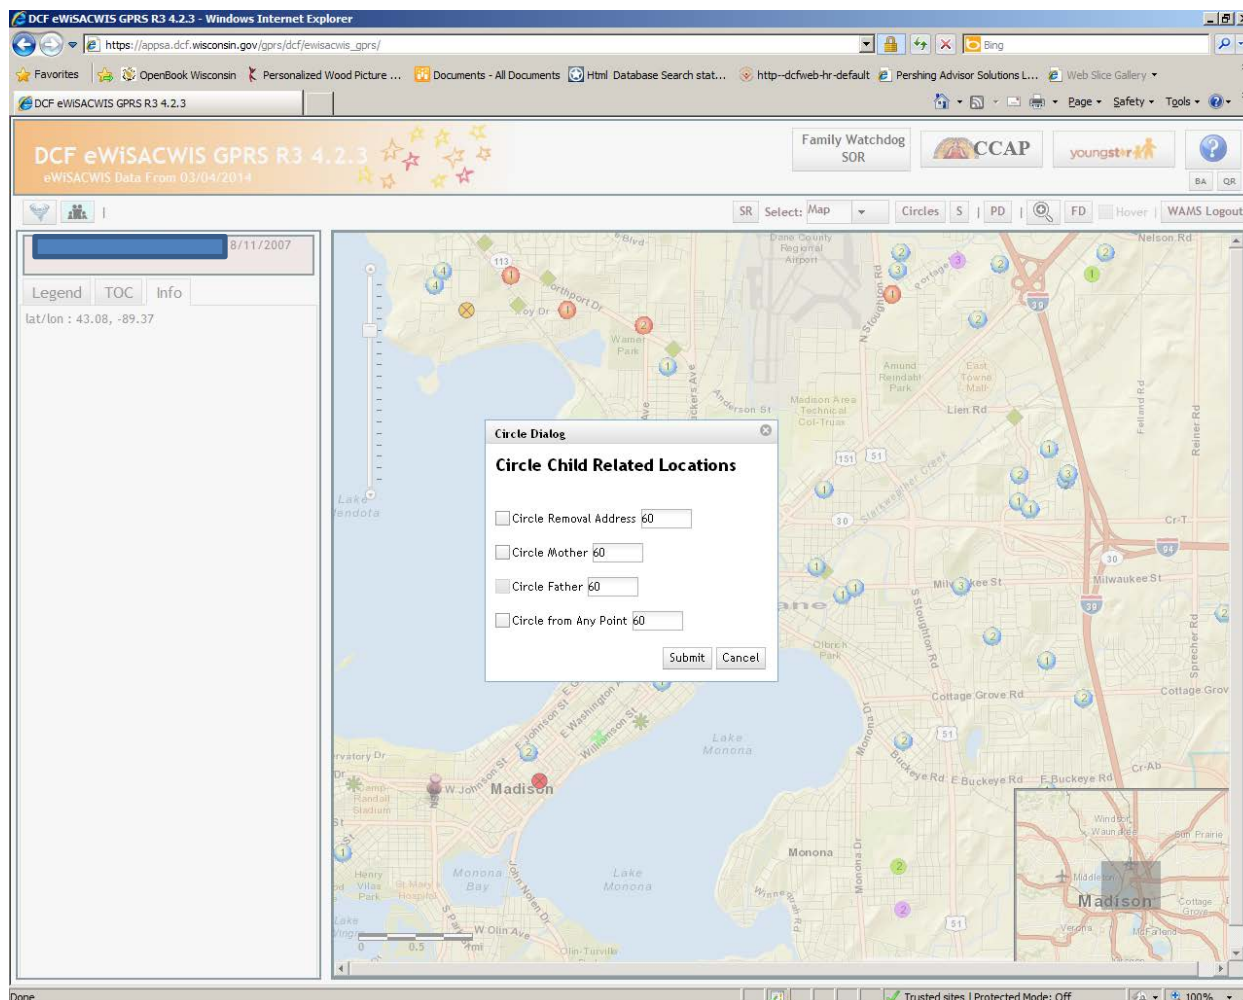

If you select “All”, GPRS will include all providers that satisfy the filter/display criteria.

If you select “Polygon”, you will need to draw a polygon around the providers you would like to include. The example above shows a drawn polygon.

Providers that are only partially included in the “Map” or “Polygon” will not appear on the **Selected Providers** report.

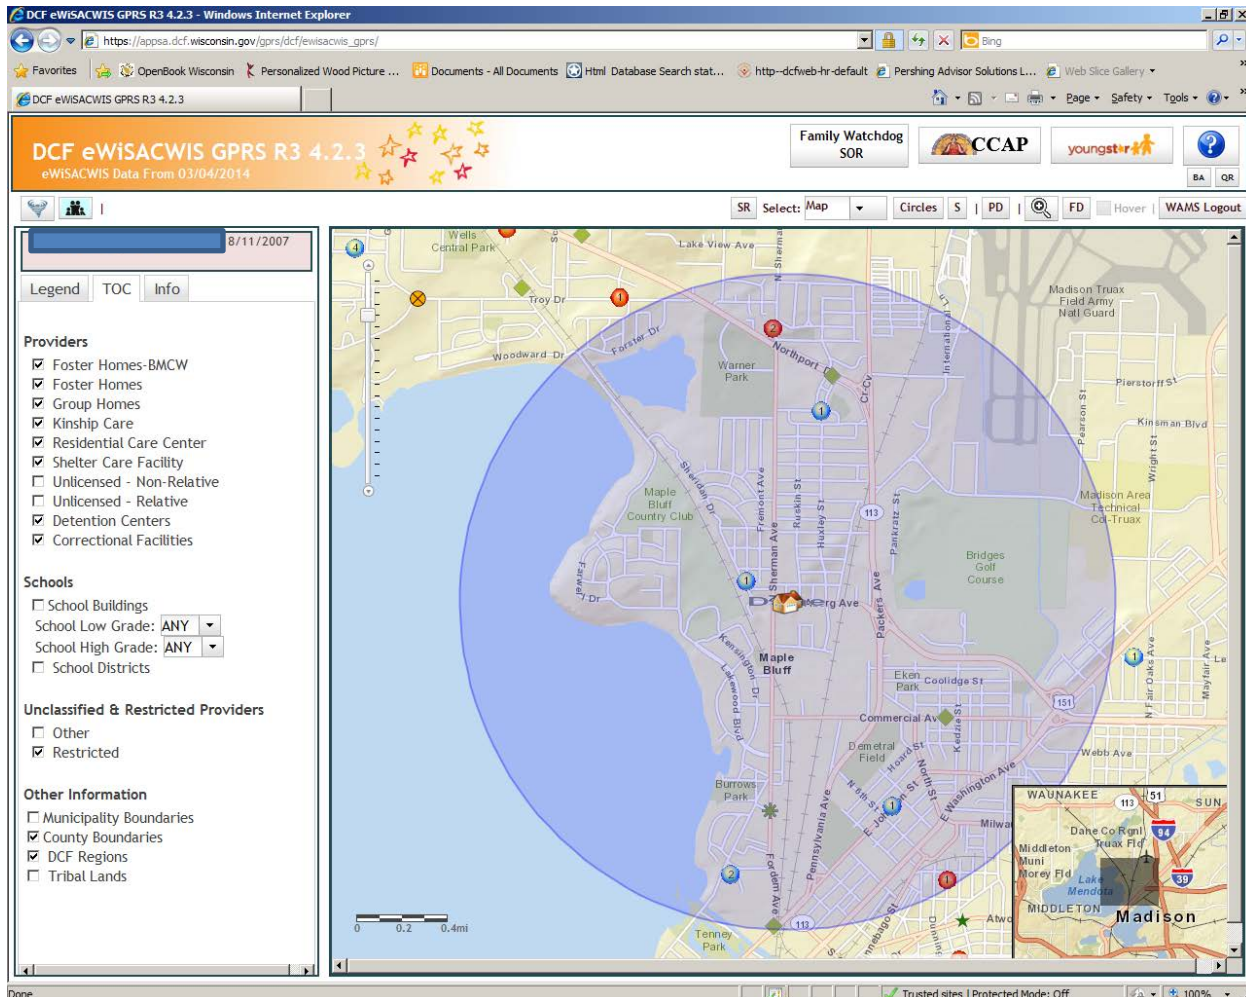

Circles

If you click **Circles**, you will be prompted to select a focal point from which to have a circle drawn.

The default number of miles to use to draw a circle is 60 miles. You can alter the number of miles as you see fit.

If you have not provided a child's removal address, a mother's address or a father's address, GPRS will not allow you to select them as focal points. The check box will be grayed out. In the example above, since I did not provide a father's address, I do not have the option to select it.

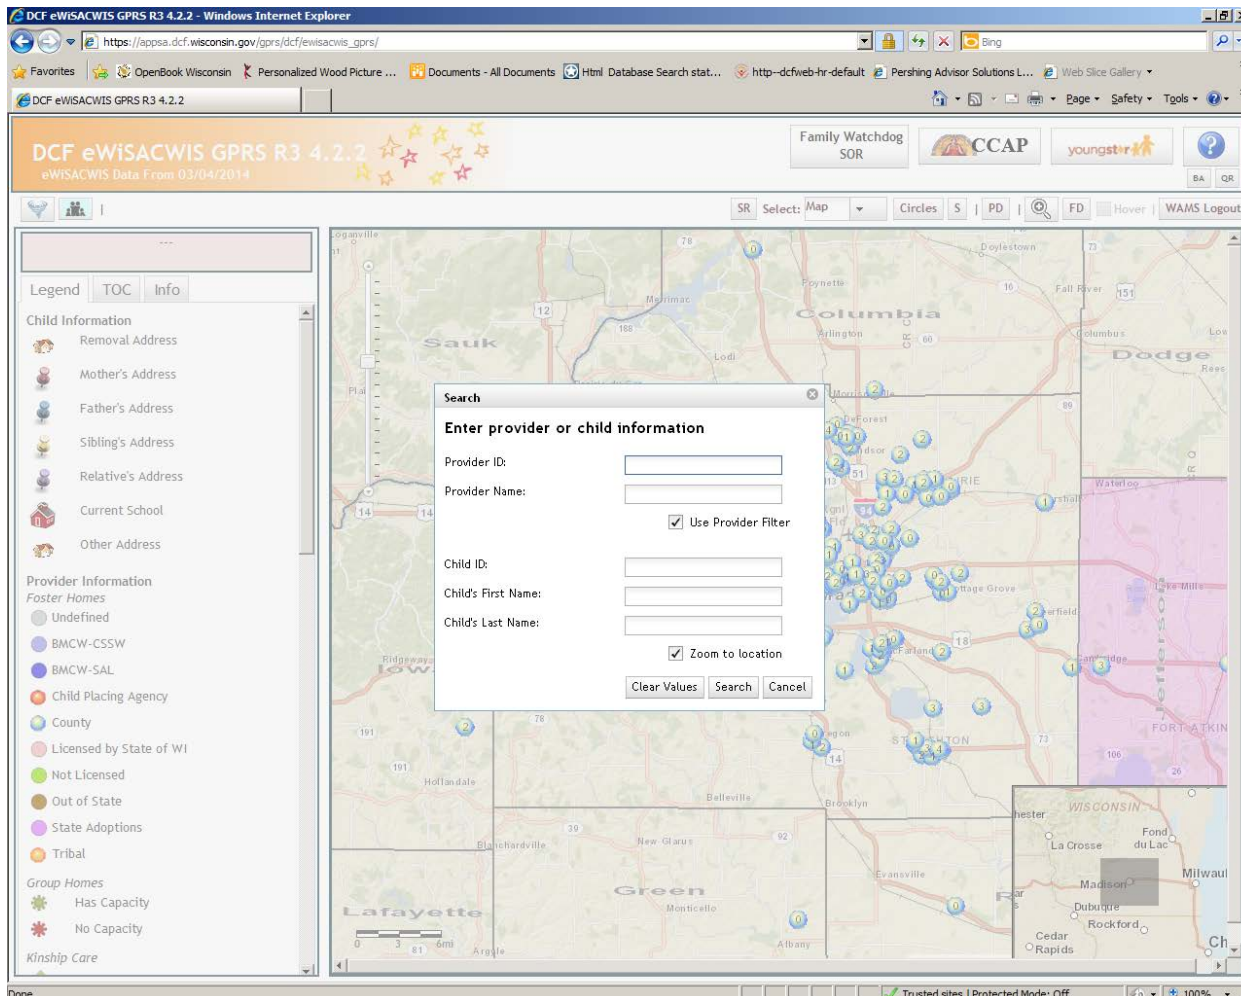

In the example above, I have selected the child's removal address and specified 2 miles to be used to draw the circle.

Once I click Submit, GPRS draws a circle around the child's removal home.

Search Option (S)

GPRS provides you with the option to search for a specific Provider or Child. If you click “S”, you will be prompted to enter either Provider or Child information.

The screenshot shows the DCF eWISACWIS GPRS R3 4.2.2 interface in a Windows Internet Explorer browser. The main window displays a map of Wisconsin with various locations marked by colored circles. A search overlay is visible, prompting the user to enter provider or child information.

If GPRS cannot find the child based on the information provided, it will display the message “Could not find child”.

If you provide the Child's Last Name but NOT the Child's First Name, GPRS will display all children with the last name provided. In the example below, I indicated that I want to search on children whose last name was "Medina". GPRS looked for all children whose last name contained M-E-D-I-N-A. You can then select the child you'd like to search for.

Once you select the child you want to search for, GPRS will locate on the map the provider that the child has been placed with and place a green cross on the provider's icon.

GPRS will display the Child's information in the Info tab.

If the child has been placed with a provider that does not meet the Filter / Display criteria you provided, GPRS will still navigate to the appropriate spot on the map and will display a bull's eye on the appropriate provider. GPRS will display information on the provider and the children placed with the provider in the Info tab.

You MUST use WAMS logout to logout of GPRS.

WAMS Login Errors

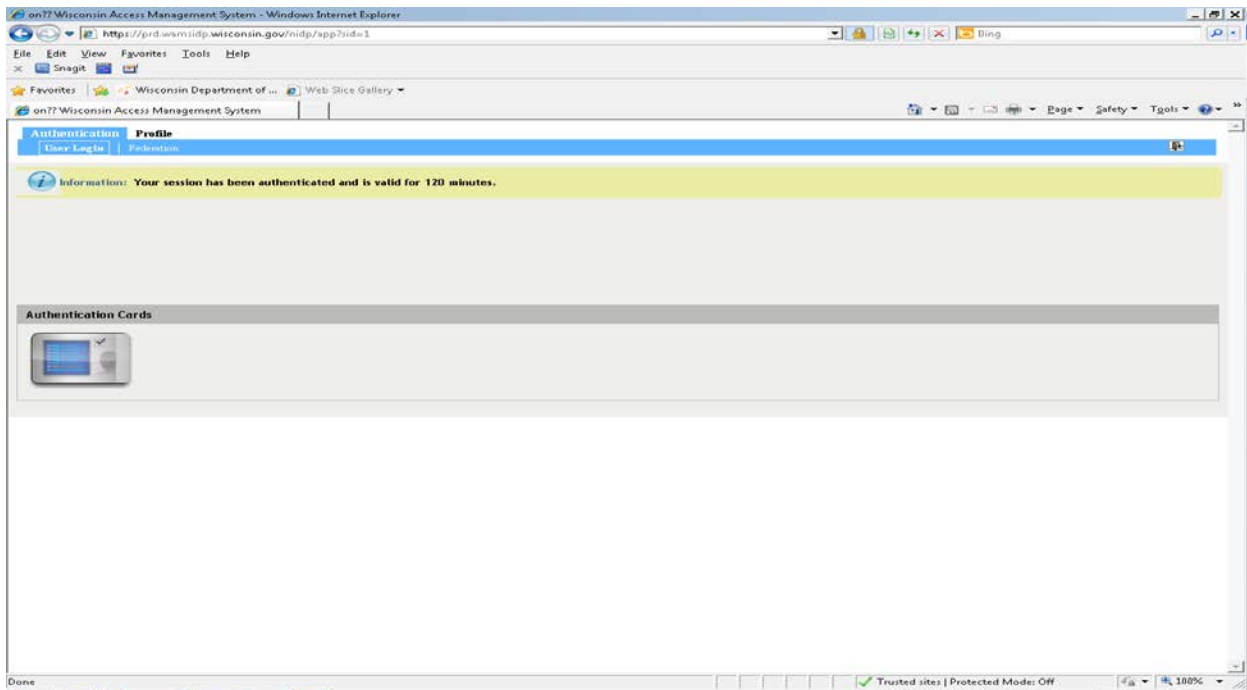

If you do not use “WAMS logout” to logout of GPRS, you may experience problems the next time you try to login. If you experience the following situation:

Use the following link to access “Help Wisconsin Support”: <https://on.wisconsin.gov/WAMS/FormattedEmail>. When you see the screen below, click on “Logout””. You should now be able to access GPRS. You may have to close your browser and launch another browser session before trying to access the application again.

Another potential login error occurs when you saved the wrong url to your favorites. Refer to the **Logging In** instructions of the GPRS User’s Guide.

Correct the url to the one listed on page 3 and attempt your login again.

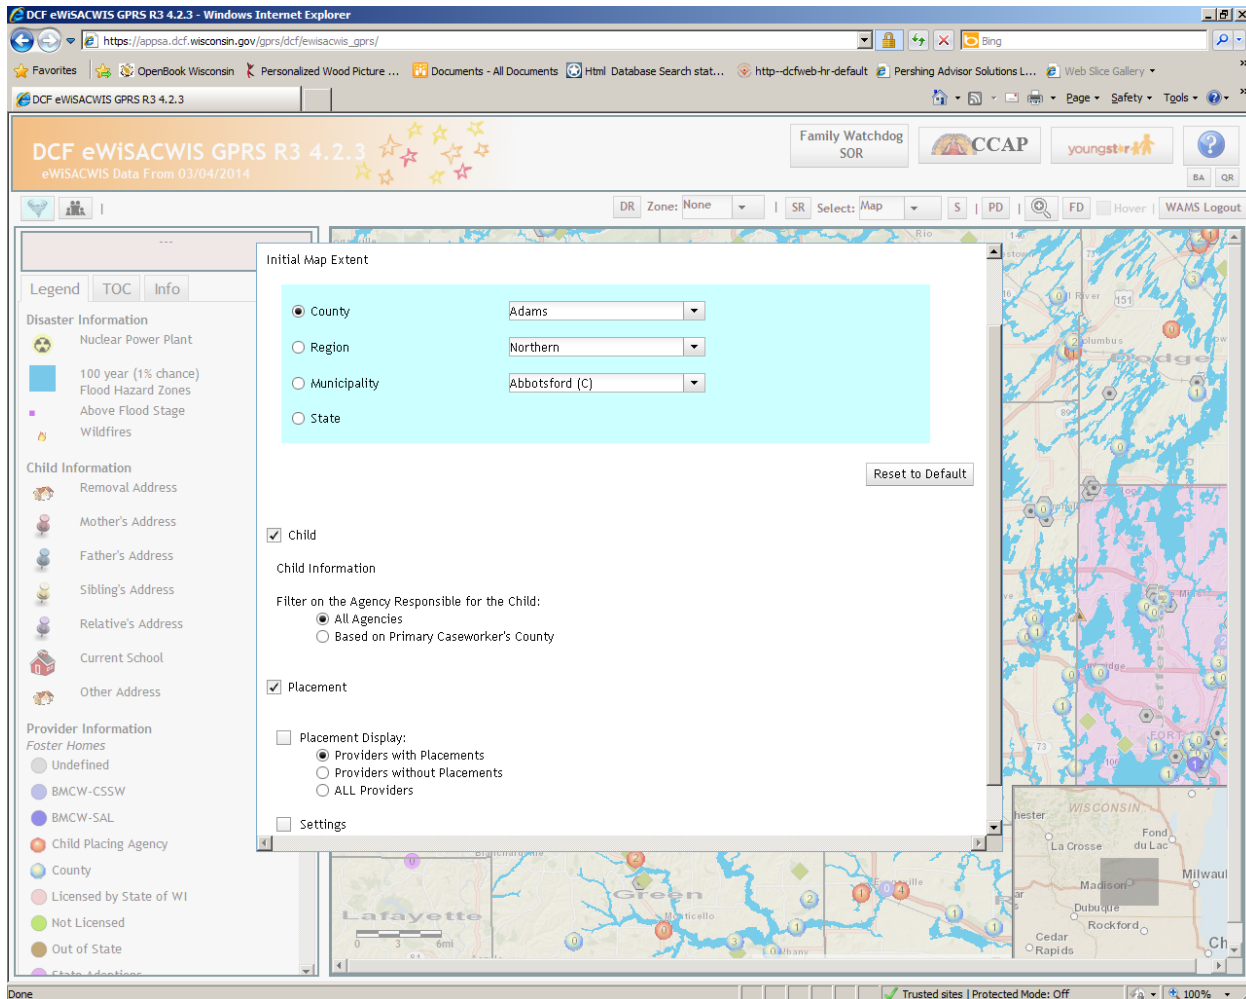

Disaster Preparedness

Launching Disaster Preparedness

There are 2 ways to access the **Disaster Preparedness** mode of GPRS.

- You can access the Disaster Preparedness mode upon initiating the GPRS application
- You can access the Disaster Preparedness mode from within the OHC Placement mode.

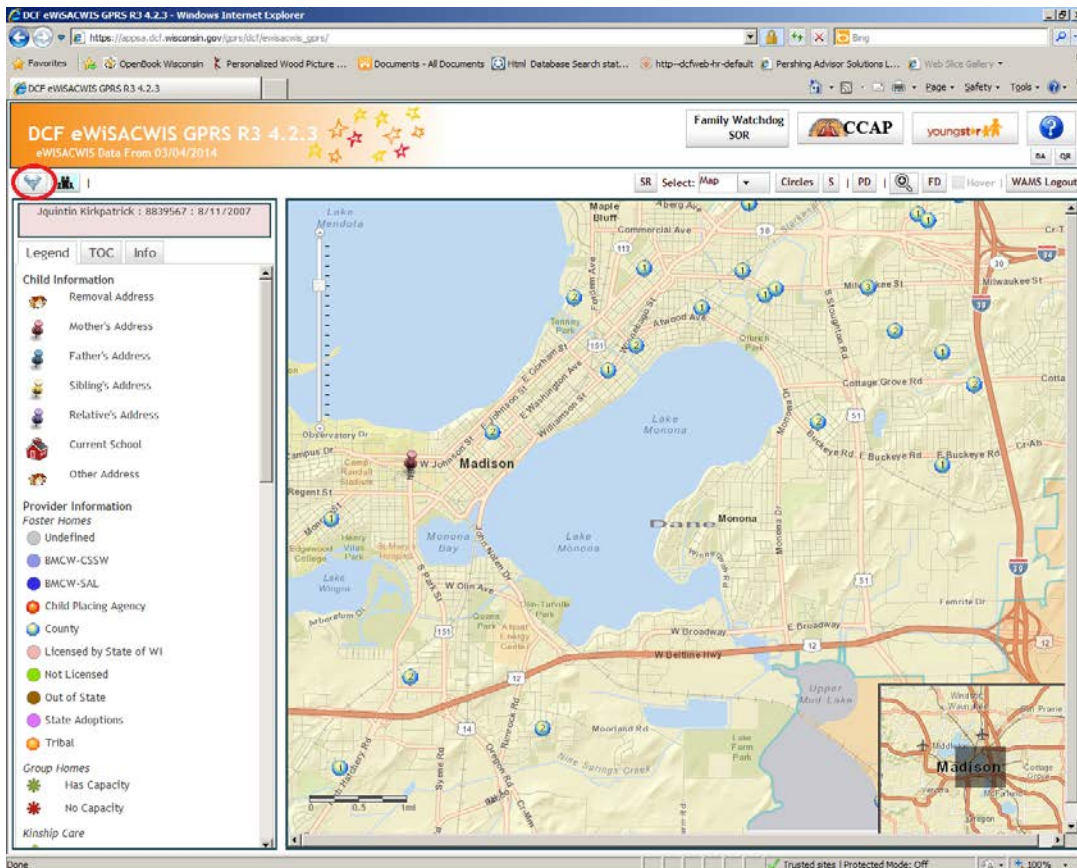

If you access Disaster Preparedness upon initiating the GPRS application, GPRS will present a **Filter/Display Dialog** box that is somewhat similar to the one presented in OHC Placement mode. It contains the Initial Map Extent option but the Filter/Display criteria are quite different.

If you select “Child”, you will have the opportunity to indicate whether you want to see ALL providers or whether you only want to see provider’s based on the Primary Caseworker’s county.

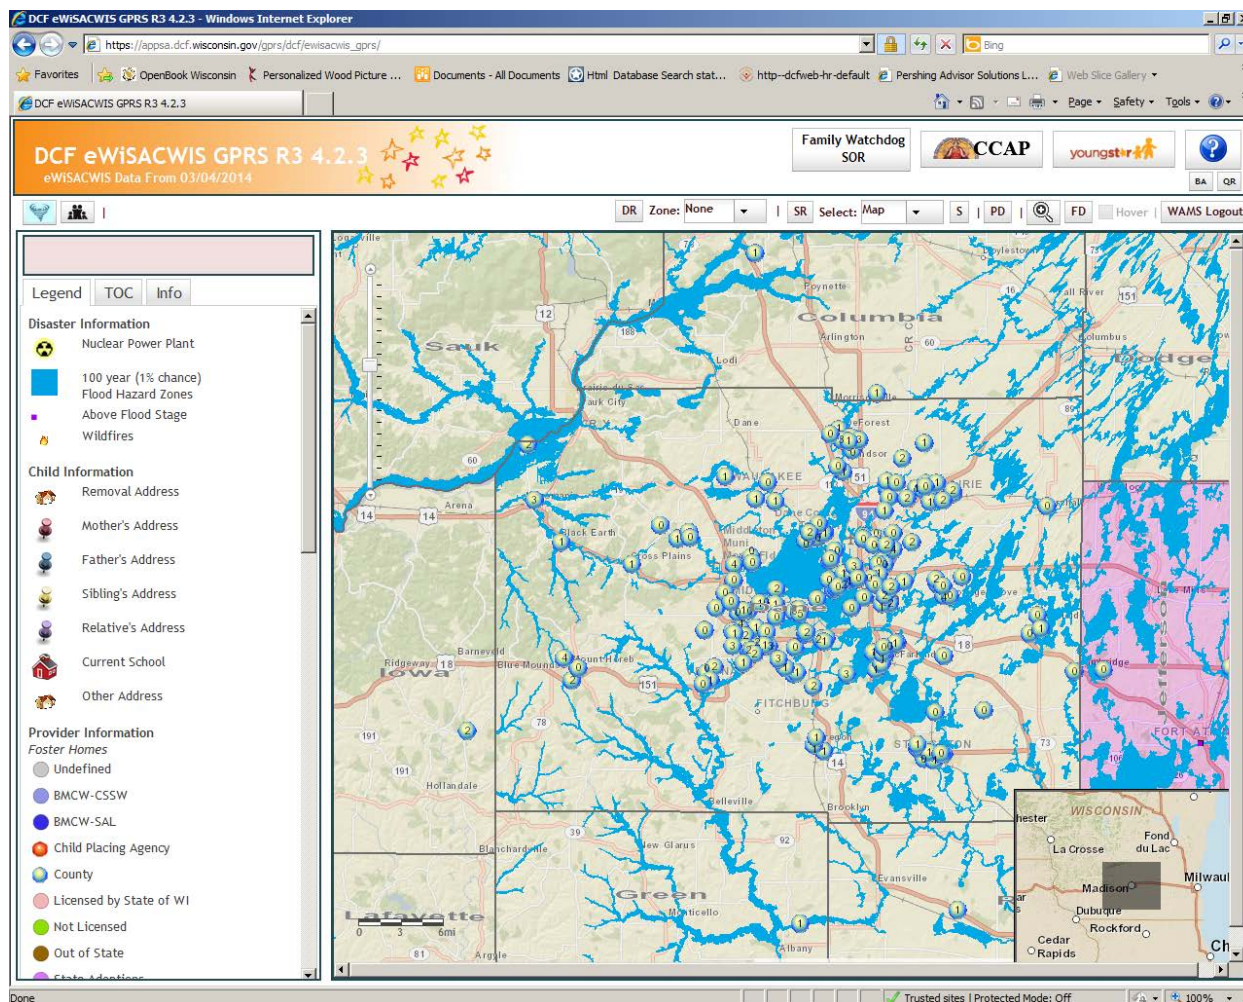

If you select “Placement”, you will have the opportunity to indicate whether you want to see ALL providers or only see providers with/without placements.

The second way to access **Disaster Preparedness** is by navigating there from the OHC Placement mode. Simply click the tornado icon on the top left hand corner of the GPRS screen.

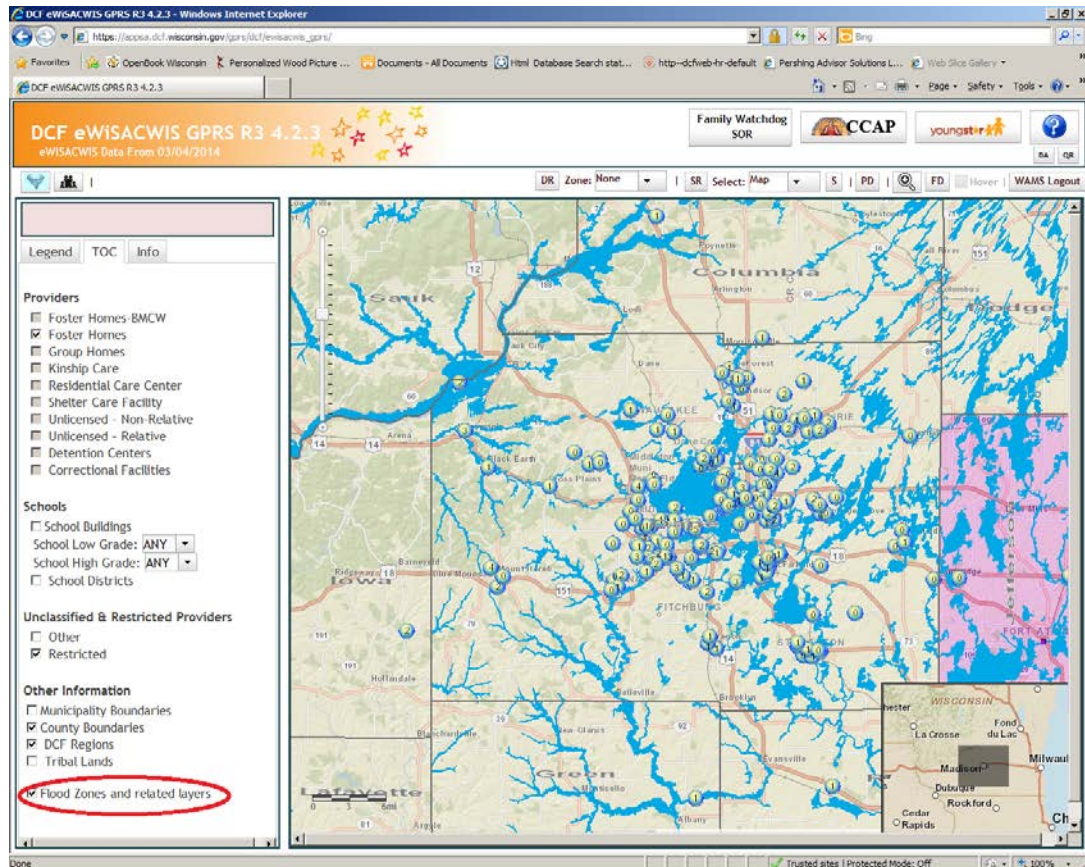

You will receive a warning message indicating that “Any placement information settings that are not relevant to the Disaster mode may be lost”. This refers to any circles or polygons that may have been drawn. They will be lost when you navigate to Disaster Preparedness mode.

Once you have submitted your filter/display criteria, GPRS will present a map with flood zones and providers that meet your selection criteria.

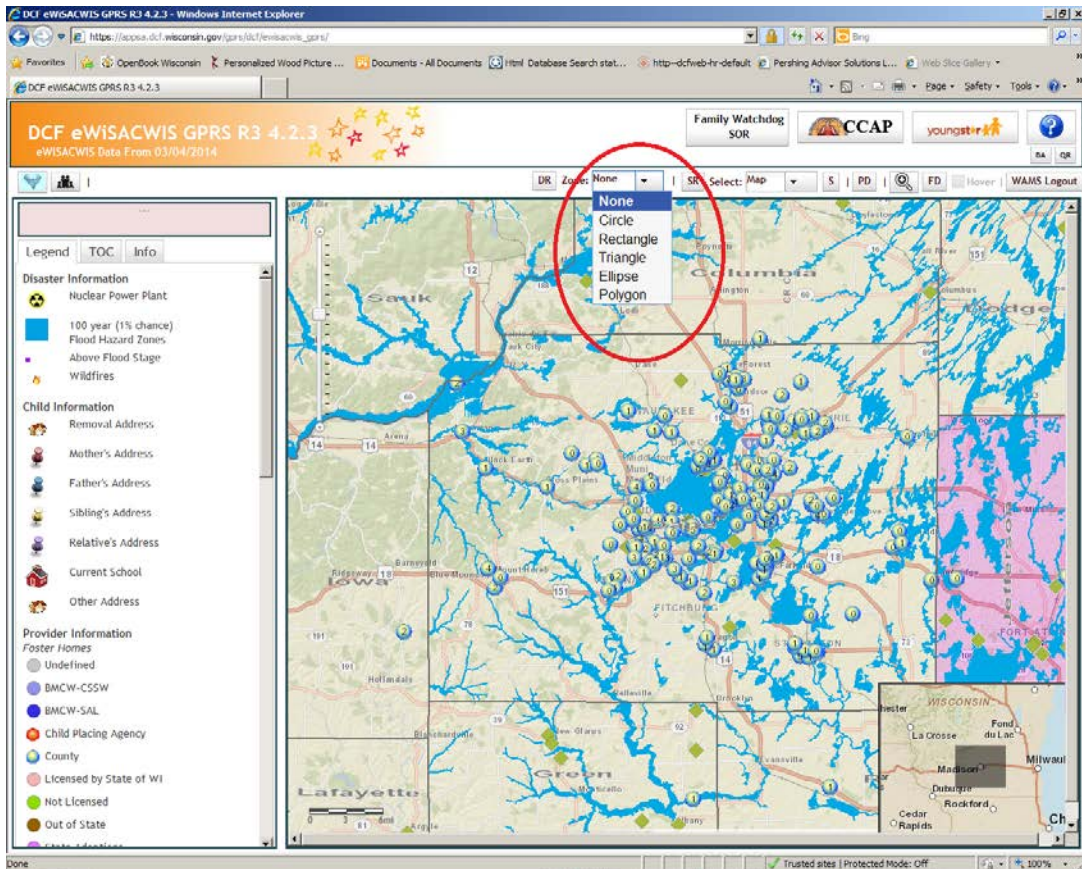

Disaster Preparedness TOC

You can turn the flood zones on and off by using the TOC tab. Click and/or unclick the **Flood Zones and related layers** located on the bottom of the tab.

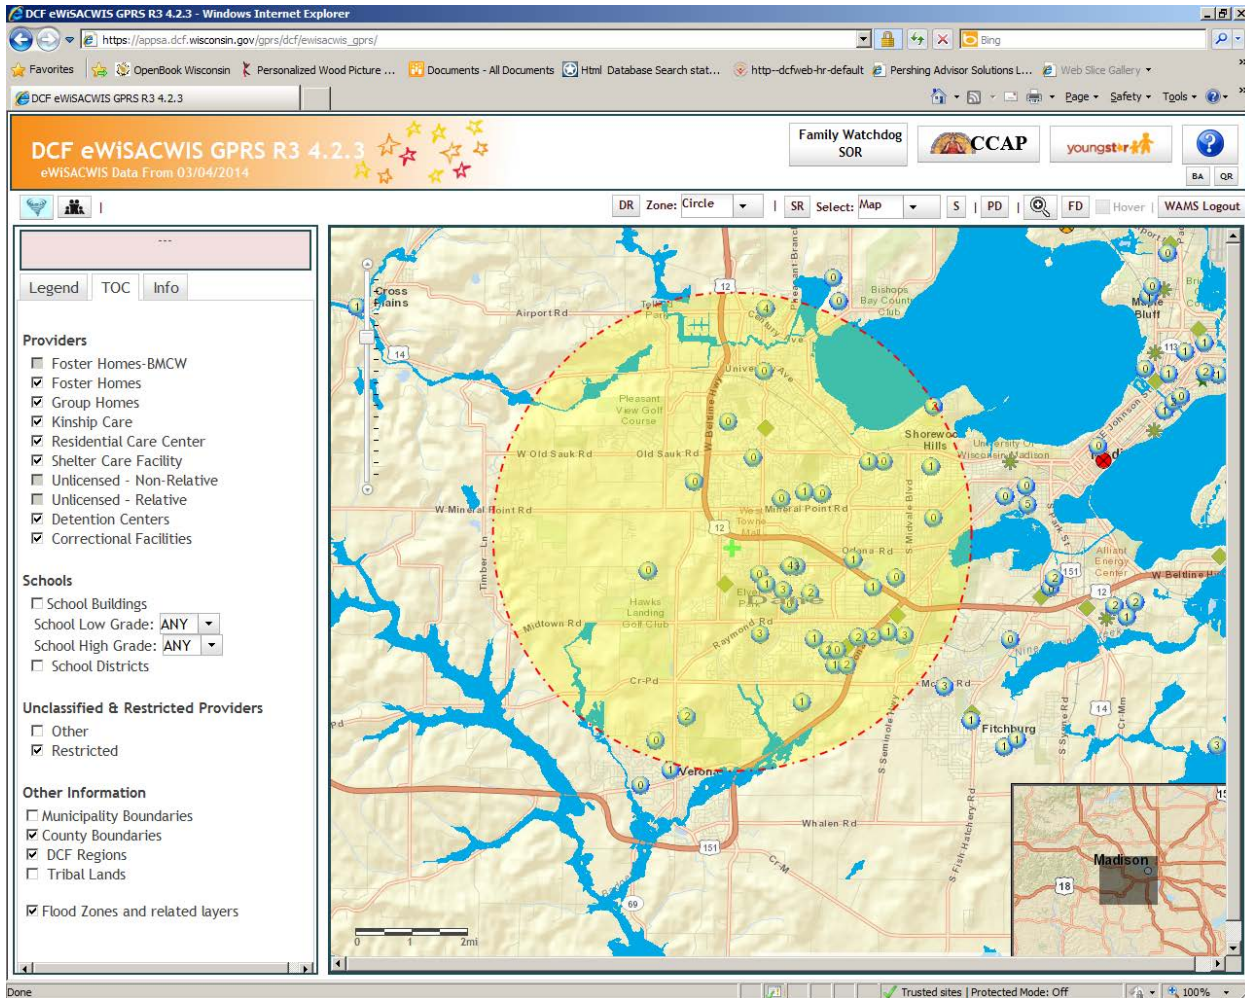

Disaster Preparedness Toolbar

The **Disaster Preparedness** toolbar is almost identical to the **OHC Placement** toolbar. The only exceptions are the **DR** (Disaster Report) option and the Zone option.

Zone

If you click Zone, you will have the option of indicating a disaster zone by selecting one of the shapes shown above. In the example below, a circle was drawn to indicate the disaster zone.

DR (Disaster Report)

If you click the **DR** (Disaster Report) option, GPRS will present you with all the providers within the disaster zone. This report will also include information about the children currently placed with the provider and other members of the home.
