## How to Remotely Connect to DCFVDI on iPad (Windows 10)

1. Double-click the icon you normally use to connect to your VDI.

- 2. This step is only done the first time:
  - a. Tap on Servers

	Rece	ent		
VDMSBITSTSS				
vdi.dcf.wisconsin.gov				
		/		
		ېنې (	2	
	Bosont Convers	Sattings A	i dele	

## 3. Tap on New.

		Server	S		New
vdi.dcf.wisconsin.gov					
	() Poccast		۲ Cottings	(?) Main	
	() Barant	Concest.	şçîş Enstitune	(?) Kiała	

4. Enter "dcfvdi.wisconsin.gov" in the Server Address field. Tap Add Server.

Cancel	Server Setup	
	vmware Horizon	
	dcfvdi.wisconsin.gov Description (optional)	
	Add Server	
5 C D		~

5. This step is your standard Vasco Two-Factor login. Enter your Username and Passcode just like you normally would, except enter your **ACCOUNTS** domain username instead of your **DCFINT** domain username.

Cancel		
	<b>vm</b> ware Horizon	
	bttps://dcfvdi.wisconsin.gov	
	ENTER YOUR VASCO USER NAME AND PASSCODE.	
Å	Username	
Z	Passcode	
	Login	
		$\sim$

6. Enter your DCFINT domain credentials.

	vmware Horizon	
	https://dcfvdl.wisconsin.gov ①	
	Remains	
	Domain DCFINT >	
	Login	
0 0		

## 7. Tap on your VDI.

Logout				
DCFVDI	DCFVDIA	DCFVEval		
	0.5	Arritan Entitions	(?) Mela	

8. You will now have two VDI options to select from. You can remove the original one that is labeled "vdi.dcf.wisconsin.gov."
