

# Installing Two Factor Authentication (Digipass Auth-ES) on a Smart Phone

---

## iOS Devices

- Launch App Store

- Search for **Mobile Authenticator ES** and install

- Open the Mobile Authenticator ES App that you downloaded.
- Tap the **Manual QR Code** choice. Allow the iPhone to access the Camera.
- Hold the iPhone's Camera over the Virtual Token QR Code (jpg image).
- When the QR Code successfully loads on the customer's iPhone, a numeric digipass code will be displayed.

## Android Devices

- Launch the Google Play Store

- Search for **Mobile Authenticator ES** and install

- Open the Mobile Authenticator ES App that you downloaded.
- Tap the Manual QR Code choice. Allow the iPhone to access the Camera.
- Hold the iPhone's Camera over the Virtual Token QR Code (jpg image).
- When the QR Code successfully loads on the customer's iPhone, a numeric digipass code will be displayed.
