Omnissa Horizon Client Installation Instructions for Windows

These are the steps to download and install the Omnissa Horizon Client to enable remote connection to your DCF Virtual Desktop Infrastructure (VDI). Your computer needs to be running Windows 10 or 11 and have rights to install software. *NOTE: A restart is needed once installation is complete, so save anything you need to and close other applications now to avoid losing work.*

1) Click this link:
   Https://dcfvdi.wisconsin.gov
   or copy and paste it into your favorite browser (example pictures show Google Chrome).

2) On the web page that comes up, click on **Horizon Client for Windows**.

You must use Horizon Client for Windows to access this Server.

Horizon Client for Windows may already be installed.
To connect, start the Horizon Client and enter the server address.
If the Client is not installed, you may download it from the link below.
Contact your local Administrator if you have any questions.
