Internet Explorer 7 Settings for Windows Vista

1. Open Internet Explorer and click on Tools > Internet Options.
2. Select the Security tab, click on ‘Trusted sites’. Verify that the ‘Enable Protected Mode (requires restarting Internet Explorer)’ check box is NOT checked. Click the ‘Sites’ button.
3. Type “*.dhfs.state.wi.us” in the ‘Add this website to the zone’ box, make sure the ‘Require server verification (https:) for all sites in this zone’ check box is not checked, then click the Add button. Click Close when complete.
4. Click on the Privacy tab, and in the Pop-up Blocker section, click the Settings button.
5. In the Address of website to allow field, type “*.state.wi.us” and click the Add button. Click Close.
6. Click OK.
