The Department of Children and Families is an equal opportunity employer and service provider. If you have a disability and need to access services, receive information in an alternate format, or need information translated to another language, please call the Division of Safety and Permanence at (608) 266-8787. Individuals who are deaf, hard of hearing, deaf-blind or speech disabled can use the free Wisconsin Relay Service (WRS) – 711 to contact the department.

# About the Wisconsin Out-of-Home Care (OHC) Report

The Out-of-Home Care (OHC) Report provides an overview of children placed in OHC throughout the 2024 calendar year. This year's report is reflective of changes compared to the prior report to better represent the current landscape and trajectory experienced by children and youth while they are in Wisconsin's out-of-home care system.

The OHC Report provides information on children in OHC placements during calendar year (CY) 2024 and on December 31, 2024. This report includes information on demographics, trends in the OHC system, placement data, and outcomes data (stability, discharges, length of stay, etc.). Counts presented in this report may differ from other published information depending on data maturity, the source of data utilized, or the source.

Wisconsin remains committed to continued improvements in putting families first and reducing racial disproportionality throughout the system. In 2024, the Department of Children and Families (DCF) invested \$30 million in in-home support services, ranging from Target Safety Support Funds (TSSF), Home Visiting (HV), and Family First Funds. Between 2020 and 2024, Wisconsin removed **2 fewer** children per day and decreased the overall number of children served in OHC by **17%**. It is worth noting that the OHC Report consistently measures metrics over a five-year period. This report contains data from 2020 which was an anomalous year due to the COVID-19 pandemic in which Wisconsin had record low removal numbers.

**Additional Resources:** For more information on current placements and placements at time of entry and exit, [see the Wisconsin OHC Dashboard](#).

# Wisconsin Child Welfare Model for Practice

## Putting Families First

Wisconsin's child welfare services help children thrive in safe environments and empower families to provide safe, permanent, and nurturing homes for their children. Local communities and their child welfare agencies and families, with the support and guidance from federal and state partners, do this by supporting children and youth in their own homes, families, tribes, and communities whenever possible. With a focus on family and community, we will engage with children, youth, and families to expand healthy connections in their communities and tribes and to bolster resiliency in families to help them thrive.

# Wisconsin's OHC Landscape

A total of **9,386** children had an OHC stay in 2024, representing a **17%** reduction since 2020. In this same time frame, Wisconsin has seen a **16%** decrease in children entering OHC. The number of children in OHC has declined for the past **seven** consecutive years.

As of December 31, 2024, **5,954** children were in OHC in Wisconsin.

# Who is entering OHC?

Over the last decade, neglect has continued to be the primary reason identified for removal. While the percentage of children entering OHC due to neglect has decreased from **65%** in 2022 to **54%** in 2024, it remains the most prevalent reason for child removal and entry into OHC. There was a decrease from **8%** to **6%** of children entering OHC due to housing challenges.

## Why are children entering into OHC?

\*Please refer to pg. 14 for a comprehensive list of removal reasons. Please note children may have multiple removal reasons, thus the total documented reasons is greater than the number of children entering OHC.

## Trends of the top seven removal reason rates of the past 5 years

# Who is in OHC?

## Race and ethnicity of children in OHC compared with general population\*^

The data on this page are a count of **5,954** children residing in OHC on 12/31/2024.

Although the overall number of children in OHC decreased from 2020 to 2024, the population of Black/African American children in OHC proportionally increased from **32% to 35%** in that same timeframe. The Black/African American children's entry and OHC placement rate is **3 times** higher than the Black/African American children living in the state. Similarly, the Native American children's entry and OHC rate is **8 times higher<sup>+</sup>** than the Native American children living in the state.

The majority (**69%**) of children served in OHC were aged 0-11 years old. The proportions of age groups has remained constant over the past five years, even as the number of children in OHC decreased.

\*Count of Native Hawaiian/Pacific Islander and Unknown children are not shown as they make up 0% (2) and 2% (90), respectively, of children in OHC.

<sup>^</sup>The Wisconsin Child Population is as of 2023 from the Office of Juvenile Justice (OOJJ) Easy Access Population Profile.

<sup>+</sup>In conjunction with updated OOJJ's census collection, the racial disparity analyses has also been updated to reflect current DSP methodology.

**3%** of children entering OHC are children with a previous adoption. This has remained consistent over the past five years. Over **60%** of this group of children entered directly into a congregate care, shelter, and detention placements.

Disparities are prevalent for children who re-enter OHC post-adoption, disproportionately affecting Black/African American and Native American children. In 2024, Black/African American children comprised **35%** of OHC entries and comprised **32%** of re-entries post-adoption.

# Initial Placement Impacts Child's Experience in OHC

In 2024, **61%** of children in Wisconsin were not placed with a relative when they first entered OHC. While this demonstrates a slight increase in placing children with a relative when they first enter OHC, the majority of children entering OHC are placed with non-relative and facility-based settings. Children's initial placement matters as exposure to the child welfare system inflicts lasting trauma. If OHC is necessary, children should be placed with a relative, and only when that is not an option should the next least restrictive setting be considered.

## Where are children placed when they *first* enter OHC?

Governor Evers signed 2023 Wisconsin Act 119 into law on March 14, 2024, aimed to keep more children with family and like-kin caregivers. This legislation was effective January 1, 2025, and therefore, it is not currently reflected in this year's report.

\*Congregate care placements include RCCs and Group Homes.

<sup>^</sup>Other placements include Institutions, Supervised Independent Living, and Missing from OHC placements.

# Initial Placement Impacts Child's Experience in OHC

When children are placed with relatives, they are less likely to experience subsequent placement moves. In 2024, of all children initially placed with a relative, **76%** did not experience any placement changes during 2024. This is an increase of **2 percentage points** from the previous year.

## Children's stability in OHC impacted by initial placement

In 2024, children **initially** placed with a non-relative foster home changed placements twice as often as children initially placed with a relative. Children initially placed in non-family settings fared worse. Every move a child makes in OHC is a change to their structure and routine. DCF is continuing to implement strategies to improve a child's stability in OHC.

\*Congregate care placements include RCCs and Group Homes.

<sup>^</sup>Other placements include Institutions, Supervised Independent Living, and Missing from OHC placements.

# Relative Placement is Best for Children

If a child needs to be placed in OHC, placing children with a family member is preferred as it is the best way to maintain family connections.

Compared to the previous year, children in OHC saw a decrease in placement with a family member. As of 12/31/2024, placements in family-like settings made up a majority of OHC placements (88%), including 40% of children placed with relatives and 48% with non-relative foster homes. When children are placed with a relative, they spend less time in OHC compared to any other type of placement. In 2024, relative placements were the only setting category where the median length of stay decreased from 2023.

## Placements of children in OHC on 12/31

## Median length of stay by placement on 12/31 of each calendar year

\*Congregate care placements include RCC & Group Homes.

<sup>^</sup>Other placements include Institutions, Supervised Independent Living, and Missing from OHC.

# Placement Stability

## Placement proportions and average placements

The benefits of placing children with a relative are seen throughout a child's experience in OHC. Of the children in OHC at the end of the year, those placed with relatives experienced fewer placements.

\*Count of placements provide a 10-year history of placement data from 1/1/2012 to 12/31/2024.

# Supporting Children Leaving OHC

Returning children to their families and communities is the most desirable outcome for children leaving OHC. In 2024, over **90%** of children who exited OHC achieved legal permanency. For the children that reunified, **75%** were from a family-like setting, of which **47%** were in a relative setting, and **28%** were in a non-relative foster home prior to reunification.

**Over 50%** of Wisconsin children in OHC return home to their family.

## Discharges over time

In 2024, **16%** of children achieved permanency through adoption and **20%** achieved permanency through guardianship.

# Supporting Children Leaving OHC

More children exited OHC (**3,669**) than entered (**3,480**) in 2024. Children have a better chance of thriving when they return to the safety and security of their life with their families.

For the past five years, the length of stay for children exiting OHC remained consistent. Children exiting OHC spent a *median* of **15.5 months** and an *average* of **20.7 months** in OHC. This means there are some children that remain in OHC much longer than their peers.

In 2024, children who reunified with their family were in OHC for a *median* of **9.3** months, which is **6.2 months** less than the statewide *median*, whereas children whose parents' rights were terminated spent more than **3 years** in OHC prior to adoptions.

## How long do children stay in OHC?

## Children returning to OHC

As of 12/31/2024, **21%** of children in OHC have been in OHC multiple times throughout their childhood. While the federal standard for re-entry rate is **8.3%**, Wisconsin's re-entry rate was **10.7%** for children who re-entered OHC within 12 months of returning home.

# Supporting Children Leaving OHC

In 2024, **47%** of children exiting OHC were White, **31%** of children were Black/African American, **10%** of children were Hispanic/Latino, **10%** of children were Native American, and **1%** of children were Asian. Black/African American and Asian children exited OHC at a disproportionately lower rate during 2024 than were in OHC on 12/31/2024.

## Children exiting OHC compared to children in OHC\*

In 2024, while the median length of stay in OHC for all children exiting was **15.5 months**, Black/African American children exiting OHC had a median of **16.7 months**.

# Frequently Asked Data Points

A total of **9,386** children were served in OHC for CY 2024

## Entry into OHC in 2024

Total entries in 2024: **3,480**

Total unique number of children entered in 2024: **3,332**

### Race and Ethnicity:

- **White:** 1,440, (43% of total unique children entering) | **Black/African American:** 1,123, (34%) | **Hispanic:** 328, (10%) | **Native American:** 330, (10%) | **Unknown:** 53, (2%) | **Asian:** 56, (2%) | **Native Hawaiian/Other Pacific Islander:** 2, (0.1%)

### Sex:

- **Female:** 1,559 (47% of total unique children entering) | **Male:** 1,773 (53%)

### Age:

- **0-4:** 1,364, (41% of total unique children entering) | **5-11:** 921, (28%) | **12-14:** 494, (15%) | **15+:** 564 (17%)

### Removal Reasons:

- **Neglect:** 1,874, (54% of total entries)
- **Caretaker Drug Use:** 1,134, (33%)
- **Child Behavior Problem:** 655, (19%)
- **Incarceration Caretaker:** 451, (13%)
- **Physical Abuse:** 377, (11%)
- **Caretaker Alcohol Use:** 309, (9%)
- **Inadequate Housing + Homelessness:** 222, (6%)
- **Domestic Violence:** 171, (5%)
- **Abandonment + Voluntary Relinquishment for Adoption:** 112, (3%)
- **Caretaker Significant Impairment Physical Emotional:** 105 (3%)
- **Prenatal Drug Exposure:** 95 (3%)
- **Sexual Abuse:** 78, (2%)
- **Medical Neglect:** 59 (2%)
- **Runaway:** 52, (1%)
- **Caretaker Significant Impairment Cognitive:** 51, (1%)
- **Child Requested Placement:** 46, (1%)
- **Child Diagnosed Condition:** 43, (1%)
- **Caretaker Death:** 39, (1%)
- **Whereabouts Unknown:** 36, (1%)
- **Caretaker Failure to Return:** 35, (1%)
- **Child Drug Use:** 31, (1%)
- **Inadequate Access to Mental Health Services:** 24, (0.7%)
- **Sex Trafficking:** 15, (0.4%)
- **Prenatal Alcohol Exposure:** 12, (0.3%)
- **Psychological or Emotional Abuse:** 11, (0.3%)
- **Child Alcohol Use:** 10, (0.3%)
- **Education Neglect:** 9, (0.3%)
- **Inadequate Access to Medical Services:** 9, (0.3%)
- **Family Conflict Related to Child's Sexual Gender:** 1, (0.0%)
- **Parental Immigration Detainment or Deportation:** 1, (0.0%)
- **Public Agency Title IV-E Agreement:** 0, (0%)
- **Tribal Title IV-E Agreement:** 0, (0.0%)

To compare data from prior years, please see the archived list of OHC Reports on the [Child Welfare Reports and Dashboard page](#).

# Frequently Asked Data Points

A total of **9,386** children were served in OHC for CY 2024

## Children in OHC on 12/31/2024

Children in OHC on 12/31/2024: **5,954**

### **Race/Ethnicity:**

- **White:** 2,484, (42%) | **Black/African American:** 2,099, (35%) | **Hispanic:** 603, (10%) | **Native American:** 571, (10%) | **Unknown:** 90, (2%) | **Asian:** 105, (2%) | **Native Hawaiian/Other Pacific Islander:** 2, (0%)

### **Sex:**

- **Female:** 2,885, (48%) | **Male:** 3,069, (52%)

### **Age:**

- **0-4:** 2,106, (35%) | **5-11:** 2,000, (34%) | **12-14:** 757, (13%) | **15+:** 1,091, (18%)

### **Disability:**

- **Total number of children with a disability:** 1,007 (17% of total children in OHC on 12/31/2024)

### **Disability List:**

- **None:** 4,947, (83% of total children in OHC on 12/31/2024)
- **Emotionally Disturbed:** 746, (74% of total children with a disability)
- **ADHD:** 501, (50%)
- **Other Diagnosed Conditions(s):** 313, (31%)
- **Anxiety:** 306, (30%)
- **Mental/Emotional Disorders:** 230, (23%)
- **Depression:** 218, (22%)
- **Autism Spectrum Disorder:** 138, (14%)
- **Developmental Delay:** 124, (12%)
- **Asthma:** 107, (11%)
- **Learning Disability:** 97, (10%)
- **Reactive Attachment Disorder:** 75, (7%)
- **Intellectual Disability:** 73, (7%)
- **Developmental Disability:** 43, (4%)
- **Serious Mental Disorders:** 40, (3%)
- **Serious Emotional Disturbances:** 39, (4%)
- **Orthopedic Impairment or Other Physical Condition:** 34, (3%)
- **Seizure Disorder:** 30, (3%)
- **Congenital Malformation:** 26, (3%)
- **Hearing Impairment and Deafness:** 17, (2%)
- **ADD:** 17, (2%)
- **Visual Impairment and Blindness:** 16, (2%)
- **Diabetes:** 10, (1%)

**Median Length of Stay:** 15.0 months

**Average Length of Stay:** 21.0 months

To compare data from prior years, please see the archived list of OHC Reports on the [Child Welfare Reports and Dashboard page](#).

# Frequently Asked Data Points

A total of **9,386** children were served in OHC for CY 2024

## Children Exiting OHC in 2024

Total exits in 2024: **3,669**

Total unique number of children exited in 2024: **3,594**

### **Race and Ethnicity:**

- **White:** 1,679, (47% of total unique children exiting) | **Black/African American:** 1,127, (31%) | **Hispanic:** 359, (10%) | **Native American:** 350, (10%) | **Unknown:** 44, (1%) | **Asian:** 33, (1%) | **Native Hawaiian/Other Pacific Islander:** 2, (0.1%)

### **Sex:**

- **Female:** 1,680 (47% of total unique children exiting) | **Male:** 1,914, (53%)

### **Age:**

- **0-4:** 1,092, (30% of total unique children exiting) | **5-11:** 1,151, (32%) | **12-14:** 479, (13%) | **15+:** 878 (24%)

### **Discharge Reason:**

- **Reunification:** 2,041, (55% of total exits)
- **Guardianship:** 732, (20%)
- **Adoption:** 574, (16%)
- **Aging Out:** 245, (6.8%)
- **Transfer to Other Agency:** 48, (1.3%)
- **Living With Other Relatives:** 18, (0.5%)
- **Missing from OHC:** 6, (0.2%)
- **Death of Child:** 5, (0.1%)

**Median Length of Stay:** 15.5 months

**Average Length of Stay:** 20.7 months

To compare data from prior years, please see the archived list of OHC Reports on the [Child Welfare Reports and Dashboard page](#).

## **Appendix A**

### **Out-of-Home Care Provider Types**

In Wisconsin, there are a variety of placement settings which can be used to best meet the needs of a given child or youth. These settings are addressed in this report and include the following:

**Foster Family Homes:** Foster family homes can include both the home of a relative and unrelated individuals. Foster family homes are licensed by local child welfare agencies based on state statutes. Receiving homes are licensed foster homes that take children for short term placements with little notice.

**Treatment Foster Homes:** Treatment foster homes are licensed by child placing agencies, either through a county or a private agency. Private child placing agencies are licensed by Department of Children and Families (DCF). Treatment foster homes serve children with more intensive service needs that require specialized care.

**Pre-Adoptive Homes:** Pre-adoptive foster homes are licensed by a county or public adoptions. Children are placed in pre-adoptive homes with the intention of permanency being met by adoption in the near future. Adoptions occur with both relatives or non-relatives.

**Group Homes:** A group home is a facility operated by a person licensed by DCF to provide 24 hour care for 5-8 residents. Within this report, this category includes providers with Qualified Residential Treatment Program (QRTP) certification.

**Residential Care Centers (RCCs):** RCCs are residential facilities that are operated by local child welfare agencies licensed pursuant to section 48.60 of Wisconsin Statutes for the care and maintenance of children. Children placed in a RCC have significant needs that cannot be addressed in a family setting. Within this report, this category includes providers with Qualified Residential Treatment Program (QRTP) certification.

**Shelter Care Facilities (SC):** Shelter care facilities provide short-term (not to exceed a total of 60 days), non-secure residential care and physical custody to children pending court action or voluntary placements for under 20 days or crisis stabilization services for up to 5 days.

**Detention:** A detention facility under certain circumstances can be used as an out-of-home care placement when being used as or becomes a primary physical placement of the child.

**Hospital/Mental Health Facility:** Hospital/mental health facility could be used as an out-of-home care placement when the child subsequently enters into one of the placement settings listed above or when the hospital or inpatient facility placement takes place within a current placement episode.

**Youth/Adult Correctional Facilities:** Youth/adult correctional facilities are secured facilities operated by the Department of Corrections.

**Appendix B**  
**Child Age Range by County**  
**Count and Percent of Children in Out-of-Home Care**  
**December 31, 2024**

County	0 - 4 Years		5 - 11 Years		12 - 14 Years		15 and above		Grand Total

## Appendix J

### ICWA and Native American Status

A child's and provider's Native American status is determined based on race, ethnicity, or ICWA status. Below are the eWiSACWIS documentation guidelines for ICWA and Native American status:

#### **Indian Child Welfare Act (ICWA)**

In eWiSACWIS, there are up to three Tribal Membership statuses documented for a child/provider. ICWA status for a child/provider is determined based on these statuses, as identified below –

- ICWA Child/Provider status is set to 'Yes', when the Tribal Membership status is any of the following –
  - (a) Member
  - (b) Eligible for membership, not a member
  - (c) Pending
- ICWA Child/Provider status is set to 'No', when any of the Tribal Membership status is 'Not eligible for membership'
- ICWA Child/Provider status is set to 'Unknown', when there is no information documented for a child for Tribal Membership status. In absence of any information, the status cannot be identified and is set to 'Unknown'.

#### **Native American**

In eWiSACWIS, there are up to five different races documented for a child. Native American status for a child/provider is determined based on race, ethnicity or ICWA status for a child/provider, as identified below –

Native American child/provider status is set to 'Yes', when any of the following is true –

- Child/Provider race is 'American Indian/Alaska Native' (across all five races) or
- Child/Provider ethnicity is 'Native American' or
- Child/Provider ICWA status is 'Yes'. (Refer to the explanation above on how to determine ICWA child)

Native American child/provider status is set to 'No', when child/provider's race, ethnicity and ICWA status do not match the required information as outlined above.

## Appendix K

### Key Definitions

**Child:** Term used to address both children and youth served by county child welfare agencies, county youth justice agencies, DMCPs, and public adoptions.

**Discharge:** A child's OHC episode ends with the date a child is discharged from OHC. The discharge date represents the date the child achieves a permanent outcome, which is reunification, adoption, or guardianship.

**Placement:** The use of a facility or home provider for the physical placement of the child who has been removed from their family home.

**OHC Episode:** A placement episode starts with a child's removal from home and ends with a discharge from OHC to a permanent home or to independent living. A child may be placed in multiple placement settings within a placement episode.

**Placement Settings:** Child welfare agencies attempt to have a child stay in only one setting during their OHC episode. However, in some cases a child may be placed with multiple providers or in different placement facilities during a single placement episode. These changes may be due to actions initiated by the agency, the provider, the child, the parent, or the court. Placement settings include:

- Foster homes, including receiving homes, foster family homes of all levels and pre-adoptive foster homes
- Unlicensed relative and non-relative homes
- Group homes
- Residential care centers (RCCs)
- Court Ordered Kinship Care
- Shelter care
- Detention
- Trial reunification
- Supervised independent living
- Hospital/Mental Health facility
- Missing from OHC

A child or youth is considered Missing from OHC when they are under the placement and care responsibility of the department or a county agency, living in an OHC setting, and any of the following criteria are met:

- The child or youth has been missing for 8 hours or for a period of time that cannot reasonably be justified by the child or youth's age, maturity, or emotional capacity as well as documenting the child's or youth's missing episode in eWiSACWIS within 24 hours.
- When efforts to locate the child or youth have been unsuccessful.
- When it is known or suspected that a child or youth has been taken by force or coercion.
- When the child or youth is in the company of an unauthorized person or located in an unauthorized place.

**Removal:** A child's placement episode begins with the date of the child's removal from their home. The child is taken into physical custody and enters into OHC under a court order or via a formal voluntary placement agreement among the agency, the parents, and the placement provider. Information regarding the types of out-of-home care providers used can be found in Appendix B.

**Use of Average vs. Median:** The OHC report uses both calculations of average and median. While similar, each formula can provide a different perspective. An average provides a number that represents the entire dataset, including outliers. When outliers exist in a dataset, they can bring an average up or down. For example, if a child has been in OHC for many years, that long episode will make the average length of stay for the entire dataset longer. A median provides the value of the middle of the dataset. For example, if a majority of children in OHC are in placement for 13 months, the median would be 13 months, regardless of any outliers of children with particularly long episodes.
