A new report called "Employment Report 01(b): Employments" has been published in the DCF/Wisdom/Employment Programs/W-2 Case Management/Employment Reports folder. This report is similar to Employment Report 01(a), but adds in the hours and wage data from WWP. Management information like FEP and office is now based on the CURRENT data, not as of the employment data entry. Additionally, some Input Controls have been added to help organize the data in the report by FEP, Office, County, Contractor Region, or by Agency.
