

In conjunction with the release of new functionality in WWP on the evening of Thursday, September 12, 2019, the Thursday night/Friday morning data loads for the following reports will be skipped:

- Employment Report 01(b): Employments
- Employment Report 03: Employments and Potential POP Claims
- TMJ/TJ Report 04: Active TMJ/TJ Participants - Details
- Monitoring Report 03: Participants Without a Completed WWP Informal Assessment
- W-2 SSN Monitoring Report

These reports will continue to show the data as of Thursday morning, until updated data is loaded on the morning of Monday, September 16th.

This will allow BITS time to migrate new code to production, validate the new Webl data structures, and validate that all data loads are successful.
