

A new WebI report called "**POP Report 18: POP Claim Adjudication Report**" has been published to the DCF/WISDOM/Employment Programs/Wisconsin Works/W-2 Performance Outcome folder.

Background: This report was created to track the DCF state review status and state appeal status of performance outcome claims that were initiated and approved by the W-2 contract agency.

Purpose: The report lists all performance outcome claims that were initiated and approved by the W-2 contract agency for the month(s) specified in the report prompt. If the claim has not yet been adjudicated by the state, the "DCF Review Status" column will display "Not Yet Reviewed". If the claim has been adjudicated, the state decision will be displayed, e.g. "Claim Validated" or "Claim Denied". If a denied claim is appealed, the appeal status of the claim will be displayed in the "DCF Review Status" column.

When is the data loaded: The data contained in this report is refreshed on a nightly basis. The data in the report will reflect the claim status as of yesterday.
