

A modification to TMJ Report 12: Caseload Report has been made.

It has come to our attention that TMJ / TJ workers have been leaving cases open for inactive participants who may be returning to the program in the future (such as in the event of temporary absence, job loss, or incarceration), because the CARES system does not allow the worker to stop and re-start a new TMJ / TJ program episode for the participant without resetting the participant's existing capitated payment milestone achievements. For this reason, the TMJ / TJ caseload report will now show only the open TMJ / TJ program episodes for which the participant is engaged in at least one TMJ / TJ program activity (Orientation, Employment Search, Subsidized Job, or Unsubsidized Job).

This report will update daily at close of business.
