

A new report entitled: CL Report 06: Caseload by FEP has been created and published in WEBI to the following folder location:

DCF -> WISDOM -> Employment Programs -> Wisconsin Works -> Caseload Reports

This report shows the caseload for each FEP during a selected month. The report includes tabs showing a summary total of FEPs with caseloads of over 80 in each agency, and an agency tab listing the caseload of each FEP ID. This report can be used to monitor the requirement that each FEP must have a caseload of 80 or fewer cases. Caseloads over 80 are listed in red, and caseloads of 75-80 are listed in purple. Due to a known technological error, report users must review the FEP ID to ensure it belongs with the agency listed. These errors can be ignored. FEP ID prefixes that belong with each agency are listed in the documentation published with this report to help with this review. Because of the strong need for a monitoring tool in this area, DFES decided to publish the report despite the known technological error. A note reminding users of this error is listed on each page of the report.
