

A new version of “RP740TANF – W-2 TANF Activities Detail Report (CS1, CS2, CS3, CSJ and W-2 T)” report has been published to the DCF / WISDOM / Employment Programs / / W-2 Monitoring folder in WebI!

This version of the report now has one additional prompt and several new tabs.

We have added a prompt for PIN. Users can enter in a single PIN, or a list of PINs (separated by a semi-colon) to narrow the report down to just those participants you want to see.

We have added several tabs to summarize the data by FEP, Office, and Agency. These summary tabs show the counts of participants who are tentatively meeting or not meeting the Work Participation Rate (WPR) federal rate of 50%. Additionally, we have added tables that break that down further by Paid Placement Code and by Family type. On the WPR Breakdown by Agency tab, we have added a bar chart that shows the tentative meeting status by Paid Placement Code and Family Type combined.

With this report, W-2 agencies can monitor whether participants are assigned activities that put them on track to meet the WPR. This report does not adjust for non-participation or for hours assigned under the federal WPR Job Search and Job Readiness category that exceed the hourly and weekly limits.

This report can be viewed by office, agency, specific FEP worker, or even a single specific PIN or list of PINs, depending on your needs. You can even filter by Family Profile, Tentative Meeting WPR, and Total Federal Scheduled Hours Range. This report also includes the CSx participants who Job Search and Job Readiness equals or exceeds 25% of their required hours by office, agency, and FEP worker, as well as participants who are within 5 hours of meeting the federal work participation rate by office, agency, and FEP worker.
