

A new version of the “W2 #28 W-2 Participants Individual Clocks Report for Agencies – Listing” report has been published to the DCF / WISDOM / Employment Programs / W-2 / W2 - Participant folder in Web!

This version of the report has additional data, additional prompts, and new tabs. Additionally, the report now only shows those cases that were open during the report month.

We have added the new TNP, TMP, and TEMP clocks and associated alerts. We have also added the FEP ID for convenience. Additionally, the tables are now correctly sorted by Lifetime Months Used.

Unfortunately, we had to remove the Participant’s name to make room for all of the new data (PIN and Case Number are still on the report!).

The prompts for this report have been changed. Instead of having to choose both a month and an office, you now have to choose a month and an Agency. Office is now an optional prompt. Additionally, you have an optional prompt for Paid, Unpaid, Subsidized, and Incentive Placements (Placement Type).

There are now 6 tabs in this report. The first tab is more or less as it was before – it lists all individuals and their clock data by Office. The second tab lists those individuals with Lifetime clocks between 36 and 47 months. The third tab is for 48-60 months, while the fourth tab is for Lifetime clocks over 60 months.

The fifth tab is a clocks summary by office. This tab summarizes the Individuals by Placement and Lifetime Clock (grouped by 12 months blocks) for each office in the report. Paid placements are shaded in light red. The final tab summarizes the Individuals by Placement and Lifetime Clock for the entire Agency, even if a specific office was selected in the original report prompts. Additionally, there is a bar chart showing the count of individuals for each Placement Type (Paid, Unpaid, Subsidized, and Incentive) by Lifetime clock – again grouped by 12 months blocks.

Description of Report: This report provides individual clock data for the selected Report Month, Contract Agency, Office, or Placement Type.

Purpose: This report allows agency staff to view all individuals for all placements types for a given agency or office by the number of months the participant has receiving TANF benefits.

How to Use the Report: The first prompt selects the month that you would like individual clock data for. The second prompt selects the contract agency. The third and fourth prompts are optional.
