

New W-2 WebI Performance Outcome Report for SSI created and published.

A new performance outcome report, *Pop Report 04: W-2 SSI/SSDI Performance Outcome Claim Status History*, has been created to track the 12-month claim history for SSI/SSDI performance outcome claims. The report tracks SSI/SSDI separately from the job-related performance outcome claims contained in Pop Report 03, because employment data fields are incompatible with the SSI/SSDI claim type. Pop Report 04 contains similar information to Pop Report 03, except the columns *Related Claim Number* and *Date of Change to Hours/Wages* have been removed, and the following SSI/SSDI-specific columns have been added: *SSI Received*, *SSI Received Month*, *SSDI Received*, and *SSDI Received Month*. Pop Report 03 has not been changed and will continue to report the 12-month claim history for job-related performance outcome claims, including Job Attainment, Partial Job Attainment, Job Retention, and Long-Term Participant Job Attainment.

Reports are located in Wisdom\Employment Programs\Wisconsin Works\W-2 Performance Outcome
