

In response to requests RAS received to make “FReD Report 03 - Individual Participation Detail Report” easier to identify specific information by placement type, we’ve added an input control for W-2 Paid Placements to both tabs. The report will open and display the same as it always has, you will now have an option to filter the report by specific placements.

After opening the report, select the “Input Controls” icon on the left to bring up a dynamic drop down list where you can filter the report by placement type. A selection of a placement on one tab will filter both tabs of the report for that placement automatically.
