

The maintenance on the TMJ/TJ reports and caseload reports with activities is complete, and users may now run these reports. However, more validation is needed on participants not in activities (NA phase). Therefore, TMJ/TJ Reports 5, 6, and 11 are still being validated due to the issues with the NA phase, which can be caused by backdating activities. A separate notification will be sent when the validation of the NA phase is complete, and the data in these reports is considered reliable.

“TMJ/TJ Report 11: Closed TMJ/TJ Episodes” has been made into two separate reports, “TMJ/TJ Report 11: Closed TMJ/TJ Episodes in Last 45 Days (W-2 D)” and “TMJ/TJ Report 11: Closed TMJ/TJ Episodes Monthly History (W-2 D)”. Documentation is pending on the new reports for TMJ/TJ Report 11.
